Dog and Friends Emma Dodd, 2017-08-22 Dog barks 'woof woof' as he runs excitedly across the grass early one morning to join his farmyard friends. 'Cock a doodle doo' cries Rooster, as he wakes up and greets the day. The cows say 'moo moo' in reply. Piggy squeals 'oink oink' and the sheep bleat 'baa baa'. In fact, it all gets a bit too noisy for Dog, who covers his ears as he tries to get a bit of peace and quiet! As the sun begins to set, Owl hoots 'twit-a-woo'. It must be time for Dog to return home for his supper. His owner Vicky raps 'clack clack' on a plate with a wooden spoon to get his attention - that's the best sound in the world to Dog! Finally, at bedtime, Mouse whispers a little goodnight squeak. Goodnight, Mouse! Sleep well, Dog! With appealing images to look at and to talk about, this book is a wonderful aid to learning that little ones will want to come back to time and time again

How Stella Learned to Talk Christina Hunger, 2021-05-04 INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.

The Particulars of Peter Kelly Conaboy, 2020-12-08 This might be one of the month's, if not the year's, sweetest books — zaniest, too." —The Washington Post A hilarious addition to the dogoir canon." —People Perhaps the greatest love story ever told." —Refinery29 The feel-good book the world needs. —PopSugar From one of the Internet's most original voices, a hilarious journey through the odd corners of obsessive dog ownership and the author's own infatuation with her perfect dog Peter. The author met Peter in the spring of 2017. He -- calm, puppy-eyed, with the heart of a poet and the soul of, also, a poet -- came to her first as a foster. He was unable to stay with his previously assigned foster for reasons that are none of your business, but which we will tell you were related to frequent urination. The rescue needed someone free of the sort of responsibilities that would force her to regularly leave the house for either work or socializing, and a writer was the natural choice. Thus began a love story for the ages. *The Particulars of Peter* is a funny exploration of the joy found in loving a dog so much it makes you feel like you're going to combust, and the author's potentially codependent relationship with her own sweet dog, Peter. Readers will follow Peter and his owner to Woofstock, the largest outdoor festival for dogs in North America, and accompany them to lessons in Canine Freestyle, a sport where dogs perform a routine set to music, creating

the illusion that they're dancing with their owners. From learning about Peter's DNA, to seeing if dogs can sense the presence of ghosts, *The Particulars of Peter* will give readers a smart, entertaining respite from the harsh world of humans into the funny little world of dogs. Readers will accompany this lovable duo through exciting trips, lessons, quiet moments of connection, and probably a failure or two. By fusing memoir and infotainment, *The Particulars of Peter* promises to refresh the perennially popular dog lit category in a scrumptiously bighearted barnstormer of a book.

Through a Dog's Ear Joshua Leeds, Susan Wagner, DVM, MS, 2008-03-01 You know that your dog's hearing is very sensitive, but did you know that you could create an environment of sound to improve the health and well-being of your canine companion? Barking Turid Rugaas, 2008 Barking is natural and almost all dogs bark. It is one of the many way dogs communicate with each other as well as with humans. By learning to identify what your dog is expressing when he barks, you can take steps to minimize the negative impact of barking behaviour--Publisher's description.

New Little Puppy Robin Rose, 2017 This little puppy has a brand-new home As you read the story, picture icons will prompt you to press the buttons and play the sound effects. The sturdy handle is just right for little hands, at home or on the go.

PawPrint Inside a Dog's Brain Meredith Premium Publishing, 2021-10-08 The story of how the canine brain developed is also a story of the minds of humankind at the time. If humans and wolves had not come to an understanding tens of thousands of years ago, the tameness and friendliness that separates Fido from his fanged cousins might not have developed. The changes that the canine brain has endured over the years has laid the groundwork for a bond that transcends other species. (The phrase man's best friend developed for a reason.) Humans have played a decisive role in the evolution of dogs, and these wolf descendants have worked their way into our hearts and been woven into the fabric of human society.

Understanding Friendship Gary Chartier, 2022-02-01 What is friendship? Is it ethically important? Does it exist outside ethics? Is it a potential distraction from the love of God or from moral responsibility? How might it nourish our spiritual lives? How should we make sense of the moral responsibilities we often take ourselves to have to our friends? Does friendship have anything to do with politics? Understanding Friendship answers these questions by painting a picture of friendship as a vibrant expression of Christian love that can enrich individual lives even as in various ways it can also prove socially, culturally, politically, and spiritually significant. Through a wide-ranging, erudite, yet accessible exploration of theological and philosophical traditions, Understanding Friendship examines what friendship is while showing how its distinctive moral status can be supported by multiple approaches to Christian ethics. Understanding Friendship ultimately reveals friendship's place in a fruitful understanding of Christian spirituality.

The Archaeomusicology of the Ancient Near East Richard J. Dumbrill, 2005 'This volume is a massive leap forward over any previous synthesis of the subject and includes at the very minimum so much information that its academic and scientific value is self evident. The freshness and profundity of Dumbrill's approach to the subject exceeds anything attempted before. 'The mythology of ancient Mesopotamia proves readable as tonal allegory when its numerology is decoded as tuning theory. By the third millennium BC both pentatonic and heptatonic tunings were quantified throughout the entire 12-tone gamut. Richard Dumbrill has documented the massive empirical experience with strings and pipes that makes this early musicalization of the universe believable.' The volume consists in 4 parts with foreword by Prof. Ernest McClain. The first is about the decipherment, translation and interpretation of the few theoretical cuneiform texts dating from the Old Babylonian period, about 2000 BC, to Neo Assyrian up to the mid first millennium BC. Dumbrill undertakes comparative analyses and criticism of various interpretations having preceded his own and introduces new material. The second part is about the Hurrian hymns, the earliest music ever written, circa 1400 BC, and are produced in their integrality. Attempts to the interpretation of Hymn H.6 are compared and followed by Dumbrill's methodology and interpretation. Each fragment of the collection is analyzed separately. The part concludes with statistical analyses attempting at the reconstruction of some Hurrian rules of composition. The third part consists in the organology with relevant philology and is the largest collection of the Mesopotamian instrumentarium. The last part is a unique lexicon of all known Mesopotamian terminology, with quotation of texts in which the philology appears. The book had been previously published under the title of 'The Musicology and Organology of the Ancient Near East' and now appears under its new title.
