Human-Computer Interaction. Design Practice in Contemporary Societies Masaaki Kurosu, 2019-07-10

The 3 volume-set LNCS 11566, 11567 + 11568 constitutes the refereed proceedings of the Human Computer Interaction thematic area of the 21st International Conference on Human-Computer Interaction, HCII 2019, which took place in Orlando, Florida, USA, in July 2019. A total of 1274 papers and 209 posters have been accepted for publication in the HCII 2019 proceedings from a total of 5029 submissions. The 125 papers included in this HCI 2019 proceedings were organized in topical sections as follows: Part I: design and evaluation methods and tools; redefining the human in HCI; emotional design, Kansei and aesthetics in HCI; and narrative, storytelling, discourse and dialogue. Part II: mobile interaction; facial expressions and emotions recognition; eye-gaze, gesture and motion-based interaction; and interaction in virtual and augmented reality. Part III: design for social challenges; design for culture and entertainment; design for intelligent urban environments; and design and evaluation case studies.

Red Panda Angela R. Glatston, 2010-11-25 Red Panda: Biology and Conservation of the First Panda provides a broad-based overview of the biology of the red panda, *Ailurus fulgens*. A carnivore that feeds almost entirely on vegetable material and is colored chestnut red, chocolate brown and cream rather than the expected black and white. This book gathers all the information that is available on the red panda both from the field and captivity

as well as from cultural aspects, and attempts to answer that most fundamental of questions, What is a red panda? Scientists have long focused on the red panda's controversial taxonomy. Is it in fact an Old World procyonid, a very strange bear or simply a panda? All of these hypotheses are addressed in an attempt to classify a unique species and provide an in-depth look at the scientific and conservation-based issues urgently facing the red panda today. Red Panda not only presents an overview of the current state of our knowledge about this intriguing species but it is also intended to bring the red panda out of obscurity and into the spotlight of public attention. Wide-ranging account of the red panda (*Ailurus fulgens*) covers all the information that is available on this species both in and ex situ. Discusses the status of the species in the wild, examines how human activities impact on their habitat, and develops projections to translate this in terms of overall panda numbers. Reports on status in the wild, looks at conservation issues and considers the future of this unique species. Includes contributions from long-standing red panda experts as well as those specializing in fields involving cutting-edge red panda research.

When States Fail Robert I. Rotberg, 2010-07-28
Since 1990, more than 10 million people have been killed in the civil wars of failed states, and hundreds of millions more have been deprived of fundamental rights. The threat of terrorism has only heightened the problem posed by failed states. *When States Fail* is the first book to examine how and why states decay and what, if

anything, can be done to prevent them from collapsing. It defines and categorizes strong, weak, failing, and collapsed nation-states according to political, social, and economic criteria. And it offers a comprehensive recipe for their reconstruction. The book comprises fourteen essays by leading scholars and practitioners who help structure this disparate field of research, provide useful empirical descriptions, and offer policy recommendations. Robert Rotberg's substantial opening chapter sets out a theory and taxonomy of state failure. It is followed by two sets of chapters, the first on the nature and correlates of failure, the second on methods of preventing state failure and reconstructing those states that do fail. Economic jump-starting, legal refurbishing, elections, the demobilizing of ex-combatants, and civil society are among the many topics discussed. All of the essays are previously unpublished. In addition to Rotberg, the contributors include David Carment, Christopher Clapham, Nat J. Colletta, Jeffrey Herbst, Nelson Kasfir, Michael T. Klare, Markus Kostner, Terrence Lyons, Jens Meierhenrich, Daniel N. Posner, Susan Rose-Ackerman, Donald R. Snodgrass, Nicolas van de Walle, Jennifer A. Widner, and Ingo Wiederhofer.

Advances in Structural Engineering Vasant Matsagar, 2014-12-12 The book presents research papers presented by academicians, researchers, and practicing structural engineers from India and abroad in the recently held Structural Engineering Convention (SEC) 2014 at Indian Institute of Technology Delhi during 22 – 24 December 2014. The book is divided into three volumes and encompasses

multidisciplinary areas within structural engineering, such as earthquake engineering and structural dynamics, structural mechanics, finite element methods, structural vibration control, advanced cementitious and composite materials, bridge engineering, and soil-structure interaction. *Advances in Structural Engineering* is a useful reference material for structural engineering fraternity including undergraduate and postgraduate students, academicians, researchers and practicing engineers.

Panda Nation E. Elena Songster, 2018-03-16 A logo on products ranging from chopsticks and toilet paper to cell phones and automobiles, the panda is one of the most ubiquitous images in China and throughout the world. Yet the panda holds little notable historical significance in China. Although it has existed in the territory of present-day China since the Pliocene epoch, its widespread popularity there is not only recent, but almost sudden. In *Panda Nation*, E. Elena Songster links the emergence of the giant panda as a national symbol to the development of nature protection in the People's Republic of China. The panda's transformation into a national treasure exemplifies China's efforts in the mid-twentieth century to distinguish itself as a nation through government-directed science and popular nationalism. The story of the panda's iconic rise offers a striking reflection of China's recent and dramatic ascent as a nation in global status.

