**Annual Report - Government of India, Ministry of Defence** India. Ministry of Defence, 2007  
Of Matters Military Mrinal Suman, 2021-07 Imported defence systems are like crutches that can provide only temporary sustenance but not enduring muscle strength. Dependence on imports makes a nation hostage to the policies of the exporting nations and captive to the dictates of unscrupulous foreign vendors. Therefore, 'Make in India' is a highly overdue clarion call and a mission statement. The book identifies reasons for the dismal state of the Indian defence industry and suggests corrective measures. It recommends the integration of the private sector and support to MSMEs. The need for an ecosystem to foster innovations has also been emphasised. As the defence industry is characterised by rapid obsolescence, regular infusion of the latest defence technologies is essential. FDI is not just a question of getting funds but accesses the latest know-how as well. Similarly, the powerful leverage of offsets can be used to obtain technologies that industrially advanced nations are unwilling to sell. Finally, the book suggests the establishment of a Defence and Aerospace Commission to oversee all functions pertaining to armament production, acquisitions and exports.

Defence Reporting in India V. C. Natarajan, 1995 This Book Asserts The Right Of The Media To Inform The People About Our Armed Services, Their Capabilities And Needs In Changing Times. An Openness About Our Defence Preparedness Would Also Bring Vout In The Open Vested Intrests In Arms-Deals And In The Execution Of Multi-Crore Projects. Without Dustjacket.

**Handbook of Indian Defence Policy** Harsh V. Pant, 2015-10-06 India has the world's fourth largest military and one of the biggest defence budgets. It asserts its political and military profile in

South Asia and the Indian Ocean region. The nation has been in the midst of an ambitious plan to modernize its largely Soviet-era arms since the late 1990s and has spent billions of dollars on latest high-tech military technology. This handbook: canvasses over 60 years of Indian defence policy and the major debates that have shaped it; discusses several key themes such as the origins of the modern armed forces in India; military doctrine and policy; internal and external challenges; and nuclearization and its consequences; includes contributions by well-known scholars, experts in the field and policymakers; and provides an annotated bibliography for further research. Presented in an accessible format, this lucidly written handbook will be an indispensable resource for scholars and researchers of security and defence studies, international relations and political science, as well as for government think tanks and policymakers.

*The Purpose of India's Security Strategy* Gautam Sen, 2019-09-30 This book comprises the journey of the Indian nation state and its tryst with destiny, where successive political leaderships, while governing India, contributed to a better understanding of the idea of India, its political and strategic culture, and the role that its military has had to play to develop that culture. Hence, the journey has been from the backwaters of 'defensive defence' to create a credible deterrence capacity as well as a doctrine to implement the same through political will and enter the domain of global involvement in the strategic, non-strategic as well as non-traditional areas of security. Thus, the title of the book *The Purpose of India's Security Strategy: Defence, Deterrence and Global Involvement*. It is hoped that this book will serve as a referral document to understand the polemics of the development of a strategic culture in India for an era which will be dominated by the information age and artificial intelligence, without forgetting that the Indian political leadership has come of age to understand the role of the military in the process of nation building.

**Intelligence and Imperial Defence** Richard James Popplewell, 1995 This is an account of the British intelligence operations based in both India and London, which defended the Indian Empire against subversion during the first two decades of the 20th century.

**India's Defence Economy** Laxman Kumar Behera, 2020-10-29 As the fourth largest military spender in the world, India has a huge defence economy supported by a budget amounting to nearly \$67 billion in 2020-21. This book examines how well India's defence economy is managed, through a detailed statistical exposition of five key themes – defence planning, expenditure, arms production, procurement and offsets. This book is based on hard-core evidence collected from multiple government and other credible sources including the ministries of Defence, Finance, and Commerce and Industry, Comptroller and Auditor General of India and the Reserve Bank of India. It discusses key issues such as the evolution of India's defence plan; the feasibility of increasing defence spending; India's defence acquisition system; and the recent reform measures taken under the rubric of the 'Make in India' initiative. Well supplemented with original tables and figures, India's Defence Economy will be indispensable to students and researchers of defence and security studies, politics and international relations, finance, development studies, economics, strategic studies, South Asian politics, foreign policy and peace studies. It will also be of interest to defence ministry officials, senior

armed forces personnel, military attachés, defence training institutes and strategic think tanks.

*Defence Journalism in India* Sangeeta Saxena,1997 Defence journalism, though very much a part of modern day journalism, has practically very little literature for reference. Being the first book on defence journalism, with special reference to India, it analyses the love-hate relationship between the military and the media. For the first time the definition of defence journalism has been encoded by the author. The book elaborates the essential information, facts, sources, and the qualities required to become a successful defence journalist. A code of ethics for defence writers and the caution against pitfalls of defence reporting is the hallmark of the book.
