Eco-Driving Rich C. McIlroy, Neville A. Stanton, 2017-10-23 Eco-driving has the potential to save fuel and reduce emissions without having to make any changes to vehicles or road infrastructure. This book provides an in-depth understanding of the contemporary issues in the human factors aspects of eco-driving strategies and interfaces and the effects on driver behaviour. A review of the literature concerning design, behaviour, and energy use led to an exploration of Ecological Interface Design, and the Skills, Rules, and Knowledge (SRK) taxonomy of human behaviour, particularly with regard to

haptic information presented through the accelerator pedal. This book explains that eco-driving can be performed by anyone in control of a vehicle.

Enjoying tight cooperation with the R & D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS, including its subseries LNAI and LNBI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes proceedings (published in time for the respective conference) post-proceedings (consisting of thoroughly revised final full papers) research monographs (which may be based on outstanding PhD work, research projects, technical reports, etc.) More recently, several color-cover sublines have been added featuring, beyond a collection of papers, various added - value components; these sublines include tutorials (textbook - like monographs or collections of lectures given at advanced courses) state - of - the art surveys (offering complete and mediate coverage of a topic) hot topics (introducing emergent topics to the broader community) In parallel to the printed book, each new volume is published electronically in LNCS Online Book jacket.

Trial by Fire Charles E. Gannon, 2014-07-16 Sequel to national bestseller, Nebula Award finalist, and Compton Crook Award winner *Fire with Fire*. Science fiction adventure on a grand scale. When reluctant interstellar diplomat and intelligence operative Caine Riordan returns from humanity's first encounter with alien races, sudden war clouds burst. With Earth's fleet shattered by a sneak attack and its survivors fighting for their lives, Caine must rely upon both his first contact and weaponry skills to contend with the non-humanoid enemy. And when the technologically-superior attackers sweep aside the solar system's last defenses, and traitorous corporations invite the invaders to land security forces, humanity fights back with its best weapons: cunning, inventiveness, and guts. But as Earth hurtles towards a final trial by fire that is certain to scar its collective memory, Caine discovers that there may also be large and disturbing gaps in that memory. Clues point to a much earlier inter-species apocalypse, buried in humanity's own prehistory. Which raises a terrifying possibility: what if the aliens' invasion of Earth is not one of conquest, but preemption? And what if their harrowing memories of a long-past cataclysmic war makes them willing to do anything to keep it from reigniting? Even if that means exterminating the human race.

At the publisher's request, this title is sold without DRM (Digital Rights Management). About Compton Crook award winner for best first novel, *Fire with Fire*: \_Chuck Gannon is one of those marvelous finds¾someone as comfortable with characters as he is with technology, and equally adept at providing those characters with problems to solve. Imaginative, fun, and not afraid to step on the occasional toe or gore the occasional sacred cow, his stories do not disappoint.Ó¾David Weber If we meet strong aliens out there, will we suffer the fate of the Aztecs and Incas, or find the agility to survive? Gannon fizzles with ideas about the dangerous politics of first contact.Ó¾David Brin The plot is intriguing and then some. Well-developed and self-consistent; intelligent readers are going to like it.¾Jerry Pournelle [T]he intersecting plot threads, action and well-conceived science kept those pages turning.¾SF Crowsnest About *Starfire* series hit, *Extremis*, coauthored by Charles E. Gannon: \_Vivid. . . Battle sequences mingle with thought-provoking exegesis . . . Ó\_Publishers Weekly It is a grand, fun series of battles and campaigns, worthy of anything Dale Brown or Larry Bond ever wrote. \_Analog About Charles E. Gannon: [A] strong [writer of] . . . military SF. . .[much] action going on in his work, with a lot of physics behind it. There is a real sense of the urgency of war and the sacrifices it demands. \_Locus

