Inside of a Dog Alexandra Horowitz, 2010-02-18 As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpernickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, *Inside of a Dog* will allow dog owners to look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

The Forever Dog Rodney Habib, Karen Shaw Becker, 2021-10-12 #1 New York Times Bestseller In this pathbreaking guide, two of the world's most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long, happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration, and autoimmune disorders—also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. *The Forever Dog* gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived

into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan focuses on diet and nutrition, movement, environmental exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including what the commercial manufacturers don't want us to know—and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel "up the leash." Medical breakthroughs have expanded our choices for canine health—if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.

Beloved Dog Maira Kalman, 2017-10-31 Maira Kalman, with wit and great sensitivity, reveals why dogs bring out the best in us Maira Kalman + Dogs = Bliss Dogs have lessons for us all. In *Beloved Dog*, renowned artist and author Maira Kalman illuminates our cherished companions as only she can. From the dogs lovingly illustrated in her acclaimed children's books to the real-life pets who inspire her still, Kalman's *Beloved Dog* is joyful, beautifully illustrated, and, as always, deeply philosophical. Here is Max Stravinsky, the dog poet of Oh-La-La (Max in Love)-fame, and her own Irish Wheaton Pete (almost named Einstein, until he revealed himself to be "clearly no Einstein"), who also made an appearance in the delightful *What Pete Ate: From A to Z*. And of course, there is Boganch, Kalman's in-laws' "big black slobbering Hungarian Beast." And that's just the beginning. With humor and intelligence, Kalman gives voice to the dogs she adores, noting that they are constant reminders that life reveals the best of itself when we live fully in the moment and extend unconditional love. "And it is very true," she writes, "that the most tender, complicated, most generous part of our being blossoms without any effort, when it comes to the love of a dog."

Dog Sense John Bradshaw, 2011 Dogs have been mankind's faithful companions for tens of thousands of years, yet today they are regularly treated as either pack-following wolves or furry humans. The truth is, dogs are neither--and our misunderstanding has put them in serious crisis. What dogs really need is a spokesperson, someone who will assert their specific needs. Renowned anthrozoologist Dr. John Bradshaw has made a career of studying human-animal interactions, and in *Dog Sense* he uses the latest scientific research to show how humans can live in harmony with--not just dominion over--their four-legged friends. From explaining why positive reinforcement is a more effective (and less damaging) way to control dogs' behavior than punishment to demonstrating the importance of weighing a dog's unique personality against stereotypes about its breed, Bradshaw offers extraordinary insight into the question of how we really ought to treat our dogs--

Few people are more qualified to speak about the abilities and potential of dogs than Jennifer Arnold, who for twenty years has trained service dogs for people with physical disabilities and special needs. Through her unique understanding of dogs' intelligence, sensitivity, and extrasensory skills, Arnold has developed an exemplary training method that is based on kindness and encouragement rather than fear and submission, and her results are extraordinary. To Jennifer Arnold, dogs are neither wolves in need of a pack leader nor babies in need of coddling; rather, they are extremely trusting beings attuned to their owners' needs, and they aim to please. Stories from Arnold's life and the lives of the dogs who were her greatest teachers provide convincing and compelling testimony to her choice teaching method and make Through a Dog's Eyes an unforgettable book that will forever change your relationship with your dog. *Publishers Weekly
