Microsoft Dynamics CRM 2011 Unleashed Marc Wolenik,Damian Sinay,Rajya Vardhan Bhaiya,2011-09-27 Microsoft® Dynamics CRM 2011 Unleashed presents start-to-finish guidance for planning, customizing, deploying, integrating, managing, and securing the newest version of Dynamics CRM. Authored by three leading Microsoft Dynamics implementers, it illuminates new opportunities to deploy CRM as a hosted service (SaaS), integrate with Azure cloud services, and extend CRM through Microsoft's new online service marketplace. The authors systematically explain how Dynamics CRM 2011 works, illuminating why it works that way, and how to drive maximum business value from it. Drawing on insider knowledge of Microsoft's new product, they present clear examples, proven best practices, and pitfalls to avoid in using every significant Dynamics CRM capability. Their far-reaching coverage ranges from Dynamics CRM's sales, marketing, and customer service features to its automated workflows; Outlook and Office integration to reporting and security. This edition's extensive new coverage includes new chapters on Mobility, the Outlook Client, and Office 2010 integration, as well as greatly expanded coverage of CRM Online. It also contains new or expanded discussions of data visualization, SharePoint Foundation integration, user interface changes, inbuild charts, dashboards, IM and SMS communication support, auditing, no-code workflows, connections, queues, the new WCF-based programming model, UI scripting, and security.

**Adaptability** Max McKeown,2012-04-03 Adaptability is the key human trait. The ability to adapt faster and smarter than the situation is what makes the powerful difference between adapting to cope and adapting to win. Our history is a story of adaptation and change. And in this time of brutal competition and economic uncertainty, it has never been more important to understand how to adapt successfully. In a series of powerful rules, Max McKeown explores how to increase the adaptability of you and your organization to create winning positions. Fascinating real-world examples from business, government, the military and sport bring the rules of adaptability to life - from the world's most innovative corporations to street-level creativity emerging from the slums. Adaptability is a powerful, practical and inspirational guide to success in uncertain times.

INDICE: Introduction: why reputations matter. Part 1 The hidden value of a good reputation: going for the gold; what's in a name?; enlightened self-inter... Etc.

**Data Center Fundamentals** Mauricio Arregoces,Maurizio Portolani,2003-12-04 Master the basics of data centers to build server farms that enhance your Web site performance Learn design guidelines that show how to deploy server farms in highly available and scalable environments Plan site performance capacity with discussions of server farm architectures and their real-life applications to determine your system needs Today's market demands that businesses have an Internet presence through which they can perform e-commerce and customer support, and establish a presence that can attract and increase their customer base. Underestimated hit ratios, compromised credit card records, perceived slow Web site access, or the infamous Object Not Found alerts make the difference between a successful online presence and one that is bound to fail. These challenges can be solved in part with the use of data center technology. Data centers switch traffic based on information at the Network, Transport, or Application layers. Content switches perform the best server selection process to direct users' requests for a specific service to a server in a server farm. The best server selection process takes into account both server load and availability, and the existence and consistency of the requested content. Data Center Fundamentals helps you understand the basic concepts behind the design and scaling of server farms using data center and content switching technologies. It addresses the principles and concepts needed to take on the most common challenges encountered during planning, implementing, and managing Internet and intranet IP-based server farms. An in-depth analysis of the data center technology with real-life scenarios make Data Center Fundamentals an ideal reference for understanding, planning, and designing Web hosting and e-commerce environments.

**Asian Defence Review 2014-15** Air Marshal Vinod Patney,2015-08-15 The revival of major world power rivalry is a striking feature of the current international affairs. In the year gone by, Europe, supported by the US, vied with Russia for influence in Ukraine—a race that led to the annexation of Crimea by Russia and a pro-Russian insurgency in that region. In Asia, while the US is gradually drawing down in Afghanistan, it is also seeking to counter the growing influence of China. The sole Super Power is garnering support from China's neighbours, India included, to balance the resurgent Dragon. Meanwhile, the rapid growth of ISIS has disturbed the world peace. The progress made in the negotiations on Iran's nuclear programme is likely to affect calculations and equations all over the world. No region is impervious to the happenings in another part of the world. Competition (read rivalries) and geopolitical shifts pose myriad challenges to the peace-loving nations of the world—quite often, they are faced with the difficulty of evading armed conflicts. It requires conscious and sustained effort to do so. In order to work towards such goals, it is necessary to look at geopolitical, security and military-related issues objectively. The Centre for Air Power Studies has been publishing the Asian Defence Review to fulfill this need. This volume, a resource base for both the professional and the general readers, is the eighth in the series under this title. It aims to add to the pool of information and knowledge in the current strategic discourse dealing with military strategy, defence, politics and trends in military capabilities that impact Asia. In particular, it covers some of the important issues related to Air Power, Tactical Nuclear Weapons, Cyber Security, Network-Centric Warfare, Environmental Degradation, Iran, Pakistan and China.
