Cultural and Literary Representations of the Automobile in French Indochina Stéphanie Ponsavady,2018-08-21 How are the pleasures and thrills of the automobile linked to France's history of conquest, colonialism, and exploitation in Southeast Asia? *Cultural and Literary Representations of the Automobile in French Indochina* addresses the contradictions of the "progress" of French colonialism and their consequences through the lens of the automobile. Stéphanie Ponsavady examines the development of transportation systems in French Indochina at the turn of the twentieth century, analyzing archival material and French and Vietnamese literature to critically assess French colonialism.

Brachytherapy, Second Edition Phillip M. Devlin, MD, FACR,2015-10-14 The only comprehensive guide to the latest knowledge and techniques in brachytherapy Since the first edition was published in 2006, Phillip M. Devlin's *Brachytherapy* has been acknowledged as the essential book on the practice. In this updated new edition, all chapters covering cancer sites have been significantly revised. Organized for specialists in several fields, *Brachytherapy* contains site-specific chapters that discuss how the evolving role of advanced image guidance has demonstrated greater efficacy and less toxicity. Clinical vignettes with images now accompany all site-specific chapters. The chapter on prostate brachytherapy has been expanded to include other indications in the genitourinary system, and there are two entirely new chapters—one chronicling the history of brachytherapy and the other detailing the emergence of skin brachytherapy. Dr. Devlin, a leading world authority on brachytherapy, has assembled other leaders in the field from world-renowned radiation oncology programs to enrich this comprehensive text. From new data on medical outcomes to the costs and benefits of running a brachytherapy practice, *Brachytherapy, Second Edition* is the first and last word on what still is considered the most conformal radiotherapy technique in the field. In the new edition: Over 300 images accompany the chapter text and clinical vignettes Essential tables and spreadsheets enhance the chapter on running a brachytherapy practice Ten years of technological advancements are assimilated and reviewed in each site-specific chapter Includes access to the fully-searchable downloadable ebook From the Foreword: "As education is essential to advance awareness of and proficiency in the full spectrum of brachytherapy applications, the appearance of the second edition of this highly regarded text is both a timely and most welcome event. The distinguished list of contributors to this work reads like a veritable 'Who's Who' of international brachytherapy expertise making this an indispensable resource for students and practitioners of this complex and challenging modality." A particularly welcome feature is the clinical vignettes at the close of every chapter that bring seemingly remote concepts to life in real world practical applications. With the second edition of *Brachytherapy: Applications and Techniques*, Dr. Devlin and colleagues give us a text that instills a profound appreciation for the critical value of this essential modality. This book makes it clear that brachytherapy not only works, it is an irreplaceable component of contemporary cancer care. --David Wazer, MD, FACRO, FACR, FASTRO, Professor and Chairman, Departments of Radiation Oncology, Alpert Medical School of Brown University, Providence,

Unsteady Flow Characteristics in the Near-Wake of a Two-Dimensional Obstacle

National Aeronautics and Space Administration (NASA),2018-08-06 The influence of the characteristics of the boundary layer separation on the formation of vortices and alternate paths in the wake of a bidimensional obstacle at high Reynolds numbers was studied by ultra fast visualization system. It is shown that there are alternate paths for laminar and turbulent flows, with similar flow characteristics. It is found that emission of vortices does not change substantially when the flow passes from laminar to turbulent. A film with a time scale change of 10,000 times illustrates some of the discussed phenomena. Dymont, A. and Gryson, P. Unspecified Center NASA-TM-77762, NAS 1.15:77762, AAAF-NT-79-08 NASW-4006
