**Women and Pressure** Caroline E. Fife,Marguerite St. Leger Dowse,2010-01-01 Women and Pressure is a remarkable look at women's progress in the fields of diving and altitude. With content ranging from the history of women divers, combat pilots, and astronauts to the unique physiological

characteristics of females working and playing in altered barometric pressure environments, this book is long overdue. Featuring contributions from 35 authors, many of whom are pioneers in their field, it represents a wide range of disciplines and offers a comprehensive dialogue about the effects of pressure on women. This book is a must-read for women divers, dive instructors, men who dive with women, and anyone involved in these fields. As an admirable collection of the current research and attitudes regarding the most frequent concerns of divers, instructors, and aviators, topics are explored on a level of seriousness and urgency. The essays included in this text contain crucial discussions of such relevant factors as: pregnancy, the menstrual cycle and decompression illness, decompression illness susceptibility compared with men, fitness to dive, thermal tolerance, equipment, legal issues, and women in the workplace. The pool of information in this book displays the serious nature of a text addressing the past, present, and future of issues of consequence in relation to the well-being of the women involved. From the Foreword: It is obviously important to have a good understanding of how women's physical and psychological responses might differ from those experienced by men. I believe that this book is a scholarly attempt to answer these questions, and I hope that it will make a valuable contribution to the health and welfare of women engaged in these highly specialized occupations. -HRH Prince Philip, Duke of Edinburgh Over the years, different data, theories, and hypotheses have been proffered, but there has never been an authoritative compendium on these issues. . . This is perhaps the only work in existence that, in one place, provides physicians, physiologists, and other interested dive and aerospace professionals with what's broadly known about the subject of women in diving and aerospace. -Karl Shreeves, The Undersea Journal, 2010 Proceeds from this book will go to the Diving Diseases Research Center to support further diving research.

*Making the Revolution Global* Theo Williams, 2022-10-18 How black radicals reshaped the British left *Making the Revolution Global* shows how black radicals transformed socialist politics in Britain in the years before decolonisation. African and Caribbean activist-intellectuals, such as Amy Ashwood Garvey, C.L.R. James, Jomo Kenyatta, Kwame Nkrumah and George Padmore, came to Britain during the 1930s and 1940s and intervened in debates about capitalism, imperialism, fascism and war. They consistently argued that any path towards international socialism must have colonial liberation at its heart. Although their ideas were met with opposition from many on the British Left, they convinced significant sections of the movement of the revolutionary potential of colonised peoples. By centring the entanglements between black radicals and the wider British socialist movement, Theo Williams casts new light on responses to the 1935 Italian invasion of Ethiopia, the 1945 Fifth Pan-African Congress, and a wealth of other events and phenomena. In doing so, he showcases a revolutionary tradition that, as illustrated by the global Black Lives Matter demonstrations of 2020, is still relevant today.

*The Impact of the Spanish Civil War on Britain* Tom Buchanan, 2006-11-27 Explores the relationship between Britain and the Spanish Civil War. This book explains the war's legacy and longer-term impact on Britain, and presents a chronological progression from the Civil War to the post-war Franco era. It also provides a discussion of the importance of loss and memory.
