Flirting with Fire Kate Meader,2015-03-24 The first installment in Hot in Chicago, a brand-new, sizzling series from Kate Meader that follows a group of firefighting foster siblings and their blazing hot love interests! Savvy PR guru Kinsey Taylor has always defined herself by her career, not her gender. That is, until she moved from San Francisco to Chicago to be with her fiancé who thought she wasn't taking her "job" of supporting him in his high-powered career seriously enough—and promptly dumped her for a more supportive and "feminine" nurse. Now, as the new assistant press secretary to Chicago's dynamic mayor, she's determined to keep her eye on the prize: no time to feel inferior because she's a strong, kick-ass woman, and certainly no time for men. But that all changes when she meets Luke Almeida, a firefighter as searingly sexy as he is quick-tempered. He's also the second oldest of the Firefightin' Dempseys, a family of foster siblings who have committed their lives to the service—if Luke's antics don't get him fired first. When Luke goes one step too far and gets into a bar brawl with the Chicago Police Department, Kinsey marches into Luke's firehouse and lays down the law on orders from the mayor. But at Engine Co. 6, Luke Almeida is the law. And he's not about to let Kinsey make the rules.

Simple Algebras, Base Change, and the Advanced Theory of the Trace Formula James Arthur,Laurent Clozel,1989-06-21 A general principle, discovered by Robert Langlands and named by him the functoriality principle, predicts relations between automorphic forms on arithmetic subgroups of different reductive groups. Langlands functoriality relates the eigenvalues of Hecke operators acting on the automorphic forms on two groups (or the local factors of the automorphic representations generated by them). In the few instances where such relations have been probed, they have led to deep arithmetic consequences. This book studies one of the simplest general problems in the theory, that of relating automorphic forms on arithmetic subgroups of $GL(n,E)$ and $GL(n,F)$ when E/F is a cyclic extension of number fields. (This is known as the base change problem for $GL(n)$.) The problem is attacked and solved by means of the trace formula. The book relies on deep and technical results obtained by several authors during the last twenty years. It could not serve as an introduction to them, but, by giving complete references to the published literature, the authors have made the work useful to a reader who does not know all the aspects of the theory of automorphic forms.

Godfather Death Brothers Grimm,2020-10-05 A poor man meets a dead end when he cannot decide on a godfather for his thirteenth child. He sees first the Lord but he does not think He will be a suitable godfather. Then he meets the Devil but this option does not suit him. The last one is the Death. The father finally decides. The Death treats equally both rich and poor so he will be the perfect godfather for his son. The gift that the Death gives to his godson is the power of seeing if a person can be cured or not. The gift is however to be used reasonably because otherwise it may lead to greater dangers. Will the thirteenth child follow his godfather's words or he will try to trick him? What will follow? Find out in Godfather Death.

British Battleship Vs German Battleship Angus Konstam, 2020-12-22 This book uses the latest historical and marine archeological research to present a novel, comparative exploration of an ever-popular subject: the epic clashes of British and German surface battleships during World War II. At the outbreak of World War II, the four key Capital German ships comprised the Bismarck, Tirpitz, Scharnhorst, and Gneisenau. Their primary

threats where the Royal Navy's King George V class battleships, the most modern British battleships in commission during World War II and some of the Navy's most powerful vessels. Five ships of this class were built: HMS King George V, Prince of Wales, Duke of York, Howe (late 1942) and Anson (late 1942). The powerful vessels in this class would clash with the pride of the Kriegsmarine in two major engagements: first, during the Battle of the Denmark Strait and subsequent pursuit of the Bismarck between 24 and 27 May 1941, and again at the Battle of the North Cape on 26 December 1943. Alongside the King George V class, the Royal Navy's two-ship Nelson-class (Nelson and Rodney), comprised Britain's only other battleships built in the interwar years. Both ships served extensively in the Atlantic, Mediterranean, and Indian oceans during the war, but their moment of fame came when Rodney (together with King George V) chased down and bombarded the doomed Bismarck in May 1941. This superbly detailed addition to the Duel series compares and contrasts the design and development of these opposing capital ships, and describes the epic clashes on the high seas that ended with the destruction of the Kriegsmarine's major naval assets.

They both dreamed about the thrill of adventure and discovery, yet the driving force behind those desires couldn't have been more different. Set in the present day Middle East, two American graduate students are completing their archaeology studies. While on a desert excursion they come across an artifact that leads them on a frantic search for one of mankind's great mysteries. While one man grows, the other suffers through a series of self-destructive choices and decisions as their adventures take them across the ancient holy land. A series of unexpected twists and turns adds to the challenge, leading to a stunning revelation with world-wide impact.

Unsolved Mysteries of the Past Reader's Digest, 1991-01-01 The ancients live on today in the lasting monuments they left behind: How they, with their limited technology, could have built them is a mystery that modern science has yet to unravel. In their world the boundaries of the unknown were thinner and more easily crossed.
