Stronger Together Matthew X Joseph, 2021-12-03 When teachers work in a silo, it limits the collective thinking or brainstorming that is critical to innovative ideas that can transform teaching and learning. Being Stronger Together allows staff to practice creative leadership and take responsibility for helping all students learn. When good teachers work together, they support one another's journey toward better instruction. In a Stronger Together culture, educators: Support one another's efforts to improve. Take responsibility for solving problems. Accept the consequences of their decisions. Share ideas. Are energized by the ideas of their colleagues. We have the power to shift a school into a collaborative community and to have critical conversations about exciting and innovative change in schools.

Elements of Programming Joseph E. Scherger, M.D., 2015-11-11 Dr. Joseph Scherger's career in family medicine has spanned 40 years. His training also included a Masters in Public Health where he studied nutrition at the University of Washington. He has always included preventive medicine and wellness in his medical practice. He is physically active with running, one of many choices for being in good shape. Until 2013 he followed the nutrition guidelines promoted by leading organizations such as the American Heart Association. In 2013 he expanded his knowledge in nutrition by reading the books of physician leaders such as William Davis and David Perlmutter. One of his partners in practice (and now his personal physician) Hessam Mahdavi introduced him to Functional Medicine, a focus on treating the causes of disease rather than just treating disease with drugs and procedures. Following this new knowledge and approach, Dr. Scherger greatly improved his own health and the health of many of his patients. This book is that story, loaded with information and scientific references that

validate this exciting new approach to nutrition and good health. We live in a toxic food environment yet healthy foods are readily available. Dr. Scherger will help you make the choices that will result in your becoming lean and fit.

The Longevity Economy Joseph F. Coughlin, 2017-11-07 Oldness: a social construct at odds with reality that constrains how we live after middle age and stifles business thinking on how to best serve a group of consumers, workers, and innovators that is growing larger and wealthier with every passing day. Over the past two decades, Joseph F. Coughlin has been busting myths about aging with groundbreaking multidisciplinary research into what older people actually want -- not what conventional wisdom suggests they need. In *The Longevity Economy*, Coughlin provides the framing and insight business leaders need to serve the growing older market: a vast, diverse group of consumers representing every possible level of health and wealth, worth about \$8 trillion in the United States alone and climbing. Coughlin provides deep insight into a population that consistently defies expectations: people who, through their continued personal and professional ambition, desire for experience, and quest for self-actualization, are building a striking, unheralded vision of longer life that very few in business fully understand. His focus on women -- they outnumber men, control household spending and finances, and are leading the charge toward tomorrow's creative new narrative of later life -- is especially illuminating. Coughlin pinpoints the gap between myth and reality and then shows businesses how to bridge it. As the demographics of global aging transform and accelerate, it is now critical to build a new understanding of the shifting physiological, cognitive, social, family, and psychological realities of the longevity economy.

Spatial Thinking in Environmental Contexts Sandra Lach Arlinghaus, Joseph J. Kerski, Ann Evans Larimore, Matthew Naud, 2019-07-11 Spatial Thinking in Environmental Contexts: Maps,

Archives, and Timelines cultivates the spatial thinking habit of mind as a critical geographical view of how the world works, including how environmental systems function, and how we can approach and solve environmental problems using maps, archives, and timelines. The work explains why spatial thinking matters as it helps readers to integrate a variety of methods to describe and analyze spatial/temporal events and phenomena in disparate environmental contexts. It weaves together maps, GIS, timelines, and storytelling as important strategies in examining concepts and procedures in analyzing real-world data and relationships. The work thus adds significant value to qualitative and quantitative research in environmental (and related) sciences. Features Written by internationally renowned experts known for taking complex ideas and finding accessible ways to more broadly understand and communicate them. Includes real-world studies explaining the merging of disparate data in a sensible manner, understandable across several disciplines. Unique approach to spatial thinking involving animated maps, 3D maps, GEOMATs, and story maps to integrate maps, archives, and timelines—first across a single environmental example and then through varied examples. Merges spatial and temporal views on a broad range of environmental issues from traditional environmental topics to more unusual ones involving urban studies, medicine, municipal/governmental application, and citizen-scientist topics. Provides easy to follow step-by-step instructions to complete tasks; no prior experience in data processing is needed.

