**Dear Photograph** Taylor Jones, 2012-04-24 We all have moments we wish we could relive. We'd give anything to skid down the toboggan hills of our youth, to breathe in the smell of our children as babies or to spend just one more minute with a loved one we've lost. Dear Photograph provides a way to link these memories from the past to the present. The idea is simple: hold a photograph from the past up in front of the place where it was originally taken; take a second photograph; add a sentence of dedication about what the photograph means to you. The results, however, are astounding, which is why millions have flocked to the site, and thousands have submitted their own Dear Photographs. This stunning visual compilation includes more than 140 never-before-seen Dear Photographs. By turns nostalgic, charming and poignant, Dear Photograph evokes childhood memories, laments difficult losses and, above all, celebrates the universal nature of love.

*Dear Photograph* Taylor Jones, 2012-07-03 We all have moments we wish we could relive. We'd give anything to skid down the toboggan hills of our youth, to breathe in the smell of our children as babies, or to spend just one more minute with someone we've lost. Dear Photograph provides a way to link these memories from the past to the present, overlapping them to see how the daydreams of our memories collide with our current realities. The idea is simple: hold up a photograph from the past in front of the place where it was originally taken, take a second photograph, and add a sentence of dedication

about what the photograph means to you. The results, however, are astounding, which is why millions have flocked to dearphotograph.com and thousands have submitted their own Dear Photographs. This stunning visual compilation includes more than 140 never-before-seen Dear Photographs, as well as a space for you to attach your own cherished photo. By turns nostalgic, charming, and poignant, Dear Photograph evokes childhood memories, laments difficult losses, and, above all, celebrates the universal nature of love.

**Dear Juno** Soyung Pak, 2001-11-12 Juno's grandmother writes in Korean and Juno writes in drawings, but that doesn't mean they can't exchange letters. From the photo his grandmother sends him, Juno can tell that she has a new cat. From the picture he makes for her, Juno's grandmother can tell that he wants her to come for a visit. So she sends Juno a miniature plane, to let him know she's on the way. This tender tale won the author an Ezra Jack Keats award, and is a perfect introduction to the concept of foreign cultures and far-off lands.

Dear Data Giorgia Lupi, Stefanie Posavec, 2016-09-13 Equal parts mail art, data visualization, and affectionate correspondence, Dear Data celebrates the infinitesimal, incomplete, imperfect, yet exquisitely human details of life, in the words of Maria Popova (Brain Pickings), who introduces this charming and graphically powerful book. For one year, Giorgia Lupi, an Italian living in New York, and Stefanie Posavec, an American in London, mapped the

particulars of their daily lives as a series of hand-drawn postcards they exchanged via mail weekly—small portraits as full of emotion as they are data, both mundane and magical. Dear Data reproduces in pinpoint detail the full year's set of cards, front and back, providing a remarkable portrait of two artists connected by their attention to the details of their lives—including complaints, distractions, phone addictions, physical contact, and desires. These details illuminate the lives of two remarkable young women and also inspire us to map our own lives, including specific suggestions on what data to draw and how. A captivating and unique book for designers, artists, correspondents, friends, and lovers everywhere.

Dear Mr. Picasso Fred Baldwin, 2019 Fred Baldwin's life took a turn in the direction of the extraordinary when he decided to interview and photograph Pablo Picasso. In his last year of college, he delivered a letter with own drawings to the artist. This made Picasso laugh and open the door. Baldwin's life changed. He followed his dream, used his imagination, overcame fear, and acted - now he could accomplish anything. What followed were picture stories about reindeer migrations, a day and a night with the Ku Klux Klan, Nobel Prize coverage, cod fishing in Arctic Norway, polar bear expeditions. Then underwater images of the fight of hooked Marlin in Mexico - an homage to Hemingway. In 1963, Baldwin joined the Civil Rights Movement, photographing Martin Luther King. A two-year stint as Peace Corps director in Borneo was followed by more photojournalism in India and Afghanistan. This account takes the reader to high adventure worldwide, but also to disaster and failure. This illustrated love affair with freedom shows how a camera became a passport to the world. Fred Baldwin was born in 1928 in Switzerland. After earning his B.A. degree from Columbia College, New York in 1956, he began a freelance photography career which continued until 1987. Baldwin worked for LIFE, National Geographic, GEO, STERN, Esquire, Sports Illustrated, Smithsonian Magazine, Newsweek, the New York Times and others.

**Emotions, Technology, and Health** ,2016-01-04 Emotions, Technology, and Health examines how healthcare consumers interact with health technology, how this technology mediates interpersonal interactions, and the effectiveness of technology in gathering health-related information in various situations. Section Two describes the use of technology in mediating emotions within and between individuals, and addresses the implications for the design and use of devices that gather behavioral health data and contribute to healthcare interventions. *Spectral Spaces and Hauntings* Christina Lee, 2017-02-17 This anthology explores the spatial dimension and politics of haunting. It considers how the 'appearance' of absence, emptiness and the imperceptible can indicate an overwhelming presence of something that once was, and still is, (t)here. At its core, the book asks: how and why do certain places haunt us? Drawing from a diversity of mediums, forms and disciplinary approaches, the contributors to *Spectral Spaces and Hauntings* illustrate the complicated ways absent presences can manifest and be registered. The case studies range from the memory sites of a terrorist attack, the lost home, a vanished mining town and abandoned airports, to the post-apocalyptic wastelands in literary fiction, the photographic and filmic surfaces where spectres materialise, and the body as a site for re-corporealising the disappeared and dead. In ruminating on the afteraffects of spectral spaces on human experience, the anthology

importantly foregrounds the ethical and political imperative of engaging with ghosts and following their traces.

*Digital Photography and Everyday Life* Edgar Gómez Cruz, Asko Lehmuškallio, 2016-05-20 *Digital Photography and Everyday Life: Empirical studies on material visual practices* explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making

process in wider discussions on the materiality and visibility of photographic practices and explores these through empirical case studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the development of visual digital cultures. Digital Photography and Everyday Life will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.
