Your Customer Rules! Bill Price, David Jaffe, 2014-11-13 What you need to know about your customers Now more than ever, every interaction you have with customers is critical. Customers today have unlimited information at their fingertips—and can influence the purchase decisions and behaviors of millions of others. With this comes a shift in the balance of power, and every company must come to terms with the fact that the customer is in control. Interacting with customers in the way they want is an essential business strategy and in many industries, the key to business success. Executives still refer to B2B and B2C business models, as though companies control demand by going to customers with products and services. But as Bill Price and David Jaffe (authors of *The Best Service is No Service*) show, a new business model is emerging in which the customer directs the relationship. It is becoming a world of Me2B—one in which the customer, not the business, dictates the terms of engagement. In order for your business to thrive, you must create positive experiences to fulfill a range of customer needs. Though the mediums for customer engagement continuously evolve, Price and Jaffe show that customer needs remain unchanging. In *Your Customer Rules!*, they define a critical hierarchy of seven needs that your company can meet and apply as a methodology. Throughout this practical guidebook, Price and Jaffe share examples of companies who succeed by meeting these seven needs, including Amazon, Apple, IKEA, Nordstrom, USAA, Shoes of Prey, Vente-Privee, and Yamato Transport, as well as those that didn't. *Your Customer Rules!* offers tailored advice for companies at every stage, from nimble startups to legacy firms with established customer service practices—and everyone in between. With a simple, elegant solution for driving lasting value for customers, *Your Customer Rules!* is a clear guide for strengthening customer relationships and competing on more than price. It is essential reading for executives at all levels—business owners, marketing managers, and anyone who works directly with customers.

Computer-Aided Design of User Interfaces V Gaëlle Calvary, Costin Pribeanu, Giuseppe Santucci, Jean Vanderdonckt, 2007-10-05 This book gathers the latest experience of experts, research teams and leading organizations involved in computer-aided design of user interfaces of interactive applications. This area investigates how it is desirable and possible to support, to facilitate and to speed up the development life cycle of any interactive system. In particular, it stresses how the design activity could be better understood for different types of advanced interactive systems.

Interactive TV Standards Steven Morris,Anthony Smith-Chaigneau,2012-08-06 For any digital TV developer or manager, the maze of standards and specifications related to MHP and OCAP is daunting-you have to patch together pieces from several standards to gather all the necessary knowledge you need to compete worldwide. The standards themselves can be confusing, and contain many inconsistencies and missing pieces. Interactive TV Standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer. Understanding what the APIs do is essential for your job, but understanding how the APIs work and how they relate to each other at a deeper level helps you do it better, faster and easier. Learn how to spot when something that looks like a good solution to a problem really isn't. Understand how the many standards that make up MHP fit together, and implement them effectively and quickly. Two DVB insiders teach you which elements of the standards that are needed for digital TV, highlight those elements that are not needed, and explain the special requirements that MHP places on implementations of these standards. Once you've mastered the basics, you will learn how to develop products for US, European, and Asian markets--saving time and money. By detailing how a team can develop products for both the OCAP and MHP markets, Interactive TV Standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical, related standards. Does the team developing a receiver have all the knowledge they need to succeed, or have they missed important information in an apparently unrelated standard? Does an application developer really know how to write a reliable piece of software that runs on any MHP or OCAP receiver? Does the broadcaster understand the business and technical issues well enough to deploy MHP successfully, or will their project fail? Increase your chances of success the first time with Interactive TV Standards.
