The Process of Stratification Robert M. Hauser, David L. Featherman, 2013-09-03 The Process of Stratification: Trends and Analyses discusses the conceptual scheme developed by Blau and Duncan. The book elaborates Blau and Duncan's description and analysis of socioeconomic inequality, stratification, and inequality of opportunity in American society during the early 1960s. The authors review the assumptions and methods; they point to a different direction from the widely held assumption that occupational socioeconomic status is the primary determinant to mobility. They also use the Alphabetical Index as the basis for better collection method on data relating to occupation, industry and class of worker. As regards occupational mobility, the authors note that such mobility is limited by the depletion of occupational groups that higher-status occupations have sourced from. They also point that American society is homogenous in the sense of the determinants of socioeconomic achievements can exert influence. The authors then discuss an exercise in theory construction of intergenerational transmission of income. They conclude that income mobility is similar to occupational or educational mobility; to be more precise, they note that empirical evidence should be gathered. This book can prove useful for economists, sociologists, policy makers, as well as academicians involved in societal studies.

The Papers of Thomas Jefferson, Volume 25 Thomas Jefferson, 2018-06-05 The dramatic escalation in the conflict between Thomas Jefferson and Alexander Hamilton to determine the future course of the new American nation is the main theme of this volume. Under pressure from other Republicans, Jefferson decides to continue as Secretary of State instead of retiring to Monticello at the end of President Washington's first term. At the same time he begins to play a more active role as a Republican party leader, involving himself secretly in a major effort by House Republicans to have Hamilton dismissed from office by censuring his management of public finances. France's declaration of war on Great Britain and the Netherlands leads Jefferson into a serious conflict with Hamilton over how to protect American neutrality in the face of the widening European war. After persuading Washington to preserve the treaties of alliance and commerce with France, Jefferson must then confront the first in a series of French violations of American neutrality that will sorely test the relationship between the two republics. Testifying to the catholicity of Jefferson's interests, this volume also deals with his efforts to promote a voyage of western exploration by the noted French botanist Andr Michaux, his observation of the first manned

balloon flight in America by the celebrated French aeronaut Jean Pierre Blanchard, and his concern for expediting work on the new national capital.

Introduction to Computers for Healthcare Professionals Irene Makar Joos, Marjorie J. Smith, Ramona Nelson, 2010-10-25 Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved. These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments. While intellectually charming and often elegantly formulated, that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological, and the policy prescriptions derived from it are fatally teleological: low-income countries are by definition those where such ingredients are missing. None of today's high-income countries started its growth process with the required and complete list of growth ingredients. Unless one truly believes that the

continent of Africa-and most developing countries-are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism, the conventional view must be re-examined, debated, and questioned. This volume-the second of the Oxford Handbook of Africa and Economics-aims at reassessing the economic policies and practices observed across the continent since independence. It offers a collection of analyses by some of the leading economists and development thinkers of our time, and reflects a wide range of perspectives and viewpoints-even on the same topic. Africa's emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book.

Serengeti IV Anthony R. E. Sinclair,Kristine L. Metzger,Simon A. R.

Mduma,John M. Fryxell,2015-05-11 The vast savannas and great migrations of the Serengeti conjure impressions of a harmonious and balanced ecosystem. But in reality, the history of the Serengeti is rife with battles between human and non-human nature. In the 1890s and several times since, the cattle virus rinderpest—at last vanquished in 2008—devastated both domesticated and wild ungulate populations, as well as the lives of humans and other animals who depended on them. In the 1920s, tourists armed with the world's most expensive hunting gear filled the grasslands. And in recent years, violence in Tanzania has threatened one of the most successful long-term ecological

research centers in history. Serengeti IV, the latest installment in a long-standing series on the region's ecology and biodiversity, explores the role of our species as a source of both discord and balance in Serengeti ecosystem dynamics. Through chapters charting the complexities of infectious disease transmission across populations, agricultural expansion, and the many challenges of managing this ecosystem today, this book shows how the people and landscapes surrounding crucial protected areas like Serengeti National Park can and must contribute to Serengeti conservation. In order to succeed, conservation efforts must also focus on the welfare of indigenous peoples, allowing them both to sustain their agricultural practices and to benefit from the natural resources provided by protected areas—an undertaking that will require the strengthening of government and education systems and, as such, will present one of the greatest conservation challenges of the next century.

"An Educated Clergy" Jack C. Whytock, 2008-02-01 Scotland has long been known for its emphasis upon an educated clergy, yet little serious historical attention has been given to how this was actually fostered. This book begins to fill that gap. While a thoroughly historical study in Scottish church history and historical theology, the book also serves as a springboard for reflection and application to the work of theological education today with the evangelical Presbyterian and Reformed community.

Lifelong Education for Adults C.J. Titmus, 2014-06-28 Lifelong Education for

Adults: An International Handbook is the first work intended to offer international, encyclopedic coverage of research and studies in the whole field of adult education. With 127 articles written by international specialists, this work will be an invaluable reference source for all those who are engaged in educational activities for adults, either as full-time planners/administrators of educational programmes, or part-time adult educators. There are, for example, articles on education for work and for living, on population education, peace and environmental education, and on learning for personal development and role fulfilment. Conceptual frameworks, practical issues relating to instructional methods, counselling, curriculum and evaluation, and developments in distance learning, group learning, and adult learning are some of the topics discussed. Systems of adult education worldwide, as well as adult education processes and practices, are covered region by region. The problems and initiatives of the developing countries are given attention alongside those of advanced countries. The collection of articles assembled in this Handbook is unique in the range and depth of treatment given to the field of adult education. This volume will thus be of great interest to all engaged in educational activities for adults, in adult schools, community centres, institutions of higher education, as well as educationalists, planners, and decision-makers throughout the world who are involved in adult education at all levels.
