Edgar Allan Poe

Eureka Edgar Allan Poe, 2017-04-18 *Eureka* (1848) is a lengthy non-fiction work by American author Edgar Allan Poe (1809–1849) which he subtitled A Prose Poem, though it has also been subtitled as An Essay on the Material and Spiritual Universe. Adapted from a lecture he had presented, *Eureka* describes Poe's intuitive conception of the nature of the universe with no antecedent scientific work done to reach his conclusions. He also discusses man's relationship with God, whom he compares to an author. It is dedicated to the German naturalist and explorer Alexander von Humboldt (1769–1859). Though it is generally considered a literary work, some of Poe's ideas anticipate 20th century scientific discoveries and theories. Indeed a critical analysis of the scientific content of *Eureka* reveals a non-causal correspondence with modern cosmology due to the assumption of an evolving Universe, but excludes the anachronistic anticipation of relativistic concepts such as black holes. *Eureka* was received poorly in Poe's day and generally described as absurd, even by friends. Modern critics continue to debate the significance of *Eureka* and some doubt its seriousness, in part because of Poe's many incorrect assumptions and his comedic descriptions of well-known historical minds. It is presented as a poem, and many compare it with his fiction work, especially science fiction stories such as *The Facts in the Case of M. Valdemar*. His attempts at discovering the truth also follow his own tradition of ratiocination, a term used in his detective fiction tales. Poe's suggestion that the soul continues to thrive even after death also parallels with works in which characters reappear from beyond the grave such as *Ligeia*. The essay is oddly transcendental, considering Poe's disdain for that movement. He considered it his greatest work and claimed it was more important than the discovery of gravity. *Eureka* is Poe's last major work and his longest non-fiction work at nearly 40,000 words in length.

Eureka Edgar Allan Poe, 2011-06-03 *Eureka* is a lengthy non-fiction work by American author Edgar Allan Poe which he subtitled A Prose Poem, though it has also been subtitled as An Essay on the Material and Spiritual Universe. Edgar Allan Poe, (born January 19, 1809, Boston, Massachusetts, U.S.--died October 7, 1849, Baltimore, Maryland), American short-story writer, poet, critic, and editor who is famous for his cultivation of mystery and the macabre. His tale *The Murders in the Rue Morgue* (1841) initiated the modern detective story, and the atmosphere in his tales of horror is unrivaled in American fiction. His *The Raven* (1845) numbers among the best-known poems in the national literature. Poe was the son of the English-born actress Elizabeth Arnold Poe and David Poe, Jr., an actor from Baltimore. After his mother died in Richmond, Virginia, in 1811, he was taken into the home of John Allan, a Richmond merchant (presumably his godfather), and of his childless wife. He was later taken to Scotland and England (1815-20), where he was given a classical education that was continued in Richmond. For 11 months in 1826 he attended the University of Virginia, but his

gambling losses at the university so incensed his guardian that he refused to let him continue, and Poe returned to Richmond to find his sweetheart, (Sarah) Elmira Royster, engaged. He went to Boston, where in 1827 he published a pamphlet of youthful Byronic poems, Tamerlane, and Other Poems. Poverty forced him to join the army under the name of Edgar A. Perry, but, on the death of Poe's foster mother, John Allan purchased his release from the army and helped him get an appointment to the U.S. Military Academy at West Point. Before going, Poe published a new volume at Baltimore, Al Aaraaf, Tamerlane, and Minor Poems (1829). He successfully sought expulsion from the academy, where he was absent from all drills and classes for a week. He proceeded to New York City and brought out a volume of Poems, containing several masterpieces, some showing the influence of John Keats, Percy Bysshe Shelley, and Samuel Taylor Coleridge. He then returned to Baltimore, where he began to write stories. In 1833 his MS. Found in a Bottle won \$50 from a Baltimore weekly, and by 1835 he was in Richmond as editor of the Southern Literary Messenger. There he made a name as a critical reviewer and married his young cousin Virginia Clemm, who was only 13. Poe seems to have been an affectionate husband and son-in-law.

Eurek Edgar Allan Poe, 2011-11 Eureka, A Prose Poem is over 40,000 words in length and it is not a poem! It was Poe's last major work and was based on a lecture Poe presented in 1848, titled On The Cosmography of the Universe. He had hoped for an audience of hundreds and that the proceeds of the lecture would pay for his new journal The Stylus. However, only 60 attended and they went

away confused. In Eureka, Poe explains the universe and the relationship of people with God based on the proposition Because Nothing was, therefore All Things are.

Eureka (Annotated) Edgar Allan Poe, 2015-09-22 To the few who love me and whom I love--to those who feel rather than to those who think--to the dreamers and those who put faith in dreams as in the only realities--I offer this Book of Truths, not in its character of Truth-Teller, but for the Beauty that abounds in its Truth; constituting it true. To these I present the composition as an Art-Product alone: --let us say as a Romance; or, if I be not urging too lofty a claim, as a Poem

Eureka Edgar Allan Poe, 2002 Written only shortly before his death, Eureka is considered by many to be Poe's masterpiece and the key to unlocking his entire writings. Its significance, in both literary and scientific worlds, cannot be underestimated. Turning his immense intellect and remarkable artistic flair to the most challenging concepts of all--that of the creation of the world, its continued existence, and its ultimate end--Poe has created a truly extraordinary work. In his strange blend of poetry and scientific treaty, fact and frenzied speculation, he displays amazing foresight, anticipating some of the key scientific discoveries of the 20th century.

Eureka Edgar Allan Poe, 2020-04-07 In this remarkable work, master story-teller Edgar Allan Poe builds on known scientific truths to propound a universe governed by the immutable laws of attraction and repulsion, i.e., expansion and a return to unity. The irascible, vindictive God of the Old Testament and the Deists' Master Clockmaker are routed by Poe's pantheistic World Spirit who, through the force of expansion, is diffused throughout his creation. Moreover, we humans are all part of this universal spirit and each of us is his own god. Published after his death, as Poe desired, Eureka was based on a lecture Poe presented in 1848, titled On The Cosmography of the Universe. Eureka remains a startlingly different work from the author's more popular offerings.
