Jean-Denis Lepage

Early European Castles Oliver Creighton,2015-10-20 Medieval castles were, alongside the great cathedrals, the most recognisable buildings of the medieval world. Closely associated with concepts of justice, lordship and authority as well as military might, castles came to encapsulate the period's very essence. Looking at above and below-ground evidence and examining a wide variety of sites - from towering donjons to earth and timber castles - in different parts of western Europe, this book explores the relationship between early castle building and the emergence of a new aristocracy and investigates the impact of authority on the organisation of the landscape. A particular focus is on the social context of early private fortifications: Europe's earliest castles came to embody a new and radically different form of power – an aristocratic authority that was highly personal in nature, glaringly visible in its presence, and enforceable through violence, both threatened and real. The volume reassesses traditional models of castle origins; examines aspects of elite lifestyle in and around these structures, including pastimes and diet; considers medieval visual experiences of sites and their settings; and explores some future directions for research.

Castles and Fortified Cities of Medieval Europe Jean-Denis G.G. Lepage,2015-05-20 During the Middle Ages, castles and other fortified buildings were a common feature of the European landscape. As central powers rose and fell, the insecurity of the times inspired a revival of fortifications first introduced in the Roman Empire. Despite limitations in construction techniques and manpower, medieval fortifications were continuously adapted to meet new political circumstances and weapons technology. Here is an illustrated guide to the architecture of medieval fortifications, from the first castles to the fortified cities of the 15th and 16th centuries. In hundreds of detailed and thoroughly researched pen-and-ink drawings, historian and artist Jean-Denis G. G. Lepage introduces the reader to the development and diversity of European medieval military architecture. Each drawing is accompanied by meticulous descriptions of types of buildings (e.g., motte-and-bailey castles), built-in defenses (arrow slits, pepper-pot towers), and particular castles and cities (the Mont-Saint-Michel, the city of Jerusalem). Elements of medieval warfare and weaponry are also covered in drawings and text.

Norman Stone Castles (2) Christopher Gravett,2012-07-20 Following the creation of the Duchy of Normandy, the Normans were soon introduced to the castle and they built them in large numbers. In the mid-11th century, other Norman adventurers began carving out dominions for themselves in Southern Italy: some crossed to Sicily in 1061 and by 1091 had conquered the whole island. As in Normandy, they were keen to assimilate new ideas, including architectural styles, resulting in some striking buildings. This title, a companion to Fortress 13: Norman Stone Castles (1) The British Isles 1066-1216, provides a detailed guide to the castles built in Normandy, Southern Italy and Sicily, covering defensive principles, daily life, the events of siege warfare, and the fate of the castles.
