Handbook Of Climate Change And Agroecosystems: Impacts, Adaptation, And Mitigation Hillel

Daniel, Rosenzweig Cynthia, 2010-09-03 The portending process of climate change, induced by the anthropogenic accumulations of greenhouse gases in the atmosphere, is likely to generate effects that will cascade through the biosphere, impacting all life on earth and bearing upon human endeavors. Of special concern is the potential effect on agriculture and global food security. Anticipating these effects demands that scientists widen their field of vision and cooperate across disciplines to encompass increasingly complex interactions. Trans-disciplinary cooperation should aim to generate effective responses to the evolving risks, including actions to mitigate the

emissions of greenhouse gases and to adapt to those climate changes that cannot be avoided. This handbook presents an exposition of current research on the impacts, adaptation, and mitigation of climate change in relation to agroecosystems. It is offered as the first volume in what is intended to be an ongoing series dedicated to elucidating the interactions of climate change with a broad range of sectors and systems, and to developing and spurring effective responses to this global challenge. As the collective scientific and practical knowledge of the processes and responses involved continues to grow, future volumes in the series will address important aspects of the topic periodically over the coming years.

Gestational Diabetes Clive Petry, 2014-02-07 Given the rapid increase in the worldwide incidence of gestational diabetes, the need for defining the risks and effects associated with raised glucose concentrations in pregnancy is great. Recent large studies are helping to define the risks, as well as identify the benefits of reducing glucose intolerance. Written by an esteemed list of international authors, *Gestational Diabetes: Origins, Complications, and Treatment* presents timely reviews relating to some of the most important aspects of gestational diabetes, specifically its causes, consequences, and treatments. Divided into five sections, the book begins with a section on metabolism in pregnancy and gestational diabetes, dealing with maternal and foetal glucose metabolism and the controversial area of what actually constitutes gestational diabetes. The next section examines risk factors and causes of gestational diabetes, including the obvious but often overlooked factors—being female and pregnant. The text also outlines environmental and genetic risk factors. The third section deals with the potential complications of gestational diabetes for both mother and offspring, considering short-term and long-term effects. The largest section in the book addresses treatments in an effort to improve the outcome for the mother and the baby. Chapters

describe the nutritional approach, considered the cornerstone of treating gestational diabetes, as well as evidence for the role of exercise in its treatment and a useful strategy for treating gestational diabetes pharmacologically. The final section discusses future prospects in screening, diagnosis, prevention, pathophysiology, and treatment of gestational diabetes.

Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 2013-11-21 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) *at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 20 (thesis year 1975) a total of 10,374 theses titles from 28 Canadian and 239 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. The organization of Volume 20 is identical to that of past years. It consists of theses titles arranged by discipline and by university within each discipline.

Achieving sustainable production of poultry meat Volume 1 Steven C. Ricke,2017-01-01 To meet growing demand, the FAO has estimated that world poultry production needs to grow by 2-3% per year to 2030. Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems. However, more intensive systems and complex supply chains have increased the risk of rapid transmission of animal diseases and zoonoses. Consumer expectations of sensory and nutritional quality have never been higher. At the same time consumers are more concerned about the environmental impact of poultry production as well as animal welfare. Drawing on an international range of expertise, this book reviews research on safety, quality and sustainability issues in poultry production. Part 1 discusses risks from pathogens, detection and safety management on farms and in slaughterhouse operations. Part 2 looks at ways of enhancing the flavour, colour, texture and nutritional quality of poultry meat. Finally, the book reviews the environmental impact of poultry production. Achieving sustainable

production of poultry meat Volume 1: Safety, quality and sustainability will be a standard reference for poultry and food scientists in universities, government and other research centres and companies involved in poultry production. It is accompanied by two further volumes which review poultry breeding, nutrition, health and welfare.
