📖 **The Piracy Crusade** Aram Sinnreich,2013 In the decade and a half since Napster first emerged, forever changing the face of digital culture, the claim that internet pirates killed the music industry has become so ubiquitous that it is treated as common knowledge. Piracy is a scourge on legitimate businesses and hard-working artists, we are told, a cybercrime similar to identity fraud or even terrorism. In *The Piracy Crusade*, Aram Sinnreich critiques the notion of piracy as a myth perpetuated by today's cultural cartels?the handful of companies that dominate the film, software, and especially music industries. As digital networks have permeated our social environment, they have offered vast numbers of people the opportunity to experiment with innovative cultural and entrepreneurial ideas predicated on the belief that information should be shared widely. This has left the media cartels, whose power has historically resided in their ability to restrict the flow of cultural information, with difficult choices: adapt to this new environment, fight the changes tooth and nail, or accept obsolescence. Their decision to fight has resulted in ever stronger copyright laws and the aggressive pursuit of accused infringers. Yet the most dangerous legacy of this piracy crusade is not the damage inflicted on promising start-ups or on well-intentioned civilians caught in the crosshairs of file-sharing litigation. Far more troubling, Sinnreich argues, are the broader implications of copyright laws and global treaties that sacrifice free speech and privacy in the name of combating the phantom of piracy?policies that threaten to undermine the foundations of democratic society.

📖 **Winners Take All - The 9 Fundamental Rules of High Tech Strategy** Tony Seba,2006-07-09 'Winners Take All' is about building a product and a company into a winner. Written by Tony Seba, a high tech entrepreneur and Stanford University lecturer, this book is an easy-to-read guide to the strategies, tools, templates, and step-by-step implementation frameworks that recent Silicon Valley winners have used to achieve market leadership. Seba, who teaches entrepreneurship and strategic marketing looked at recent winners like Google, Symantec, Netflix, Apple, Craigslist, Salesforce, and compared them to the competition (Yahoo, McAfee, Sony) in order to learn what differentiated these companies He found 9 really simple rules that winning companies can follow. To test the 9 Rules's predictive power, the author published two portfolios. 18 months later the results were compelling: 80% of the '9 Rules' companies beat the market and the portfolio had a 57% return (details: www.tonyseba.com). Winners Take All is refreshingly free of buzzwords and consultant-speak.

📖 **Connecting Families** Carman Neustaedter,Steve Harrison,Abigail Sellen,2014-09-20 New technologies are radically changing the way that families connect with one another: we can text our teenagers from work, eat dinner with far-away parents via video link, and instantly upload and share photos after a family day out. Whether we are bridging time or distance, and whether we are enhancing our closest relationships or strengthening the bonds of extended family, as computer technologies alter the communication landscape, they in turn are changing the way we conduct and experience family life. This state of the art volume explores the impact of new communication systems on how families interact – how they share their lives and routines, engage in social touch, and negotiate being together or being apart – by considering a range of different family relationships that shape the nature of communication. Composed of three sections, the first looks at what is often the core of a 'family', the couple, to understand the impact of technology on couple relationships, communication, and feelings of closeness. The second section studies immediate families that have expanded beyond just the individual or couple to include children. Here, the emphasis is on connection for communication, coordination, and play. The third section moves beyond the immediate family to explore connections between extended, distributed family members. This includes connections between adult children and their parents, grandparents and grandchildren, and adult siblings. Here family members have grown older, moved away from 'home', and forged new families. Researchers, designers and developers of new communication technologies will find this volume invaluable. Connecting Families: The Impact of New Communication Technologies on Domestic Life brings together the most up-to-date studies to help in understanding how new communication technologies shape – and are shaped by – family life, and offers inspiration and guidance for design by making clear what families need and value from technological systems.

It is written with a European perspective with examples that are drawn from around the globe, consistent with the nature of e-commerce. Visit the companion website An companion web site with links to exercises, further reading sections and teaching materials is available at www.tassabehji.co.uk This textbook gives an overview of e-commerce, relevant issues and frameworks. It looks at the foundations on which e-commerce is built - the technology. Managers and students of management must have an understanding of the infrastructure and inextricable linkages between processes and technology in a 21st century business. The book then goes on to examine businesses that have been built on these technology foundations. It explains the concept of the business model, the 'dot com' phenomenon and frameworks that have emerged as a result. It also outlines the legal and ethical implications for an e-business. It outlines the academic debate about the impact of e-commerce on economics and management thinking. It concludes with a glance to the future, exploring the potential new wave of technology.
