**Berlitz Cruising and Cruise Ships 2020 (Travel Guide eBook)**

Berlitz,2019-09-01 If you want a holiday that's hassle-free, virtually pre-paid, and that lets you see lots of places while only needing to pack and unpack once, then you should try a cruise. This best-selling book is the cruise industry bible: it gives you all the information you need to choose the right cruise for you. Meticulously updated every year by cruise expert Douglas Ward, it is divided into two main parts: the first helps you work out what you're looking for in a cruise holiday and how to find it; the lively text and colour photographs describe every aspect of life on board, including safety, the highs and lows of the cruise experience and how to save money. The second part contains unbiased reviews and fascinating detail of almost 300 ocean-going cruise vessels, and grades them on service, food, entertainment and facilities, using an internationally recognised ratings system.

*International Shipping* Ralf Witthohn,2022-11-02 Based on thoroughly researched texts and rare photographs this book describes the actual developments of international shipping and all the facets connected to overseas good flows. Main source for the deep reaching insight into the maritime industry are authentic reports carried out at the focusses of the shipping scene. By explaining the design und purpose of nowadays ship types,

the different ways of cargo handling as well as the activities of shipowners and operators is painted a representative and rich-illustrated picture of the actual maritime scene.

Eurasianism and the European Far Right Marlene Laruelle, 2015-07-01 The 2014 Ukrainian crisis has highlighted the pro-Russia stances of some European countries, such as Hungary and Greece, and of some European parties, mostly on the far-right of the political spectrum. They see themselves as victims of the EU “technocracy” and liberal moral values, and look for new allies to denounce the current “mainstream” and its austerity measures. These groups found new and unexpected allies in Russia. As seen from the Kremlin, those who denounce Brussels and its submission to U.S. interests are potential allies of a newly re-assertive Russia that sees itself as the torchbearer of conservative values. Predating the Kremlin’s networks, the European connections of Alexander Dugin, the fascist geopolitician and proponent of neo-Eurasianism, paved the way for a new pan-European illiberal ideology based on an updated reinterpretation of fascism. Although Dugin and the European far-right belong to the same ideological world and can be seen as two sides of the same coin, the alliance between Putin’s regime and the European far-right is more a marriage of convenience than one of true love. This unique book examines the European far-right’s connections with Russia and untangles this puzzle by tracing the ideological origins and individual paths that have materialized in this permanent dialogue between Russia and

Europe.

**Scientific and Technical Aerospace Reports** ,1976 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

**History of the Space Shuttle, Volume Two** T. A. Heppenheimer,2014-09-30 Basing his work on virtually untapped NASA archives, T. A. Heppenheimer has produced the second volume of his definitive history of the space shuttle. Volume Two traces the development of the shuttle through a decade of engineering setbacks and breakthroughs, program-management challenges, and political strategizing, culminating in the first launch in April 1981. The focus is on the engineering challenges—propulsion, thermal protection, electronics, onboard systems—and the author covers in depth the alternative vehicles developed by the U.S. Air Force and European countries. The first launch entailed a monumental amount of planning and preparation that Heppenheimer explains in detail.

*Payload and Mission Definition in Space Sciences* A. Aparicio,F. Sánchez,2005-11-17 A text intended for scientists and engineers involved in the definition and development of space science missions.

**Soldiers, Traders, and Slaves** Janet Ewald,1990 In the Nuba Hills, on the frontiers of the Islamic Sudan, a dynasty of Muslim warrior kings arose in

the eighteenth century. Their kingdom, Taqali, survived as an independent state, resisting conquest by larger empires, and coming under external control only during the twentieth century. Janet Ewald has written the first comprehensive account of the origins and development of the Taqali kingdom. Ewald shows how events originating far beyond the Taqali massif allowed local Muslim soldiers to become kings of the Taqali in the eighteenth century and then to hold on to their power. But the nature of that power was shaped by the highland farmers who stubbornly and largely successfully resisted the efforts of the kings to parlay their control over the means of production. In this struggle religion became an ideological weapon on both sides, as the Taqali farmers asserted their local beliefs against their Muslim rulers. Political confrontations also bore unintended economic consequences. Ewald's account of Taqali challenges current views on the impact of Islam, merchant capitalism, and Egyptian military administration in nineteenth-century Sudan.

