Chased by the Light Jim Brandenburg,2001 Award-winning nature photographer Jim Brandenburg gave himself a challenge: for ninety days between the autumnal equinox and the winter solstice, he would take only one photograph each day. This exquisite book, now in softcover, is the result of that bold and immensely personal project. Through the accompanying essay, Brandenburg shares his innermost thoughts and passions as he witnesses the cycle of nature near his home in the northwoods of Minnesota. Brandenburg also contributes new photos and an Epilog that illustrates and discusses the devastating summer wind storm that wreaked havoc on the locations photographed for the original project.

The Power of Trees ,2012-12-15 Intimate in size yet quietly breathtaking in scope, this graceful gift book will forever change how you think, and how you feel, about trees. In poetically sparse scientific observations, renowned conservation biologist Gretchen Daily narrates the evolution, impact, and natural wonder of trees. Alongside photographs by Chuck Katz, the text and images form a quiet and moving meditation on The Power of Trees. Twenty-six duotone black and white photographs illustrate the development of trees: how trunks were formed, what tree rings tell us about human societies, and how trees define the future of humanity. Pictures of trees threading through the landscape - dotting mountainsides, braiding along the sides of glassine rivers - bear witness to the lyrical force and clarity of Daily's observations. Recreating the authors’ hike together through the landscape of the Skagit River in Washington State, the balletic movement between Daily’s commentary and Katz’s vision reaches out to readers, inviting them to enjoy the landscape through a scientific understanding of trees. At once emotional and intellectual, The Power of Trees is the first collection of nature photographs that invites the reader to not only delight in the gorgeous play between light and shadow, but also the fascinating natural mechanisms that create such striking natural beauty. An ecologist by training, Gretchen Daily is an internationally acclaimed conservancy advocate and scholar. Her role as a National Trustee for The Nature Conservancy will feature prominently in the national marketing campaign to bridge the gap between scientific educators and the general nature reader.

How to Photograph Bears Joseph Classen,2016-11-15 Join Alaskan guide, photographer, and author Joseph Classen as he explores the topic of photographing one of nature's most feared and fascinating creatures: bears! In How to Photograph Bears, Classen takes photographers and nature enthusiasts on the adventure of a lifetime by sharing his most unforgettable bear photographs and the stories behind them. Along the way, readers will gain a wealth of important, how-to information about safely and respectfully photographing these magnificent beasts. Next, they teach readers about the behavioral and biological differences of the various species of bears and the safety precautions that should be heeded when seeking to document these subjects. After presenting a balanced, positive discussion about bears and personal safety, Classen shares with readers a wide variety of proven tactics, field techniques, and creative photographic concepts for capturing and producing unforgettable images of these elusive and powerful animals. Readers will get inside information on how to pack for the trip, how to choose and use the best equipment for the job, how to document behaviors, how to ensure artful compositions, and much more. Wildlife Photography Joseph F. Classen,2015-08-17 Wildlife photography is an adventure—and as any great adventure story unfolds, odds are, there are bound to be some great risks involved. Whether it’s the risk or the reward—or both—that motivates wildlife shooters, there is one pervasive truth: Preparation is key to success—and survival. In this book, Joe Classen approaches the art of wildlife photography from a hunter’s perspective. He teaches readers how to select and use the appropriate specialized photographic gear required for the rigors of wildlife photography—as you’d expect. However, he also teaches you how to mentally and physically prepare for an outing in which your wits must be as keen as your eye. Classen provides detailed insights into planning and packing for a wilderness adventure. Readers will learn how to securely pack their delicate photographic gear for a rugged, outdoor environment but will also learn how to choose and tote the best clothing for the site, accessories to ensure your personal safety, and even basic cooking and drinking requirements for days spent shooting in remote areas. Once you’ve scouted your location, you’ll learn how to track and lure your photographic subject using time-honored practices (calls—from lust to hunger, to anger and sloth; decoys; attractor scents; working invisibly, etc.) while “shooting” (your camera!) from a blind or stand—or, conversely, by using a more aggressive stalk-and-ambush approach. You’ll learn how to read animal

behaviors—from eating to mating—and predict how, when, and where your best photographic opportunities will arise—and when your safety should be a greater concern than your shot. With this soup-to-nuts approach, readers will find, in this book, a compendium of information about wild-animal behavior, wilderness survival and safety, the art and science of photographic capture, and even storing and processing your prized digital files once you return home from your adventure. Armed with Classen’s suggestions and strategies, you’ll maximize your photo opportunities and increase the odds that your wildlife images are the mount-and-frame trophies for which you risked life and limb.

Macrophotography Dennis Quinn,2016-08-22 Macrophotography allows for the capture of small photographic subjects in life size or larger magnification, allowing viewers to experience the world around them in a way that is simple not possible with the naked eye. With a magnified view, we can see the distinctive make-up of an insect, animal, or flower—its texture, details, and subject features that we might otherwise be completely unaware of. In this unique book, Dennis Quin turns his macro lenses upon the natural world and teaches readers to choose and use the tools they need to capture magical images of all manner of bugs, flowers, reptiles, and more. In each of the 60 sections in this beautifully illustrated book, Quin details the tricks of the trade. You’ll learn where to find your subjects, how to make sure that the background adds to the overall impact of the image, how to track insects in flight, and other skills that will increase your odds of capturing technically strong, visually rewarding shots. In each section, you’ll see 1 to 3 images of a unique subject and will get detailed instruction as to how Quin shot the image—including the equipment used, settings chosen, the camera angle, and more. There’s more to this book than instructional photographic text. In each of the 60 discrete sections, Quin provides fascinating tidbits about each animate object—describing the life cycle, feeding habits, mating rituals, breeding, and much more—or characteristics of botanical subjects. This book provides an inspiring and enlightening blend of photographic technique and fascinating science lessons. It is perfect for serious amateur photographers, wildlife/landscape photography enthusiasts, and even those whose “bread and butter” shots are in another genre completely. The book is sure to impress.

Deep Nature John Pearson,2009-10 Photographers Linda and Robert Scarth have an incredible eye for that magic moment when small becomes beautiful. Matched with patience and skill, their eye for magic produces dazzling images of Iowa nature up close. Revealing the miniature beauties hidden among the patches of prairie, woodland, and wetland that remain in Iowa’s sadly overdeveloped landscape, the seventy-five color photographs in Deep Nature give us a breathtaking cross section of the state’s smallest inhabitants. The Scarths’ close-up images of showy orchis and northern monkshood, great spangled fritillary and painted lady, red-breasted nuthatch and eastern wood-pewee, ornate box turtle and gray treefrog, big bluestem and cotton-grass, and many other natural wonders look more like paintings than photographs. Beginning with an iridescent fly hovering over a neon-purple fringed gentian and ending with their iconic image of coneflowers refracted in dewdrops, they have created a sparkling jewelbox of images that will make us look at the small world around us with renewed appreciation. Attending to the small things in the fabric of nature is the Scarths’ source of artistic inspiration. Taking Walt Whitman’s “every leaf is a miracle” as their beginning, they celebrate not only each leaf but each feather, insect, dewdrop, flower, lichen, and intricate organism in the evolving web of life.

Looking for the Summer Jim Brandenburg,2003 The photographer turns his lense on the North Woods, documenting the nature of this wild section of Minnesota, illuminating the wildlife, wildflowers, water, and open skies.
