**Perils of the Web: Cyber Security and Internet Safety** Magdalena Hodalska, Catalin Ghita, Jyotsna Bapat, 2019-07-22 This interdisciplinary volume seeks to explore the practical dimensions of cyber threats and the changes cyber space has brought to the social and cultural environment we have known so far.

*The Handbook of Communication Skills* Owen Hargie, 2018-07-16 The Handbook of Communication Skills is recognised as one of the core texts in the field of communication, offering a state-of-the-art overview of this rapidly evolving field of study. This comprehensively revised and updated fourth edition arrives at a time when the realm of interpersonal communication has attracted immense attention. Recent research showing the potency of communication skills for success in many walks of life has stimulated considerable interest in this area, both from academic researchers, and from practitioners whose day-to-day work is so dependent on effective social skills. Covering topics such as non-verbal behaviour, listening, negotiation and persuasion, the book situates communication in a range of different contexts, from interacting in groups to the counselling interview. Based on the core tenet that interpersonal communication can be conceptualised as a form of skilled activity, and including new chapters on cognitive behavioural therapy and coaching and mentoring, this new edition also places communication in context with advances in digital technology. The Handbook of Communication Skills represents the most significant single contribution to the literature in this domain. Providing a rich mine of information for the neophyte and practising professional, it is perfect for use in a variety of contexts, from theoretical mainstream communication modules on degree programmes to vocational courses in health, business and education. With contributions from an internationally renowned range of scholars, this is the definitive text for students, researchers and professionals alike.

*The Newbie Author's Survival Guide* A.K. Taylor, 2016-11 After crash landing into self publishing with nothing but the clothes she had on, author AK Taylor fought for survival with trying to market her books on a small budget. After two years of trial and error, reworking, refining, and reaching out, she has created the first survival guide for book marketing compiled of great tools and resources that can be used by any author during the rough times. Comparing the book marketing wilderness with the real wilderness is how Taylor viewed the publishing world around her. Growing up in the woods and learning survival skills has given her this unique viewpoint for a different kind of world. When she started her search for information, a book marketing survival guide didn't exist-until now. Short: Have you ever been lost in the wilderness? Being lost in the wilderness is more dangerous and scarier than being lost anywhere else and more things can happen. Book marketing is just like being lost in the real wilderness with pitfalls, dangerous plants and animals, and knowing what is needed to survive during the rough times. Using outdoor survival skills and applying them to book marketing, AK Taylor has created the first survival guide for book marketing on a small budget.

[Hilarious Status Updates and Guide for Facebook](#) Ronny Harrahs,

[Identity and Ideology in Digital Food Discourse](#) Alla Tovares,Cynthia Gordon,2020-11-26 Exploring food-related interactions in various digital and cultural contexts, this book demonstrates how food as a discursive resource can be mobilized to accomplish actions of social, cultural, and political consequence. The chapters reveal how social media users employ language, images, and videos to construct identities and ideologies that both encompass and transcend food. Drawing on various discourse analytic frameworks to digital communication, contributors examine interactions across Facebook, Twitter, YouTube, and Instagram. From the multimodal discourse of a Korean livestreaming online eating show, to food activism in an English blogging community and discussions of a food-related controversy on Omani Twitter, this book shows how language and multimodal resources serve not only to communicate about food, but also as a means of accomplishing key aspects of everyday social life.

**Research and Development in Intelligent Systems XXIX** Max Bramer,Miltos Petridis,2012-10-30 The papers in this volume are the refereed papers presented at AI-2012, the Thirty-second SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence, held in Cambridge in December 2012 in both the technical and the application streams. They present new and innovative developments and applications, divided into technical stream sections on Data Mining, Data Mining and Machine Learning, Planning and Optimisation, and Knowledge Management and Prediction, followed by application stream sections on Language and Classification, Recommendation, Practical Applications and Systems, and Data Mining and Machine Learning. The volume also includes the text of short papers presented as posters at the conference. This is the twenty-ninth volume in the Research and Development in Intelligent Systems series, which also incorporates the twentieth volume in the Applications and Innovations in Intelligent Systems series. These series are essential reading for those who wish to keep up to date with developments in this important field.

**Emotion in the Digital Age** Darren Ellis, Ian Tucker, 2020-10-08 Emotion in the Digital Age examines how emotion is understood, researched and experienced in relation to practices of digitisation and datafication said to constitute a digital age. The overarching concern of the book is with how emotion operates in, through, and with digital technologies. The digital landscape is vast, and as such, the authors focus on four key areas of digital practice: artificial intelligence, social media, mental health, and surveillance. Interrogating each area shows how emotion is commodified, symbolised, shared and experienced, and as such operates in multiple dimensions. This includes tracing the emotional impact of early mass media (e.g. cinema) through to efforts to programme AI agents with skills in emotional communication (e.g. mental health chatbots). This timely study offers theoretical, empirical and practical insight regarding the ways that digitisation is changing knowledge and experience of emotion and affective life. Crucially, this involves both the multiple versions of digital technologies designed to engage with emotion (e.g. emotional-AI) through to the broader emotional impact of living in digitally saturated environments. The authors argue that this constitutes a psycho-social way of being in which digital technologies and emotion operate as key dimensions of the ways we simultaneously relate to ourselves as individual subjects and to others as part of collectives. As such, Emotion in the Digital Age will prove important reading for students and researchers in emotion studies, psychology, science and technology studies, sociology, and related fields.