**Atlas of the Netherlands Flora** J. Mennema, A.J. Quene-Boterbrood, C.L. Plate, 2013-12-11 There is an element of fascination which many people feel about geographical maps, because these maps allow fantasies about strange landscapes, other peoples, travels, even adventures. Distribution maps, depicting the area which a plant (or animal) species occupies, would appear to be less romantic, but they are equally able to exercise our imagination, or rather: to stimulate our scientific curiosity. Some distribution patterns are repeated time and time again, although rarely fully identical, and with

their study comes the inescapable question: what is it that determines a plant's area of distribution? Almost immediately we find ourselves in the area of ecology, for it is the plant's demands of its environment (climate, soil) which determines where it will be able to grow and where not. However, that is not all there is to it, for species as well as landscapes have their history, and one needs to be informed about the climate and about the distribution of land and sea in the past, for instance, before one can understand present distributions. This aspect of change in space and time (historical plant geography) is possibly the most fascinating part of plant geography. However this atlas, covering a minuscule part of the world, is not meant to be primarily a book of historical plant geography. It is true that a dynamic aspect is very prominent, but this is on the smaller time-scale of man-made changes, which mostly led to impoverishments.

*Transatlantic Space Politics* Sheng-Chih Wang, 2013-05-29 This book examines transatlantic politics through an analysis of 60 years of US-European strategic interaction in space. The significance of space politics for the study of transatlantic relations receives surprisingly little scholarly attention. As a theatre of interaction, transatlantic space politics reflects

the vicissitudes of European and US power in the international system. An understanding of space politics is therefore vital in understanding the status and prospect of the transatlantic order. Using established IR theories, the author investigates transatlantic space politics and proposes a theoretical explanation, which is distinct from the conventional wisdom of the transatlantic security community. More specifically, he distinguishes between the constitutive and regulatory effects of the transatlantic security community, an approach rarely employed in other research in the field. Overall, this book suggests not only that the transatlantic institutional pillar requires repair, but also that the ideational factors need to be revitalised in order to consolidate the transatlantic alliance. This book will be of much interest to students of space power, transatlantic politics, strategic studies, foreign policy and IR/security studies in general.

*The European Garden Flora Flowering Plants* James Cullen, Sabina G. Knees, H. Suzanne Cubey, J. M. H. Shaw, 2011-08-11 The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental flowering plants. Designed to meet the highest scientific standards, the vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed gardener as well as to the professional botanist. This new edition has been thoroughly reorganised and revised, bringing it into line with modern taxonomic knowledge. Although European in name, the Flora covers plants cultivated in most areas of the

United States and Canada as well as in non-tropical parts of Asia and Australasia. Volume 1 contains accounts of all the Monocotyledons, which includes those groups known informally as the 'petaloid monocotyledons' (the Liliaceae and Amaryllidaceae in the first edition, divided here among 17 families), the grasses and sedges (Gramineae and Cyperaceae), the aroids (Araceae) and the large and diverse Orchidaceae.

Against Redemption Franco Baldasso, 2022-12-06 Discloses the richness of ideas and sheds light on the controversy that characterized the transition from fascism to democracy, examining authors, works and memories that were subsequently silenced by Cold War politics. How a shared memory of Fascism and its cultural heritage took shape is still today the most disputed question of modern Italy, crossing the boundaries between academic and public discourse. Against Redemption concentrates on the historical period in which disagreement was at its highest: the transition between the downfall of Mussolini in July 1943 and the victory of the Christian Democrats over the Left in the 1948 general elections. By dispelling the silence around the range of opinion in the years before the ideological struggle fossilized into Cold War oppositions, this book points to early postwar literary practices as the main vehicle for intellectual dissent, shedding new light on the role of cultural policies in institutionalizing collective memory. During Italy's transition to democracy, competing narratives over the recent traumatic past emerged and crystallized, depicting the country's break with Mussolini's

regime as a political and personal redemption from its politics of exclusion and unrestrained use of violence. Conversely, outstanding authors such as Elsa Morante, Carlo Levi, Alberto Moravia, and Curzio Malaparte, in close dialogue with remarkable but now-neglected figures, stressed the cultural continuity between the new democracy and Fascism, igniting heated debates from opposite political standpoints. Their works addressed questions such as the working through of national defeat, Italian responsibility in World War II, and the Holocaust, revealing how the social, racial, and gender biases that characterized Fascism survived after its demise and haunted the newborn democracy.

