A Guide to the Indian Tribes of the Pacific Northwest Robert H. Ruby,John A. Brown,Cary C Collins,2013-02-27 The Native peoples of the Pacific Northwest inhabit a vast region extending from the Rocky Mountains to the Pacific Ocean, and from California to British Columbia. For more than two decades, A Guide to the Indian Tribes of the Pacific Northwest has served as a standard reference on these diverse peoples. Now, in the wake of renewed tribal self-determination, this revised edition reflects the many recent political, economic, and cultural developments shaping these Native communities. From such well-known tribes as the Nez Perces and Cayuses to lesser-known bands previously presumed extinct, this guide offers detailed descriptions, in alphabetical order, of 150 Pacific Northwest tribes. Each entry provides information on the history, location, demographics, and cultural traditions of the particular tribe. Among the new features offered here are an expanded selection of photographs, updated reading lists, and a revised pronunciation guide. While continuing to provide succinct histories of each tribe, the volume now also covers such contemporary—and sometimes controversial—issues as Indian gaming and NAGPRA. With its emphasis on Native voices and tribal revitalization, this new edition of the Guide to the Indian Tribes of the Pacific Northwest is certain to be a definitive reference for many years to come.

The Company Town John S. Garner,1992 Company towns - those associated with textiles, mining, or tool manufacturing, for example - are found worldwide and have been in existence for many centuries. But with the coming of the Industrial Revolution, what had been isolated instances of town building became a veritable phenomenon. With explosive growth, virtually hundreds of them appeared in the Western World until about the time of the Great Depression, with development most intensive and homogenous in Europe and the Americas. Although the technological experience of the Industrial Revolution has been widely chronicled and the stories of misplaced banking and exploited labor well documented, until now the actual settings of company towns and the overall achievement in industrial architecture and town planning have been largely ignored. The Company Town describes the concurrent development and building of selected towns in Europe and the Americas, assessing technical advances in factory building, worker housing, and the public buildings that owner-industrialists, in their capacity as philanthropists, bestowed upon such towns. In many instances, the company town came to symbolize the wrecking of the environment, especially in places associated with extractive industries such as mining and lumber milling. Some resident industrialists, however, took a genuine interest in the welfare of their work forces, and in a number of instances hired architects to provide a model environment. Overtaken by time, these towns were either abandoned or caught up in suburban growth. The most thorough-going and only international assessment of the company town, this collection of essays by specialists and authorities of each region offers a balancedaccount of architectural and social history and provides a better understanding of the architectural and urban experiences of the early industrial age.

Media Crossroads Paula J. Massood,Angel Daniel Matos,Pamela Robertson Wojcik,2021-02-08 The contributors to Media Crossroads examine space and place in media as they intersect with sexuality, race, ethnicity, age, class, and ability. Considering a wide range of film, television, video games, and other media, the authors show how spaces—from the large and fantastical to the intimate and virtual—are shaped by the social interactions and intersections staged within them. The highly teachable essays include analyses of media representations of urban life and gentrification, the ways video games allow users to adopt an experiential understanding of space, the intersection of the regulation of bodies and spaces, and how style and aesthetics can influence intersectional thinking. Whether interrogating the construction of Portland as a white utopia in Portlandia or the link between queerness and the spatial design and gaming mechanics in the Legend of Zelda video game series, the contributors deepen understanding of screen cultures in ways that redefine conversations around space studies in film and media. Contributors. Amy Corbin, Desirée J. Garcia, Joshua Glick, Noelle Griffis, Malini Guha, Ina Rae Hark, Peter C. Kunze, Paula J. Massood, Angel Daniel Matos, Nicole Erin Morse, Elizabeth Patton, Matthew Thomas Payne, Merrill Schleier, Jacqueline Sheean, Sarah Louise Smyth, Erica Stein, Kirsten Moana Thompson, John Vanderhoef, Pamela Robertson Wojcik
