Typewriters Anthony Casillo, 2017-10-17 "Typewriter expert and collector Anthony Casillo presents a visual homage to the device that revolutionized correspondence" (The Florida Times-Union). From the creation of the QWERTY keyboard to the world's first portable typing machine, this handsome collection is a visual homage to the golden age of the typewriter. From the world's first commercially successful typewriter—the Sholes & Glidden Type Writer of 1874—to the iconic electric models of the 1960s, eighty vintage devices are profiled in elegant photographs and fascinating text that highlights the design modifications, intricate details, and peculiar quirks that make each typewriter unique. From functional advances like noiseless machines to luxurious details such as mahogany covers and inlaid mother-of-pearl, a century of design innovation and experimentation is charted in these pages. Packed with visuals and rich with history, *Typewriters* is the essential story of a writing invention that changed the world. Includes a foreword by Tom Hanks Praise for *Typewriters* "A Love Letter to Vintage Typewriters." —Wall Street Journal "This is sure to delight typewriter lovers and those interested in machine or design history." —Library Journal

Competition Demystified Bruce C. Greenwald, Judd Kahn, 2005-08-18 Bruce Greenwald, one of the nation's leading business professors, presents a new and simplified approach to strategy that cuts through much of the fog that has surrounded the subject. Based on his hugely popular course at Columbia Business School, Greenwald and his coauthor, Judd Kahn, offer an easy-to-follow method for understanding the competitive structure of your industry and developing an appropriate strategy for your specific position. Over the last two decades, the conventional approach to strategy has become frustratingly complex. It's easy to get lost in a sophisticated model of your competitors, suppliers, buyers, substitutes, and other players, while losing sight of the big question: Are there barriers to entry that allow you to do things that other firms cannot?

The Challenger Sale Matthew Dixon, Brent Adamson, 2011-11-10 What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships—and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors, knowledge, and attitudes that matter most for high performance. And what they discovered may be the biggest shock to conventional sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, *The Challenger Sale* argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one—the Challenger—delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

Networks, Crowds, and Markets David Easley, Jon Kleinberg, 2010-07-19 Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

Commedia dell'Arte in Context Christopher B. Balme, Piermario Vescovo, Daniele Vianello, 2018-04-05 The commedia dell'arte, the improvised Italian theatre that dominated the European stage from 1550 to 1750, is arguably the most famous theatre tradition to emerge from Europe in the early modern period. Its celebrated masks have come to symbolize theatre itself and have become part of the European cultural imagination. Over the past twenty years a revolution in commedia dell'arte scholarship has taken place, generated mainly by a number of distinguished Italian scholars. Their work, in which they have radically separated out the myth from the history of the phenomenon remains, however, largely untranslated into English (or any other language). The present volume gathers together these Italian and English-speaking scholars to synthesize for the first time this research for both specialist and non-specialist readers. The book is structured around key topics that span both the early modern period and the twentieth-century reinvention of the commedia dell'arte.

Hitler's Uranium Club Jeremy Bernstein, 2013-03-09 From April through December of 1945, ten of Nazi Germany's greatest nuclear physicists were detained by Allied military and intelligence services in a kind of gilded cage at Farm Hall, an English country manor near Cambridge. The physicists knew the Reich had failed to develop an atomic bomb, and they soon learned, from a BBC radio report on August 6, that the Allies had succeeded in their own efforts to create such a weapon. But what they did not know was that many of their meetings and private conversations were being monitored and recorded by British agents. This book contains the complete collection of transcripts that were made from these secret recordings, providing an unprecedented view of how the German scientists, including two Nobel Laureates, thought and spoke about their roles during the war.

The Presentation of Self in Everyday Life Erving Goffman,2021-09-29 A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Transforming the James River in Richmond Ralph Hambrick,2020-04-06 The James River is the centerpiece of Richmond, but by the mid-twentieth century it had been abused and neglected. Eagles and sturgeon had nearly disappeared, water-powered industry was abandoning it and the river was a sewer. Today, the river draws visitors to its wooded shorelines, restored canal and feisty rapids. At the local level, this transformation was the result of citizen action, public-private partnerships, difficult decisions by governmental leaders and the hard work of thousands of passionate advocates and volunteers. Local author and lifelong river watcher Ralph Hambrick chronicles the events, projects and controversies that brought about the dramatic change and lends a critical eye to the results.

My Life with Bob Pamela Paul,2017-05-02 For twenty-eight years, Pamela Paul has been keeping a diary that records the books she reads, rather than the life she leads. Or does it? Over time, it's become clear that this Book of Books, or Bob, as she calls him, tells a much bigger story. For Paul, as for many readers, books reflect her inner life--her fantasies and hopes, her dreams and ideas. And her life, in turn, influences which books she chooses, whether for solace or escape, diversion or self-reflection, information or entertainment. My Life with Bob isn't about what's in those books; it's about the relationship between books and readers--

Health-Related Emergency Disaster Risk Management (Health-EDRM) Emily Ying Yang Chan ,Holly Ching Yu Lam,2020-12-29 Disasters such as earthquakes, cyclones, floods, heat waves, nuclear accidents, and large scale pollution incidents take lives and cause exceptionally large health problems. The majority of large-scale disasters affect the most vulnerable populations, which are often comprised of people of extreme ages, in remote living areas, with endemic poverty, and with low literacy. Health-related emergency disaster risk management (Health-EDRM) [1] refers to the systematic analysis and management of health risks surrounding emergencies and disasters; it plays an important role in reducing hazards and vulnerability along with extending preparedness, response, and recovery measures. This concept encompasses risk analyses and interventions, such as accessible early warning systems, timely deployment of relief workers, and the provision of suitable drugs and medical equipment, to decrease the impact of disaster on people before, during, and after disaster events. Disaster risk profiling and interventions can be at the personal/household, community, and system/political levels; they can be targeted at specific health risks including respiratory issues caused by indoor burning, re-emergence of infectious disease due to low vaccination coverage, and gastrointestinal problems resulting from unregulated waste management. Unfortunately, there has been a major gap in the scientific literature regarding Health-EDRM. The aim of this Special Issue of IJERPH was to present papers describing/reporting the latest disaster and health risk analyses, as well as interventions for health-related disaster risk management, in an effort to address this gap and facilitate major global policies and initiatives for disaster risk reduction.
