Scenarios and Indicators for Sustainable Development–Towards A Critical Assessment of Achievements and Challenges Joachim H. Spangenberg,2019-03-14 Globalization and telecoupling are enhancing the complexity of the coupled socio-ecological system constituted by the interaction between the global ecosphere and the anthroposphere. As a result, the demand for tools to identify transformative innovations, assess future risks, and support precautionary decisions for sustainability is growing by the day in business and politics. Scenarios are a means of simplification, reducing the real-world complexity to a limited number of essential factors to analyze their interactions and support policy formulation, with indicators as communication and monitoring tools. In particular, in a time of "fake news" and "alternative truths" a critical reflection amongst producers and users of scenarios and indicators is overdue—the capability for critical self-reflection is what distinguishes science from pseudo-science, and is a condition of trust. The authors of this book test established measurement and modeling approaches against new challenges, assess the weaknesses of prevailing innovation theories and the political-ideological embedment of archetypical scenarios, highlight deficits in taking the physical basics into account, and the need to understand global interaction and the stepwise process of energy transitions, point out technical as well as conceptual weaknesses in data collection, harmonization and indicator generation, always with a view to solving problems.

International Law: Achievements and Prospects Federico Mayor,Mohammed Bedjaoui,2023-12-28 The arrival of the International Law: Achievements and Prospects can fairly be described as a major event in international legal publishing. It has been written by international lawyers from the North, the South, the East and the West, whose differing origins and different, or even opposed, academic backgrounds have ensured that the book encapsulates and brings into focus

`the main forms of civilization' and `the principal legal systems of the world'. The book's most distinctive feature is its international, multi-cultural and polyphonic nature. International Law: Achievements and Prospects aims to inform and to educate, to make the discipline of international law accessible to a very broad public, and to promote a meeting of minds on fundamental notions, key concepts, and the guiding principles of international law, over and beyond frontiers, ideologies and doctrines. In addition, it is intended to provide a framework for thought, to describe what international law is today, to specify its nature, define its purpose and show its strengths, and also to point out its weaknesses. All the contributing authors are or have been practitioners of international law. Their contributions express a global view of international law which helps to unravel the complex reality of the contemporary world. International Law: Achievements and Prospects has been produced under the auspices of UNESCO; its content also aspires to reflect, in some measure, the imprint of that Organization's sponsorship.
