Face-to-Face Diplomacy Marcus Holmes,2018-03-08 Argues that face-to-face interaction undercuts the security dilemma at the interpersonal level by providing a mechanism for understanding intentions.

Face-to-Face Diplomacy Marcus Holmes,2018-02-28 Face-to-face diplomacy has long been the lynchpin of world politics, yet it is largely dismissed by scholars of International Relations as unimportant. Marcus Holmes argues that dismissing this type of diplomacy is in stark contrast to what leaders and policy makers deem as essential and that this view is rooted in a particular set of assumptions that see an individual's intentions as fundamentally inaccessible. Building on recent evidence from social neuroscience and psychology, Holmes argues that this assumption is problematic. Marcus Holmes studies some of the most important moments of diplomacy in the twentieth century, from 'Munich' to the end of the Cold War, and by showing how face-to-face interactions allowed leaders to either reassure each other of benign defensive intentions or pick up on offensive intentions, his book challenges the notion that intentions are fundamentally unknowable in international politics, a central idea in IR theory.

Face to Face Brian Grazer,2019-09-17 Featured on CBS This Morning, Squawk Box, MSNBC, CNN, Bloomberg, Forbes, Fast Company, The New York Times, and more. “Reading Face to Face is like being a fly on the wall, watching Brian Grazer work his magic. Utterly entertaining, this is how you become Hollywood’s best producer.” –Malcolm Gladwell, author of Talking to Strangers Legendary Hollywood producer and author of the bestselling A Curious Mind, Brian Grazer is back with a captivating new book about the life-changing ways we can connect with one another. Much of Brian Grazer’s success—as a #1 New York Times bestselling author, Academy Award-winning producer, father, and husband—comes from his ability to establish genuine connections with almost anyone. In Face to Face, he takes you around the world and behind the scenes of some of his most iconic movies and television shows, like A Beautiful Mind, Empire, Arrested Development, American Gangster, and 8 Mile, to show just how much in-person encounters have revolutionized his life—and how they have the power to change yours. With his flair for intriguing stories, Grazer reveals what he’s learned through interactions with people like Bill Gates, Taraji P. Henson, George W. Bush, Barack Obama, Eminem, Prince, Spike Lee, and the Afghani rapper activist Sonita: that the secret to a bigger life lies in personal connection. In a world where our attention is too often focused downward at our devices, Grazer argues that we are missing an essential piece of the human experience. Only when we are face to face, able to look one another in the eyes, can we form the kinds of connections that expand our world views, deepen our self-awareness, and ultimately lead to our greatest achievements and most meaningful moments. When we lift our eyes to look at the person in front of us, we open the door to infinite possibility.

Face to Face Kausik Bandyopadhyay,2021-03-31 While rivalry is embedded in any sporting event or performance, soccer, the world’s most popular mass spectator sport, has been an emblem of such rivalries since its inception as an organized sport. Some of these rivalries grow to become long-term and perennial by their nature, extent, impact and legacy, from the local to the global level. They represent identities based on widely diverse affiliations of human life—locality, region, nation, continent, community, class, culture, religion, ethnicity, and so on. Yet, at times, such rivalries transcend barriers of space and time, where soccer-clubs, -nations, -personalities, -organizations, -styles and -fans float and compete with intriguing identities. The present volume brings into focus some of the most fascinating and enduring rivalries in the world of soccer. It attempts to encapsulate, analyse and reconstruct those rivalries—between nations, between clubs, between personalities, between styles of play, between fandoms, and between organizations—in a historical perspective in relation to diverse identities, competing ideologies, contestations of power, psychologies of attachment, bonds of loyalty, notions of enmity, articulations of violence, and affinities of fan culture—some of the core manifestations of sporting rivalry. The chapters in this book were originally published as a special issue of Soccer & Society.