Blog Hugh Hewitt, 2006-06-11 Blog is short for Web log?an online site with time-dated postings, maintained by one or more posters, that features links and commentary. That's the most basic definition, but it is like saying a car is a means of transportation featuring four wheels. In *Blog*, syndicated radio talk show host and best-selling author Hugh Hewitt helps you catch up with and get ahead of this phenomenon. Millions of people are changing their habits when it comes to information acquisition, writes Hewitt. This has happened many times before?with the appearance of the printing press, then the telegraph, the telephone, radio, television, and Internet. Now the blogosphere has appeared, and it has come so suddenly as to surprise even the most sophisticated of analysts. If you doubt the influence blogs have in society, think again. Better yet, just ask Senator Trent Lott regarding his comments at Strom Thurmond's birthday celebration. Ask New York Times editor-in-chief Howell Raines about reporter Jayson Blair's fabricated stories. Ask Dan Rather and CBS about President Bush's National Guard documents faxed from a Texas Kinko's. Or ask John Kerry about his battle with Swift Boat veterans. All of these major stories were fully covered by the mainstream media only after their exposure in the blogosphere. Hugh Hewitt [is] the unofficial historian of the blogging movement. ?The Wall Street Journal

Bunker Hill Nathaniel Philbrick, 2014-04-29 The bestselling author of *In the Heart of the Sea*, *Mayflower*, and *In the Hurricane's Eye* tells the story of the Boston battle that ignited the American Revolution, in this masterpiece of narrative and perspective. (Boston Globe) In the opening volume of his acclaimed American Revolution series, Nathaniel Philbrick turns his keen eye to pre-Revolutionary Boston and the spark that ignited the American Revolution. In the aftermath of the Boston Tea Party and the violence at Lexington and Concord, the conflict escalated and skirmishes gave way to outright war in the Battle of Bunker Hill. It was the bloodiest conflict of the revolutionary war, and the point of no return for the rebellious colonists. Philbrick gives us a fresh view of the story and its dynamic personalities, including John Adams, Samuel Adams, John Hancock, Paul Revere, and George Washington. With passion and insight, he reconstructs the revolutionary landscape—geographic and ideological—in a mesmerizing narrative of the robust, messy, blisteringly real origins of America.

Grief Connects Us Joseph D. Stern, 2021-05-11 In his exceptionally thought-provoking and moving memoir, neurosurgeon Joseph D. Stern explores how personal loss influences the way physicians relate to patients and their families. How does a doctor who deals with the death of patients on a regular basis confront his own loss when his beloved sister is living out her last days? Despite a career as a neurosurgeon, Joseph Stern learned more about the nature of illness and death after his younger sister, Victoria, developed leukemia than his formal medical training ever taught him. Her death broke down the self-protective barriers he had built to perform his job and led to a profound shift in his approach to medicine. During the year of his sister's illness, Dr. Stern developed a greater awareness of the needs of patients and their families; of the burdens they carry; of the importance of connection, communication, and gratitude; and of what it means to ask the right questions. *Grief Connects Us* bridges the gap between patients and doctors, providing a window into their shared concerns. Interspersing reflections from Victoria's journal, stories of patients and colleagues, and insights from experts, Dr. Stern has orchestrated a symphony of voices guiding us toward greater mutual understanding and appreciation of the beauty and fragility of life. No matter which side of the patient-doctor relationship you find yourself on, listening with empathy, a willingness to be vulnerable, and emotional agility are skills we can all develop to improve how we meet difficult, unavoidable challenges.

The Wonderful World of Joseph McCrumble Mark Booth, 2006-11 The Wonderful World of Joseph McCrumble' is a highly entertaining, but occasionally tragic, insight into the life and times of Dr Joseph McCrumble; an erstwhile yet quietly charismatic scientist-artist who is thrust into the world of

celebrity after consulting on a doomed reality-TV programme. Writing in his on-line diary, Dr McCrumble sets out to simply enlighten the public to his valuable work on parasites of both animals and humans, undertaken at the now infamous Cumbernauld Institute of Parasitology (location undisclosed, but definitely nowhere near the Scottish new town of Cumbernauld). Unfortunately, events soon take a turn for the worse, and we begin a tumultuous adventure with more twists and turns than an amateur plumbing convention. On the lighter side, there's kleptomania, kidnapping, nocturnal clinches with naked strangers, unexpected pregnancy and imprisonment. All these escapades involve his family and colleagues, whose gamut of quirks and idiosyncrasies can only be described as 'colourful.' A more life-threatening aspect of the author's life is seen when his diary takes us on precarious journeys to the wildlife parks of East Africa, the blustery highlands of Scotland, and the dark, ominous jungles of Papua New Guinea - a place where Dr McCrumble has experiences that even Joseph Conrad (author: *The Heart of Darkness*) would balk at. Despite the plethora of tragicomic events that Dr McCrumble has to endure, he maintains his philanthropic ethos and insists that a large slab of the profits of this book, his self-declared magnum opus, be shared between the Matangini Project (a charitable venture supporting community projects in East Africa), and Children In Need. Note: This edition of the diary also contains a 70 page story called 'Five Days in Denver' - an entirely fictional and racy account of scientists behaving badly at a scientific conference.
