Cyborg Steve Mann, Hal Niedzviecki, 2001 Steve
Mann is a cyborg. He sees the entire world,
including himself, through a video lens--the
WearComp system. He can control what he sees,
liberating his imaginative space from the visual
stimuli-billboards and flashing neon signs--that
threaten to overwhelm us. While recognizing the
danger that human beings could be controlled by
technology and the corporations that produce it
for profit, Mann is also fascinated by the vast
possibilities presented by the wearable computer--

Adventures of an Apple Founder Ronald
Wayne, 2011-07-01 There is much more to the story
of Ron Wayne than his brief involvement with the
Apple Computer Company (before it re-formed as
Apple Computer Inc.). In the spring of 1976 while
working as chief draftsman and product development
engineer at the video game maker Atari, Ron
assisted a co-worker with the subtle intricacies
of forming a small business. It was with Ron's
natural sensibilities, experiences, and skills
honed over a lifelong career in many disciplines
that he offered himself openly as a resource to
two much-younger entrepreneurs: Steve Jobs & Steve
Wozniak. These same traits would drive Ron's

decision to leave a short time later. It is one of life's profound realities that people rarely recognize history while they are in the midst of making it. The events that transpired that spring would come to define such a case. *Adventures of an Apple Founder* offers insight into the experiences that define the man whose passion for engineering and design spans over three quarters of a century, half a dozen industries, and a lifetime of adventures!

Video Games Around the World Mark J. P.

Wolf, 2015-05-01 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories

appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations. Africa • Arab World • Argentina • Australia • Austria • Brazil • Canada • China • Colombia • Czech Republic • Finland • France • Germany • Hong Kong • Hungary • India • Indonesia • Iran • Ireland • Italy • Japan • Mexico • The Netherlands • New Zealand • Peru • Poland • Portugal • Russia • Scandinavia • Singapore • South Korea • Spain • Switzerland • Thailand • Turkey • United Kingdom • United States of America • Uruguay • Venezuela

Fools Rush In Nina Munk, 2009-10-13 Every era has its merger; every era has its story. For the New Media age it was an even bigger disaster: the AOL-Time Warner deal. At the time AOL and Time Warner were considered a matchless combination of old media content and new media distribution. But very soon after the deal was announced things started to go bad—and then from bad to worse. Less than four years after the deal was announced, every significant figure in the deal –save the politically astute Richard Parsons–has left the company, along with scores of others. Nearly a \$100 billion was written off and a stock that once traded at \$100 now trades near \$10. What happened?

Where did it all go wrong? In this deeply sourced and deftly written book, Nina Munk gives us a window into the minds of two of the oddest men to ever run billion-dollar empires. Steve Case, the boy wonder who built AOL one free floppy disk at a time, was searching for a way out of the New Economy. Meanwhile Jerry Levin, who'd made his reputation as a visionary when he put HBO on satellite distribution, was searching for a monumental deal. These two men, more interested in their place in history than their personal fortunes, each thought they were out-smarting the other.