**Liderazgo, empresa y deporte** Juan Carlos Cubeiro, Leonor Gallardo, 2008-05  
¿Qué tienen en común el seleccionador nacional de baloncesto y el director general de Inditex? Aunque a simple vista pudiera parecer que más bien poco, un análisis más profundo revela multitud de paralelismos entre los que, quizá, el más significativo sea que ambos dirigen equipos ejerciendo (y gestionando) el liderazgo con el objetivo de alcanzar la excelencia (se refleje ésta en una cuenta de resultados o en un campeonato olímpico). Partiendo de las similitudes (y también de las diferencias) entre el ámbito del deporte de alta competición y el mundo de la alta gestión, Juan Carlos Cubeiro y Leonor Gallardo desarrollan un estudio conciso y ameno, repleto de referencias a casos reales y cercanos de deportistas de éxito (Fernando Alonso, Rafa Nadal, el Sevilla C.F., etc.) y de empresas y empresarios

igualmente reconocidos (Microsoft, Inditex...) de los que extraen valiosas lecciones que se pueden aplicar en nuestro día a día en la búsqueda de esa excelencia. Descriptivo y formativo, Liderazgo, empresa y deporte, puede leerse desde el punto de vista del deportista o del gestor pues ofrece claves esenciales que permitirán tanto a uno como a otro alcanzar el oro en la gestión y obtener dividendos tangibles en el deporte.

Stern's Guide to the Cruise Vacation: 20/21 Edition Steven B.

Stern,2019-09-26 "The extent of detail given . . . is good not only for the novice cruiser finding their way around . . . but also for the veteran cruiser who wants to know the latest about the newest ships." "This is the book with which to gain a full and thorough understanding of the wonderful world of cruising. Repeat cruisers and novices alike will gain from the volume of features, menus, daily schedules, photos, as well as details on every cruise ship and port of call throughout the world. This should be the encyclopedia for any cruise aficionado" (World of Cruising). "People who've never cruised before or those who have but find themselves faced with a confusing onslaught of new ships need to know a great deal, and this book goes a long way in providing it" (Chicago Tribune). "Stern's Guide to the Cruise Vacation is one of the most comprehensive authorities and a must-have for both the novice and the seasoned cruiser" (Porthole Cruise Magazine).

*The Cube and the Cathedral* George Weigel,2008-07-31 Why do Europeans and

Americans see the world so differently? Why do Europeans and Americans have such different understandings of democracy and its discontents in the twenty-first century? Contrasting the civilization that produced the starkly modernist cube of the Great Arch of La Defense in Paris with the civilization that produced the cathedral of Notre-Dame, George Weigel argues that Europe's embrace of a narrow secularism has led to a crisis of morale that is eroding Europe's soul and threatening its future -- with dire lessons for the rest of the democratic world. Weigel traces the origins of Europe's problem to the atheistic humanism of the nineteenth-century European intellectual life, which set in motion a historical process that produced two world wars, three totalitarian systems, the Gulag, Auschwitz, the Cold War -- and, most ominously, the Continent's de-population, which is worse today than during the Black Death. And yet, many Europeans still insist -- most recently, during the debate over a new EU constitution -- that only a public square shorn of religiously-informed moral argument is safe for human rights and democracy. Precisely the opposite, Weigel suggests, is true: the people of the cathedral can give a compelling account of their commitment to everyone's freedom; the people of the cube cannot. Can there be any true politics -- any true deliberation about the common good, and any robust defense of freedom -- without God? George Weigel makes a powerful case that the answer is No, because, in the final analysis, societies are only as great as their spiritual aspirations.