Face/On Sharrona Pearl,2017-04-12 Are our identities attached to our faces? If so, what happens when the face connected to the self is gone forever—or replaced? In Face/On, Sharrona Pearl investigates the stakes for changing the face—and the changing stakes for the face—in both contemporary society and the sciences. The first comprehensive cultural study of face transplant surgery, Face/On reveals our true relationships to faces and facelessness, explains the significance we place on facial manipulation, and decodes how we understand loss, reconstruction, and transplantation of the face. To achieve this, Pearl draws on a vast array of sources: bioethical and medical reports, newspaper and television coverage, performances by pop culture icons, hospital records, personal interviews, films, and military files. She argues that we are on the cusp of a new ethics, in an opportune moment for reframing essentialist ideas about appearance in favor of a more expansive form of interpersonal interaction. Accessibly written and respectfully illustrated, Face/On offers a new perspective on face transplant surgery as a way to consider the self and its representation as constantly present and evolving. Highly interdisciplinary, this study will appeal to anyone wishing to know more about critical interventions into recent medicine, makeover culture, and the beauty industry.

The Changing Face of Higher Education Dennis A. Ahlburg,2018-07-04 Over the last decade, a heated debate has raged in the US and the UK over whether the humanities are in crisis, and, if there is one, what form this crisis takes and what the response should be. Questioning how there can be such disagreement over a fundamental point, The Changing Face of Higher Education explores this debate, asking whether the humanities are in crisis after all by objectively evaluating the evidence at hand, and opening the debate up to a global scale by applying the questions to twelve countries from different continents. Each carefully chosen contributor considers the debate from the perspective of a different country. The chapters present data on funding, student enrolment in the humanities, whether the share of total enrolment in this area is falling, and answer the following questions: What does each country mean by the ‘humanities’? Is there a ‘crisis’ in the humanities in this country? What are the causes for the crisis? What are the implications for the humanities disciplines? Uniquely offering an objective evaluation of whether this crisis exists, the book will appeal to international humanities and higher education communities and policy-makers, including postgraduate students and academics.

Crafting the Future of International Higher Education in Asia via Systems Change and Innovation Angela Yung Chi Hou,Joshua Smith,Ka Ho Mok,Chao-Yu Guo,2023-05-29 The

book discusses the most essential topics in understanding the development and changes of higher educational systems in Asia after the outbreak of the pandemic, and explores the transformative, international and innovative moves from an Asian perspective. The topics covered in the book are timely in that higher education in Asia was severely limited during the tumultuous time of the pandemic, including three themes- 1. How the pandemic drives system reform and quality management; 2. How can universities maintain transnational partnerships and attract global talent; 3. How would faculty members innovate teaching pedagogy and reassess student learning experiences. This timely and well-researched book provides valuable insights into the challenges and opportunities for national, regional, and international higher education created by the recent pandemic as well as technological and geopolitical changes. The lucid analysis of key issues and trends will be useful to academics, policymakers, and researchers within Asia and beyond. Professor Jane Knight, Ontario Institute for studies in Education, University of Toronto This book sets out important thinking for the post-pandemic era in Asian higher education. Based on valuable experience across a diverse region, this book highlights the opportunity to reimagine the future trajectory for higher education. As more of the Asia-Pacific moves toward mass and even universal systems of higher education, it exerts greater influence on higher education around the world. This book offers practical analysis that is culturally grounded in the rich civilizations of Asia about ubiquitous issues in higher education, including social equity, human agency, program quality, innovative pedagogy, academic governance, private sector initiative, knowledge building, and a new form of internationalization. It offers a sensible launchpad for a policy agenda. Professor Gerard Postiglione, Emeritus Professor, The University of Hong Kong

Face-to-Face Communication over the Internet Arvid Kappas, Nicole C. Krämer, 2011-06-16 Social platforms such as MySpace, Facebook and Twitter have rekindled the initial excitement of cyberspace. Text-based, computer-mediated communication has been enriched with face-to-face communication such as Skype, as users move from desktops to laptops with integrated cameras and related hardware. Age, gender and culture barriers seem to have crumbled and disappeared as the user base widens dramatically. Other than simple statistics relating to e-mail usage, chatrooms and blog subscriptions, we know surprisingly little about the rapid changes taking place. This book assembles leading researchers on nonverbal communication, emotion, cognition and computer science to summarize what we know about the processes relevant to face-to-face communication as it pertains to telecommunication, including video-conferencing. The authors take stock of what has been learned regarding how people communicate, in person or over distance, and set the foundations for solid research helping to understand the issues, implications and possibilities that lie ahead.

