**Flickr Hacks** Paul Bausch,Jim Bumgardner,2006-02-21 Over two million registered Flickr users and counting have discovered the ease and fun of organizing their photo libraries, showing off their favorite pictures to the world, and securely sharing their private pictures with friends, family, or ad hoc groups. But Flickr's own plethora of intuitive menus, options, and features just scratches the surface. Flickr Hacks goes beyond the basics of storing, sorting, and sharing your photos to the much bigger playground of what's possible. Whether you're a beginner looking to manage your metadata and play with tags, or a programmer in need of a detailed reference of Flickr API methods, you'll find what you're looking for here. In addition to getting under the hood of some of the most popular third-party Flickr toys already in the wild, you'll learn how to: Post photos to your blog directly from your cameraphone Mash up your own photos or others' public pictures into custom mosaics, collages, sliding puzzles, slideshows, or ransom notes Back up your Flickr library to your desktop, and save the comments too Set random desktop backgrounds and build your own Flickr screensaver Geotag your photos and map your contacts Download a list of photos and make a contact sheet Make your own Flickr-style tag cloud to visualize the frequency of common tags Build a color picker with a dynamic color wheel of Flickr photos Feed photos to your web site and subscribe to custom Flickr feeds using RSS Talk to the Flickr API using your web browser, Perl, or PHP; authenticate yourself and other users; and build custom API applications

The Ipinions Journal Anthony Livingston Hall, 2008-04-27 ANTHONY LIVINGSTON HALL COMMENTS ON: Bush's legacy of support for Africa: I was dismayed by the number of people who refused to believe that Bush had done more for Africa than any other US president; notwithstanding testimonials I proffered from renowned crusaders for African development (like Sir Bob Geldof and Bono) to support this claim. Oprah's school for African girls: I applaud Oprah for founding this school for the same reason I applauded Madonna for adopting that African boy: She is fulfilling a need which honors our shared humanity in a way that few of us can afford, or are even conscientious enough, to do. Native Americans ethnically cleansing blacks from their tribes: Indeed, I do marvel at this curious thing: that they would rather be condemned as racists for expelling blacks than be criticized as niggards for hoarding their gambling loot. French President Nicolas Sarkozy's love affair with the US Sarkozy displays a Blairite affinity for America that any self-respecting Frenchman must find particularly gaulling. Bungled terrorist attacks in London and Glasgow: Wannabe

suicide bombers rammed their jeep packed with explosives into Glasgow Airport on Saturday morning shouting Allah, Allah, Allah-no doubt hoping to go off in a blaze of glory for eternal assignations with their apocryphal 72 virgins. Steroids in baseball: In fact, steroid use has flourished in baseball (and other professional sports) pursuant to an open conspiracy among players and team owners to feed the gladiatorial lust of fans who want to see bigger, stronger and faster cyborgs perform for their atavistic enjoyment.

*Pro Web 2.0 Mashups* Raymond Yee,2008-04-25 Mashups are hugely popular right now, a very important topic within the general area of Web 2.0, involving technologies such as CSS, JavaScript, Ajax, APIs, libraries, and server-side languages (such as PHP and ASP.NET.) **Power of the Pedal** Rupert Guinness,2018-10-01 In 'Power of the Pedal', read about cycling in Australia from the penny farthing to 21st-century commuters and Olympic stars. Bicycles changed our lives! They meant a new and faster way to get around and gave rise to ways of exploring, socialising and competing. In the nineteenth century cycling encouraged 'overlanders', adventurers who explored new routes through rugged terrain; cycling clubs that gave women a new kind of freedom to mix socially with men: and novel kinds of racing. In this book, cycling journalist Rupert Guinness reveals 200 years of the bike in Australian everyday life and the world of competition.

Consent of the Networked Rebecca MacKinnon,2012-01-31 The Internet was going to liberate us, but in truth it has not. For every story about the web's empowering role in events such as the Arab Spring, there are many more about the quiet corrosion of civil liberties by companies and governments using the same digital technologies we have come to depend upon. In Consent of the Networked, journalist and Internet policy specialist Rebecca MacKinnon argues that it is time to fight for our rights before they are sold, legislated, programmed, and engineered away. Every day, the corporate sovereigns of cyberspace (Google and Facebook, among others) make decisions that affect our physical freedom -- but without our consent. Yet the traditional solution to unaccountable corporate behavior -- government regulation -- cannot stop the abuse of digital power on its own, and sometimes even contributes to it. A clarion call to action, Consent of the Networked shows that it is time to stop arguing over whether the Internet empowers people, and address the urgent question of how technology should be governed to support the rights and liberties of users around the world.

Classroom Blogging David Warlick,2007 Weblogs are about reading and writing. Literacy is about reading and writing. Blogging equals literacy.

Reading this book will give teachers important clues not only in how to become a blogger and to make their students bloggers, but also how this new avenue of expression is revolutionizing the information environment that we live in.