Advances in Ergonomic Design of Systems, Products and Processes Barbara Deml,Patricia Stock,Ralph Bruder,Christopher Marc Schlick,2016-02-15 These proceedings summarize the best papers in each research area represented at the 2015 Annual Meeting of the German Gesellschaft für Arbeitswissenschaft, held at Karlsruhe Institute of Technology (KIT) from February 26-28. **16. Internationales Stuttgarter Symposium** Michael Bargende,Hans-Christian Reuss,Jochen Wiedemann,2016-04-27 Die Anforderungen an Forschung und Entwicklung in der Automobilindustrie ändern sich kontinuierlich. Hersteller und Zulieferer müssen einerseits globale Lösungen entwickeln, andererseits aber Kundenbedürfnisse und legislative Vorgaben einzelner Märkte berücksichtigen. Selbst bei der Emissionsgesetzgebung herrscht alles andere als globale Einigkeit. In Europa wird ab September 2017 die Messung der real-driving emissions (RDE) eingeführt. Damit wird die Bewertung der Schadstoffemissionen vom Prüfstand auf die Straße verlagert, mit umfassenden Konsequenzen für die Antriebsentwicklung. Zudem wird in verschiedenen Weltregionen die lokale Einführung von Zonen mit schadstoffemissionsfreiem Verkehr gefordert. Überlagert wird all dies durch die laufende Absenkung der CO2-Grenzwerte für die Fahrzeugflotten. Alle Weltregionen haben hier unterschiedliche Absenkungsschritte definiert. Dies alles

wird noch getoppt von steigenden Ansprüchen an Komfort und Emotionalität des Automobils. Wie reagiert nun die Automobilindustrie im Spannungsfeld zwischen zunehmender Globalisierung und möglichst global zu vermarktender Produkte auf der einen Seite und den neuen, von Regionen abhängigen Anforderungen an das Fahrzeug und der dazugehörigen Variantenvielfalt auf der anderen Seite? Welche technischen Konsequenzen ergeben sich hieraus? Darüber und über vieles mehr werden Experten aus Industrie und Wissenschaft beim Symposium berichten.

Converging Clinical and Engineering Research on Neurorehabilitation II Jaime Ibáñez, José González-Vargas, José María Azorín, Metin Akay, José Luis Pons, 2016-10-12 The book reports on advanced topics in the areas of neurorehabilitation research and practice. It focuses on new methods for interfacing the human nervous system with electronic and mechatronic systems to restore or compensate impaired neural functions. Importantly, the book merges different perspectives, such as the clinical, neurophysiological, and bioengineering ones, to promote, feed and encourage collaborations between clinicians, neuroscientists and engineers. Based on the 2016 International Conference on Neurorehabilitation (ICNR 2016) held on October 18-21, 2016, in Segovia, Spain, this book covers various aspects of neurorehabilitation research and practice, including new insights into biomechanics, brain physiology, neuroplasticity, and brain damages and diseases, as well as innovative methods and technologies for studying and/or recovering brain function, from data mining to interface technologies and neuroprosthetics. In this way, it offers a concise, yet comprehensive reference guide to neurosurgeons, rehabilitation physicians, neurologists, and bioengineers. Moreover, by highlighting current challenges in understanding brain diseases as well as in the available technologies and their implementation, the book is also expected to foster new collaborations between the different groups, thus stimulating new ideas and research directions.

**Advances in Human Aspects of Transportation: Part III** Neville Stanton,Steven Landry,Giuseppe Di Bucchianico,Andrea Vallicelli,2022-07-19 Human Factors and Ergonomics have made a considerable contribution to the research, design, development, operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure, aviation and maritime transportation. This book presents recent advances in the Human Factors aspects of Transportation. These advances include accident analysis, automation of vehicles, comfort, distraction of drivers (understanding of distraction and how to avoid it), environmental concerns, in-vehicle systems design, intelligent transport systems, methodological developments, new systems and technology, observational and case studies, safety, situation awareness, skill development and training, warnings and workload. This book brings together the most recent human factors work in the transportation domain, including empirical research, human performance and other types of modeling, analysis, and development. The issues facing engineers, scientists, and other practitioners of human factors in transportation research are becoming more challenging and more critical. The common theme across these sections is that they deal with the intersection of the human and the system. Moreover, many of the chapter topics cross section boundaries, for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool. This is in keeping with the systemic nature of the problems facing human factors experts in rail and road, aviation and maritime research– it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment, but as embedded issues that can only be understood as a part of an overall system.