Global AIDS Crisis Richard G. Marlink, Alison G. Kotin, 2004-12-16 The most authoritative account published to date on the history, spread, and chilling repercussions of one of the deadliest pandemics the world has ever seen. Global AIDS Crisis scrutinizes the scourge of HIV and the AIDS virus throughout the world through the eyes of one of the top AIDS researchers in the world. From Botswana and sub-Saharan Africa to Thailand, Romania, and Brazil, an exploration of developing countries with limited access to healthcare and scarce resources reveals how such factors as tourism, international travel, war, and mobility have facilitated the insidious spread of HIV and AIDS. Candid discussions of sensitive issues such as stigma and its effects on morale and health complement scientific and medical inquiries into the origins of the disease and the development of antiretroviral therapies. An analysis of groundbreaking solutions such as medication adherence partners, prevention strategies, and current vaccine models adds a glimmer of hope to a seemingly hopeless crisis.

Acting Face to Face John Sudol, 2013-05-15 Acting Face to Face: the Actor's Guide to Understanding How Your Face Communicates Emotion for TV and Film is the first book to define the significant difference between acting for the stage and acting for the camera. That difference being how your face communicates thought, feeling and emotion. The actor who has the tools and skills to create and control how and what their face communicates is the actor most suited to work in front of the camera. Acting Face to Face is also the first book in a series about the Language of the Face - or how the face communicates nonverbally. The book is particularly useful for actors transitioning from stage to screen, by clearly defining the difference. On stage, you communicate with your body and voice; on camera you need to add a third means of communication - your face. When you understand this difference, you also understand why only a small percentage of actors get the majority of on-camera work. Acting Face to Face reveals the tools you'll need to level the playing field. Acting Face to Face exposes the myths and misconceptions about on-camera while addressing some of the major challenges most actors face when relying solely on their stage acting training to work in front of the camera. The book contains detailed photos and experiential exercises; it also helps you understand how you personally communicate and what's missing or misunderstood about your facial expressions, so you can take your acting to the next level. After working with thousands of actors and studying the work of leading researchers in the field of emotions for over 10 years, John Sudol - a veteran actor, director, casting director, Hollywood acting teacher and audition coach - has developed this book series, which stands to change the face of acting. Though developed specifically for actors, this book is also helpful to anyone in the communications business who would benefit from knowing how their face nonverbally speaks to others.* The second book of the Language of the Face series, Acting Face to Face 2, How to Create Genuine Emotion for the Camera is now available. Whereas the first Acting Face to Face defined the challenges of On-Camera Acting, Acting Face to Face 2, reveals a step-by-step process to overcoming those challenges.

International Operations Management Alberto F. De Toni,2016-04-22 International Operations Management: Lessons in Global Business uses a fascinating selection of case studies researched during the 'International Operations Management Project', sponsored by the European Commission, to produce a valuable view of businesses in Western and Eastern traditions. Ranging from China Post and Flextronics International (Singapore) to Electrolux, Ford, and GlaxoSmithKline, the studies link conceptual and practical approaches in five areas: international operations management strategy, sourcing and manufacturing, new product development, logistics, and networked organisations. Throughout, the authors compare the Western and Eastern approaches to business, and introduce theory to clarify the comparison and the real consequences of internationalisation. With its balance of theoretical and applied content, this volume, created from an exciting collaboration between universities and schools of management in Europe and China, serves as both a primary and supplementary source for higher level students and educators, and as a worthwhile read for interested practitioners.
