Online Coupon or Daily Deal Business Rich Mintzer, Entrepreneur magazine, 2013-09-16 Unlike old-school “design your own coupon book” titles, this book moves straight into computer technology and proceeds to the latest trend in couponing... apps, which provide deals to mobile users wherever they may be. Of particular interest are the sections describing how to make a splash in the highly lucrative, but also competitive daily deal segment of the market, where Groupon and LivingSocial reign supreme. Included within, readers will how to: •Build an online network of followers which can translate into customers •Attract merchants •Join affiliate coupon or daily deal programs •Find your niche market •Create an aggregator site, in which you present the best of the best from daily deal or coupon websites. •Market your coupon or daily deal site through the social media Of particular interest is a chapter devoted to working closely with your merchants to provide coaching and guidance on how the daily deal industry works from their perspective. Many daily deal businesses do not work to enhance the experience for their merchants. Readers, however, can learn how to do so. Experts in the industry are also included such as Marc Horne, co-creator of Daily Deal Builder, who discusses what it takes to build a daily deal site, David Teichner, CEO of Yowza!! who brought deal apps to iPhones and several business owners who have tried their luck at running daily deal. They discuss what they have learned from the process. Currently there are few, if any, other books on how to start a daily deal business and the coupon books focus on how to use coupons and even on extreme couponing, but not on running an online coupon business. This is a unique title which provides those who enjoy offering deals and discounts to get started in an industry that is still growing. Empowering Teachers Across Europe to Deal with Social, Emotional and Diversity-Related Challenges Ana Kozina, 2024-02-20 The increase in reported levels of stress and burnout in teachers across Europe highlights the importance of teachers' social and emotional competencies and diversity awareness (SEDA). Since teaching is an extremely social and emotional process where diversity, if recognised, is embraced at every step, we believe that supporting teachers to develop SEDA competencies is the key to shaping not only the positive relationships of living and learning together in classrooms, but also, in living and learning together in society. Once SEDA competencies are supported, a positive shift can occur at the level of individual teacher, classroom, school and society level. The book is our way of experimentally demonstrating how teachers' SEDA can be supported across Europe (Volume I) and how policy can support these processes (Volume II). Volume I focuses on the innovative conceptual overlap of social and emotional competencies and diversity awareness and experimentally test it across European countries - with an emphasis on conceptualisation, implementation and evaluation processes.

Principles of Social Psychology Kelly G. Shaver, 2015-06-19 Originally published in 1987 this third edition won praise from students and instructors alike for its challenging no nonsense approach to the field. Thoroughly updated to reflect current research of the time, the text retains the qualities that had become its hallmarks: a cognitive approach to the process of socialization, and an emphasis on the ideas that give the discipline continuity. It offers clear, conceptually integrated discussions of all of the major topics in social psychology from the time. Shaver's focus on the concepts of social psychology provides a framework for students to develop their own applications. The principles of social behavior are presented in the text in the same way they develop in the individual moving from internal processes (social perception, self-recognition) to external issues (the environment, the law) that influence behavior. Shaver weaves contemporary issues into his treatment of basic theories, using examples from everyday situations. His supple writing engages students in the complexity of social behavior, and is one reason this title remained one of the most highly regarded texts in the field at the time.

Rome's Greatest Defeat Adrian Murdoch, 2008-07-14 In AD 9 half of Rome's Western army was ambushed in a German forest and annihilated. Three legions, three cavalry units and six auxiliary regiments - some 25,000 men - were wiped out. It dealt a body blow to the empire's imperial pretensions and was Rome's greatest defeat. No other battle stopped the Roman empire dead in its tracks. Although one of the most significant and dramatic battles in European history, this is also one which has been largely overlooked. Drawing on primary sources and a vast wealth of new archaeological evidence, Adrian Murdoch brings to life the battle itself, the historical background and the effects of the Roman defeat as well as exploring the personalities of those who took part.

