The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and

work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Digital Age: Chances, Challenges and Future Svetlana Igorevna Ashmarina, Marek Vochozka, Valentina Vyacheslavovna Mantulenko, 2019-07-27 This proceedings book presents the outcomes of the VII International Scientific Conference "Digital Transformation of the Economy: Challenges, Trends, New Opportunities", which took place in Samara, Russian Federation, on April 26-27, 2019. Organized by the Samara State University of Economics, the conference chiefly focused on digital economy issues, such as theoretical preconditions for the development of economic systems in the digital age and specific practical issues related to real-world business practice. Consisting of six chapters corresponding to the thematic areas of the conference, and written by scientists and practitioners from different regions of Russia, Kazakhstan, the Czech Republic and Germany, the book offers answers to the most pressing questions for today's business community: - How is our world changing under the influence of digital technology? - Is sustainable economic development a myth or reality in the context of digitalization? - What threats and opportunities does digitalization bring? - What are realities and prospects of digitalization in the context of business practice? - How do we create a digital infrastructure for the economy? - How should the legal environment of the economy be transformed in the context of digitalization? The conclusions and recommendations presented are not recipes for solving the existing economic

problems, but instead are intended for use in further research on transformation processes in the economy and in the development of state economic policies in various countries and regions.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Justice on Trial Mollie Hemingway,Carrie Severino,2019-07-09 #1 NATIONAL BESTSELLER!

Justice Anthony Kennedy slipped out of the Supreme Court building on June 27, 2018, and traveled incognito to the White House to inform President Donald Trump that he was retiring, setting in motion a political process that his successor, Brett Kavanaugh, would denounce three months later as a “national disgrace” and a “circus.” Justice on Trial, the definitive insider’s account of Kavanaugh’s appointment to the Supreme Court, is based on extraordinary access to more than one hundred key figures—including the president, justices, and senators—in that ferocious political drama. The Trump presidency opened with the appointment of Neil Gorsuch to succeed the late Antonin Scalia on the Supreme Court. But the following year, when Trump drew from the same list of candidates for his nomination of Brett Kavanaugh, the justice being replaced was the swing vote on abortion, and all hell broke loose. The judicial confirmation process, on the point of breakdown for thirty years, now proved utterly dysfunctional. Unverified accusations of sexual assault became weapons in a ruthless campaign of personal destruction, culminating in the melodramatic hearings in which Kavanaugh’s impassioned defense resuscitated a nomination that seemed beyond saving. The Supreme Court has become the arbiter of our nation’s most vexing and divisive disputes. With the stakes of each vacancy incalculably high, the incentive to destroy a nominee is nearly irresistible. The next time a nomination promises to change the balance of the Court, Hemingway and Severino warn, the confirmation fight will be even uglier than Kavanaugh’s. A good person might accept that nomination in the naïve belief that what happened to Kavanaugh won’t happen to him because he is a good person. But it can happen, it does happen, and it just happened. The question is whether America will let it happen again.

Gamification: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-03-31 Serious games provide a unique opportunity to engage students

more fully than traditional teaching approaches. Understanding the best way to utilize games and play in an educational setting is imperative for effectual learning in the twenty-first century. *Gamification: Concepts, Methodologies, Tools, and Applications* investigates the use of games in education, both inside and outside of the classroom, and how this field once thought to be detrimental to student learning can be used to augment more formal models. This four-volume reference work is a premier source for educators, administrators, software designers, and all stakeholders in all levels of education.

The Science of Service Systems Haluk Demirkan,James C. Spohrer,Vikas Krishna,2011-04-20

The Science of Service Systems intends to stimulate discussion and understanding by presenting theory-based research with actionable results. Most of the articles focus on formalizing the theoretical foundations for a science of service systems, examining a wide range of substantive issues and implementations related to service science from various perspectives. From the formal (ontologies, representation specifications, decision-making and maturity models) to the informal (analysis frameworks, design heuristics, anecdotal observations), these contributions provide a snapshot in time of the gradually emerging scientific understanding of service systems. The Science of Service Systems, along with its companion text, Service Systems Implementation, is designed to present multidisciplinary and multisectoral perspectives on the nature of service systems, on research and practice in service, and on the future directions to advance service science. These two volumes compose a collection of articles from those involved in the emerging area known as service science.
