**Parker Plum and the Rotten Egg Thoughts** Billie Pavicic, 2019-02-01 Parker Plum wakes from a night of slumber to find a little green egg resting on his pillow. How did it get there? Parker doesn't know, and doesn't seem to care. He plops it in his pocket and starts his day... a day that gets worse by the minute. Breakfast is awful, he misses the bus and, worst of all, he has to sit downwind from Dave, a guy who toots all day! Every disappointment gets Parker more upset and makes the egg grow bigger and bigger until it's ginormous. Is this rotten, smelly blob about to explode? Fortunately for Parker, veteran lunch lady Mrs. Butterbott thinks she can defuse the situation. But it totally depends on whether Parker is willing to unscramble all his self-defeating thoughts. Can he? See what happens in this creative and colorful tale from talented author and educator Billie Pavicic.

**Maternal Control of Development in Vertebrates** Florence Louise Marlow, 2010 Eggs of all animals contain mRNAs and proteins that are supplied to or deposited in the egg as it develops during oogenesis. These maternal gene products regulate all aspects of oocyte development, and an embryo fully relies on these maternal gene products for all aspects of its early development, including fertilization, transitions between meiotic and mitotic cell cycles, and activation of its own genome. Given the diverse processes required to produce a developmentally competent egg and embryo, it is not surprising that maternal gene products are not only essential for normal embryonic development but also for fertility. This review provides an overview of fundamental aspects of oocyte and early embryonic development and the interference and genetic approaches that have provided access to maternally regulated aspects of vertebrate development. Some of the pathways and molecules highlighted in this review, in particular, Bmps, Wnts, small GTPases, cytoskeletal components, and cell cycle regulators, are well known and are essential regulators of multiple aspects of animal development, including oogenesis, early embryogenesis, organogenesis, and reproductive fitness of the adult animal. Specific examples of developmental processes under maternal control and the essential proteins will be explored in each chapter, and where known conserved aspects or divergent roles for these maternal regulators of early vertebrate development will be discussed throughout this review. Table of Contents: Introduction / Oogenesis: From Germline Stem Cells to Germline Cysts / Oocyte Polarity and the Embryonic Axes: The Balbiani Body, an Ancient Oocyte Asymmetry / Preparing Developmentally Competent Eggs / Egg Activation / Blocking Polyspermy / Cleavage/ Mitosis: Going Multicellular / Maternal-Zygotic Transition / Reprogramming: Epigenetic Modifications and Zygotic Genome Activation / Dorsal-Ventral Axis Formation before Zygotic Genome Activation in Zebrafish and Frogs / Maternal TGF- $\beta$  and the Dorsal-Ventral Embryonic Axis / Maternal Control After Zygotic Genome Activation / Compensation by Stable Maternal Proteins / Maternal Contributions to Germline Establishment or Maintenance / Perspective / Acknowledgments / References

Egg Drop Mini Grey,2012-06-27 Now for something completely different from Mini Grey! A mother hen tells her chicks about the egg that wanted to fly. "The egg was young. It didn't know much. We tried to tell it, but of course it didn't listen." The egg loves looking up at the birds (yes, it has eyes). It climbs 303 steps (yes, it has legs) to the top of a very tall tower—and jumps. It feels an enormous egg rush. "Whee!" it cries. "I am flying!" But it is not flying, it is falling. Hold your tears, dear reader—there is a sunny ending for this modern-day Humpty Dumpty. Impossible to categorize, Egg Drop is Mini Grey at her zaniest.

Will we conquer disease, resurrect extinct species, develop superior plants and animals, create DNA-edited babies, and even spawn other intelligent beings? Human Expansionism Is it our manifest destiny to colonize Mars and extend the human race beyond the limits of our solar system? How will technologies like space travel, new materials, and nanotech transform our civilization and open up new horizons we never imagined possible? Deep Automation As our machines become capable enough to do every job better, faster, and cheaper, how will this affect society? Will we wind up delegating our most important decisions to data crunching algorithms? And does this mean our machines will end up running our economies, our corporations, and even our lives? Intelligence Explosion As soon as we create a superintelligence that far surpasses human capabilities, what will happen to us? Will we be able to control our machines, or will they eventually control us? Are we headed for a paradise of plenty, where our technology eliminates hunger, disease, poverty, and war? Or will this be the end of our reign as the rulers of the planet?