**Information and Communication Technologies in Tourism 2020** Julia Neidhardt, Wolfgang Wörndl, 2019-12-16 Gathering the outcomes of the 27th annual international eTourism conference ENTER2020, this book presents new research, innovative systems and industry case studies on the application of Information and Communication Technologies

(ICT) in travel and tourism. It shares the latest findings discussed at the conference and highlights various topics within the field, including social media, destination marketing, recommender systems and decision-making, virtual and augmented reality, technology in tourism, and research on hotels and activities. Readers will find a wealth of state-of-the-art insights and ideas on how information and communication technologies can be applied in travel and tourism.

**Digilect** Ágnes Veszelszki, 2017-06-26 The high degree of internet penetration and its social (and linguistic) effects evidently influence how people, and especially the highly susceptible younger generations, use language. The primary aim of the book is not only to identify the characteristic features of the digital language variety (this has already been done by several works) but to examine how digital communication affects the language of other mediums of communication: orality, handwritten texts, digitally created but not digitally perceived, that is printed texts, including in particular advertisements (which quickly respond to linguistic change). Naturally, the book presents the characteristics of the digital language variety (and coins the term digilect) but only to give a framework to the impact analysis. It is important to document changes in progress and thus direct attention to potential outcomes. The current linguistic change is different from previous ones primarily in its speed and form of spreading, and it not only brings innovative grammatical forms and writing/spelling solutions but may also have far-reaching cultural and educational consequences in the long run.

**Language, Corpora, and Technology in Applied Linguistics** Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society has become more digitalized, especially when computer science and digital technologies have entered a new era in the twenty-first century, translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts, without which translation both as a practice and as a theorization could barely persist. It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies. On the one hand, technologies like NLP, topic modeling, network analysis and data visualization make distant reading become possible, thus allowing us to have a paradigmatic view of how human's ideas, beliefs, values, knowledge and even emotions have spread in some patterns across cultural, geographical and language divides in world history. On the other hand, corpus methods, such as the use of keywords, collocates and concordance lines changed the way by which texts were closely read from linear to vertical. With microscope like corpus tools, we could go deeper into the texture for perception of nuanced meaning. While considering a fact that translation is seldom mono modal in conveying meaning, we have to reconceptualize context as a multimodal environment where audio, visual and other resources interact to convey and make meaning. With regard to the fast development of digital technology, translation studies take an active role in gaining an enhanced capability in promoting transformation. Complexity has been favored in terms of theoretical framework and methodology. New questions are asked; old ones revisited with novel tools; but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods. We could ask if digital technologies would bring new innovation to study of translation history, a heavily-walled land for traditional humanists who tend to repeat "so-what" to question the less significance of data-driven studies. The idea of high-quality machine translation has become so realistic in today's market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms. Machine-translation-assisted communication could help remove boundaries for better communication; but at the same time, it also creates conflicts and leads to confrontation. Thus understood, it is imperative to give a concerned attention to digital translation studies, that is, to study translation by

resorting to and drawing on the digital technologies. This Research Topic is intended to promote current directions and new developments in cross-disciplinary critical discourse research. We welcome papers which, from a critical-analytical perspective, deal with contemporary social, scientific, political, economic, or professional discourses and genres. Papers addressing the highlighted topics are especially welcome. In giving weight to these topics, we wish to call to attention some of the most pressing problems currently facing the world.

*Smart Trends in Computing and Communications* Tomonobu Senjyu, Chakchai So-In, Amit Joshi, 2023 This book gathers high-quality papers presented at the Seventh International Conference on Smart Trends in Computing and Communications (SmartCom 2022), organized by Global Knowledge Research Foundation (GR Foundation) from January 24-25, 2023, in Jaipur, India. It also explores and discusses the latest technological advances in, and future directions for, information and knowledge computing and its applications.

**Emoji and Social Media Paralanguage** Michele Zappavigna, Lorenzo Logi, 2024-01-31 Emoji are now ubiquitous in our interactions on social media. But how do we use them to convey meaning? And how do they function in social bonding? This unique book provides a comprehensive framework for analysing how emoji contribute to meaning-making in social media discourse, alongside language. Presenting emoji as a visual paralanguage, it features extensive worked examples of emoji analysis, using corpora derived from social media such as Twitter and TikTok, to explore how emoji interact with their linguistic co-text. It also draws on the author's extensive work on social media affiliation to consider how emoji function in social bonding. The framework for analysing emoji is explained in an accessible way, and a glossary is included, detailing each system and feature from the system networks used as the schemas for undertaking the analysis. It is essential reading for anyone wishing to investigate the role of emoji in digital communication.