Introduction to Information Systems R. Kelly Rainer (Jr.), Casey G. Cegielski, Ingrid Splettstoesser-Hogeterp, Cristobal Sanchez-Rodriguez, 2013-08-30 The goal of Introduction to Information Systems, 3rd Canadian Edition remains the same: to teach all business majors, especially undergraduate ones, how to use information technology to master their current or future jobs and to help ensure the success of their organization. To accomplish this goal, this text helps students to become informed users; that is, persons knowledgeable about information systems and information technology. The focus is not on merely learning the concepts of IT but rather on applying those concepts to facilitate business processes. The authors concentrate on placing information systems in the context of business, so that students will more readily grasp the concepts presented in the text. The theme of this book is What's In IT for Me? This question is asked by all students who take this course. The book will show you that IT is the backbone of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production/Operations Management. Information for the Management Information Systems (MIS) major is also included.

Violent Acts and Urban Space in Contemporary Tel Aviv Tali Hatuka, 2010-05-01 Violent acts over the past fifteen years have profoundly altered civil rituals, cultural identity, and the meaning of place in Tel Aviv. Three events in particular have shed light on the global rule of urban space in the struggle for territory, resources, and power: the assassination of Prime Minister Rabin in 1995 in the city council square; the suicidal bombing at the Dolphinarium Discothèque along the shoreline in 2001; and bombings in the Neve Shaanan neighborhood in 2003. Tali Hatuka uses an interdisciplinary framework of urban theory and sociopolitical theory to shed light on the discourse regarding violent events to include an analysis of the physical space where these events take place. She exposes the complex relationships among local groups, the state, and the city, challenging the national discourse by offering a fresh interpretation of contesting forces and their effect on the urban environment. Perhaps the most valuable contribution of this book is its critical assessment of the current Israeli reality, which is affected by violent events that continually alter the everyday life of its citizens. Although these events have been widely publicized by the media, there is scant literature focusing on their impact on the urban spaces where people live and meet. In addition, Hatuka shows how sociopolitical events become crucial defining moments in contemporary lived experience, allowing us to examine universal questions about the way democracy, ideology, and memory are manifested in the city.

The New Deal and American Society, 1933–1941 Kenneth J. Bindas,2021-11-10 The New Deal and American Society, 1933–1941 explores what some have labeled the third American revolution, in one concise and accessible volume. This book examines the emergence of modern America, beginning with the 100 Days legislation in 1933 through to the second New Deal era that began in 1935. This revolutionary period introduced sweeping social and economic legislation designed to provide the American people with a sense of hope while at the same time creating regulations designed to safeguard against future depressions. It was not without critics or failures, but even these proved significant in the ongoing discussions concerning the idea of federal power, social inclusion, and civil rights. Uncertainties concerning aggressive, nationalistic states like Italy, Germany, and Japan shifted the focus of FDR's administration, but the events of World War II solidified the ideas and policies begun during the 1930s, especially as they related to the welfare state. The legacy of the New Deal would resonate well into the current century through programs like Social Security, unemployment compensation, workers' rights, and the belief that the federal government is responsible for the economic well-being of its citizenry. The volume includes many primary documents to help situate students and bring this era to life. The text will be of interest to students of American history, economic and social history, and, more broadly, courses that engage social change and economic upheaval.

Making a New Deal Lizabeth Cohen,2008 This book examines how ordinary factory workers became unionists and national political participants by the mid-1930s.

Karl Marx's Philosophy of Nature, Action and Society Justin Holt,2009-05-27 This work analyses Marx's philosophy of nature and shows how it is the basis for his practical philosophy. Previous analysis of Marx's philosophy of nature has considered humans as only natural beings and social beings. But, Marx analyzed humans' relationship to the natural world and to themselves as natural, social, and material. This material feature of human action can server as a basis for social critique and as the foundation for a practical analysis. The first chapter of this book analyzes Marx's philosophy of nature from his early to late works and argues that humans are natural beings that use nature to develop new capacities. This consideration is central in Marx's critiques of Hegel and Feuerbach. The second chapter discusses Marx's material critique of social forms and discusses why the distinction between material action and social action is a key component of Marx critique of capitalism. This chapter also discusses industrial history, ideology, wages, justice, and valorization. The third and final chapter builds on Marx's materialist analysis to develop a standard of practical action that takes human's material activity as its basis. This chapter also discusses classical historical materialist claims, liberal ethical theories, and a practical philosophic consideration of socialism.

Folk Song Style and Culture Alan Lomax,2017-07-12 Song and dance style--viewed as nonverbal communications about culture--are here related to social structure and cultural history.
