The Birds World Nicolae Sfetcu,2014-11-27 Birds are among the most extensively studied of all animal groups. Hundreds of academic journals and thousands of scientists are devoted to bird research, while amateur enthusiasts (called birdwatchers or, more commonly, birders) probably number in the millions. Birds are categorised as a biological class, Aves. The earliest known species of this class is Archaeopteryx lithographica, from the Late Jurassic period. According to the most recent consensus, Aves and a sister group, the order Crocodilia, together form a group of unnamed rank, the Archosauria. Phylogenetically, Aves is usually defined as all descendants of the most recent common ancestor of modern birds (or of a specific modern bird species like Passer domesticus), and Archaeopteryx. Modern phylogenies place birds in the dinosaur clade Theropoda. Modern birds are divided into two superorders, the Paleognathae (mostly flightless birds like ostriches), and the wildly diverse Neognathae, containing all other birds.

Foundations of Economic Analysis of Law Steven Shavell,2009-07-01 What effects do laws have? Do individuals drive more cautiously, clear ice from sidewalks more diligently, and commit fewer crimes because of the threat of legal sanctions? Do corporations pollute less, market safer products, and obey contracts to avoid suit? And given the effects of laws, which are socially best? Such questions about the influence and desirability of laws have been investigated by legal scholars and economists in a new, rigorous, and systematic manner since the 1970s. Their approach, which is called economic, is widely considered to be intellectually compelling and to have revolutionized thinking about the law. In this book Steven Shavell provides an in-depth analysis and synthesis of the economic approach to the building blocks of our legal system, namely, property law, tort law, contract law, and criminal law. He also examines the litigation process as well as welfare economics and morality. Aimed at a broad audience, this book requires neither a legal background nor technical economics or mathematics to understand it. Because of its breadth, analytical clarity, and general accessibility, it is likely to serve as a definitive work in the economic analysis of law.

Economic Analysis of Accident Law Steven Shavell,2009-06-30 Accident law, if properly designed, is capable of reducing the incidence of mishaps by making people act more cautiously. Scholarly writing on this branch of law traditionally has been concerned with examining the law for consistency with felt notions of right and duty. Since the 1960s, however, a group of legal scholars and economists have focused on identifying the effects of accident law on people's behavior. Steven Shavell's book is the definitive synthesis of research to date in this new field.

Tux the Penguin Marcile Pinder,2005-05-01 Tux the Penguin is a charming story, in rhyme, of a plump, perky penguin who observed animals, two by two, boarding Noah's Ark, He was very curious so, although alone, he slipped by the crowd and boarded the ark to see what was happening. The book is about the penguin's many antics and interplay with the other animals. Tux finally realized he didn't have a mate and got lonesome. The rest of the story tells how Tux finagled a way to escape after several weeks. Marcile has always loved poetry and been writing for many years. This is her first illustrated children's book. She lives in Bradenton, Florida, with her husband, Sam

She's not as pretty, talented, and business-savvy as her older sister. But she loves volunteering to work with the dogs at Pretty Paws, especially Athena, a Great Dane whose high-anxiety habits make her nearly unadoptable. After her last-chance opportunity to become a vet tech collapses, she takes a job at the call center of HealthNut's competitor, Thetalife Supplements, where she meets the dashing, charming, sweep-you-off-your-feet CEO, Tony Costos. She thinks she may have finally found her Prince Charming and the fairytale life she's always dreamed of. At first, Tony showers her with compliments and gifts. But when he adopts Athena to use as the Thetalife mascot, Eliza finds herself shielding the dog from Tony's temper, and the Great Dane's increasingly anxious behavior mirrors Eliza's own growing unease. Will Athena's friendship give Eliza the courage to stand up to Tony before his dark ambitions destroy everyone she loves? Tuxedo Bob Rob, Susan Hegel,2002-10-07 Tuxedo Bob is a musically talented young man with a unique sense of humor, and an extraordinarily optimistic view of life. His classic black tuxedo illustrates his dedication to good manners and respectful behavior. His instinctive ability to make decisions based on what is right instead of what is convenient astounds the most hardened skeptic. His honesty bewilders the agents, bigots, producers, mobsters, and pessimists who come into his life; the kindness of his heart inspires his friends. Any situation in life is better when experienced in formal attire. Orville Fledsper Armed with a number of his fathers axioms and some off beat songs, Tuxedo Bob travels beyond the horizon of his hometown to seek employment as a songwriter. His demeanor makes him seem nave, but his special way of dealing with the obstacles and situations he encounters on his twenty-three year journey from New York to Las Vegas and Hollywood will make you laugh, and will warm your heart. You will never forget Tuxedo Bob. As an added bonus to this edition, and for your enjoyment, the authors have included all of Tuxedo Bobs song lyrics, and the complete version of his musical screenplay, THE MIRROR OF MR. MOORE.