The Lady and the Panda Vicki Constantine Croke, 2006-06-13 Here is the astonishing true story of Ruth Harkness, the Manhattan bohemian

socialite who, against all but impossible odds, trekked to Tibet in 1936 to capture the most mysterious animal of the day: a bear that had for countless centuries lived in secret in the labyrinth of lonely cold mountains. In *The Lady and the Panda*, Vicki Constantine Croke gives us the remarkable account of Ruth Harkness and her extraordinary journey, and restores Harkness to her rightful place along with Sacajawea, Nellie Bly, and Amelia Earhart as one of the great woman adventurers of all time. Ruth was the toast of 1930s New York, a dress designer newly married to a wealthy adventurer, Bill Harkness. Just weeks after their wedding, however, Bill decamped for China in hopes of becoming the first Westerner to capture a giant panda-an expedition on which many had embarked and failed miserably. Bill was also to fail in his quest, dying horribly alone in China and leaving his widow heartbroken and adrift. And so Ruth made the fateful decision to adopt her husband's dream as her own and set off on the adventure of a lifetime. It was not easy. Indeed, everything was against Ruth Harkness. In decadent Shanghai, the exclusive fraternity of white male explorers patronized her, scorned her, and joked about her softness, her lack of experience and money. But Ruth ignored them, organizing, outfitting, and leading a bare-bones campaign into the majestic but treacherous hinterlands where China borders Tibet. As her partner she chose Quentin Young, a twenty-two-year-old Chinese explorer as unconventional as she was, who would join her in a romance as torrid as it was taboo. Traveling across some of the

toughest terrain in the world-nearly impenetrable bamboo forests, slick and perilous mountain slopes, and boulder-strewn passages-the team raced against a traitorous rival, and was constantly threatened by hordes of bandits and hostile natives. The voyage took months to complete and cost Ruth everything she had. But when, almost miraculously, she returned from her journey with a baby panda named Su Lin in her arms, the story became an international sensation and made the front pages of newspapers around the world. No animal in history had gotten such attention. And Ruth Harkness became a hero. Drawing extensively on American and Chinese sources, including diaries, scores of interviews, and previously unseen intimate letters from Ruth Harkness, Vicki Constantine Croke has fashioned a captivating and richly textured narrative about a woman ahead of her time. Part Myrna Loy, part Jane Goodall, by turns wisecracking and poetic, practical and spiritual, Ruth Harkness is a trailblazing figure. And her story makes for an unforgettable, deeply moving adventure. From the Hardcover edition.

Social Change and Conservation Kléber Bertrand Ghimire, Michel P. Pimbert, 1997 First Published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

Social Change and Conservation Krishna B. Ghimire, Michael P. Pimbert, 2013-11-05 The book discusses protected areas and conservation policies, critically reviewing protected areas management and the concepts of conservation. Drawing on case studies from North America, Europe, Asia and Africa, it shows how they affected local people - their customary rights, livelihoods, well-being and social cohesion. The book argues for an overhaul of conservation thinking and practice.

The Last Panda George B. Schaller, 1994-09-14 Dependent on a shrinking supply of bamboo, hunted mercilessly for its pelt, and hostage to profiteering schemes once in captivity, the panda is on the brink of extinction. Here, acclaimed naturalist George Schaller uses his great evocative powers, and the insight gained by four and a half years in the forests of the Wolong and Tangjiahe panda reserves, to document the plight of these mysterious creatures and to awaken the human compassion urgently needed to save them. No scientist is better at letting the rest of us in

on just how the natural world works; no poet sees the world with greater clarity or writes about it with more grace. . . . Anyone who genuinely cares for wildlife cannot help being grateful to Schaller—both for his efforts to understand the panda and for the candor with which he reports what has gone so badly wrong in the struggle to save it from extinction.—Geoffrey C. Ward, New York Times Book Review Schaller's book is a unique mix of natural history and the politics of conservation, and it makes for compelling reading. . . . Having been in giant panda country myself, I found some of the descriptions of the animals and habitats breathtaking. Schaller describes the daily routines and personalities of the giant pandas he studied (as well as their fates thereafter) as though they were his blood relatives. . . . Schaller's brilliant presentation of the complexities of conservation makes his book a milestone for the conservation movement.—Devra G. Kleiman, Washington Post Book World George Schaller's most soulful work, written in journal style with many asides about a creature who evolved only two to three million years ago (about the same time as humans). . . . Here, conservation biology confronts an evil that grinds against hope and shatters the planet's diversity. Written with hope.—Whole Earth Catalog A nicely crafted blend of wildlife observation and political-cultural analysis. . . . The Last Panda is a sad chronicle of our failure, so far, to stem the decline of the animal that may be the most beloved on the planet.—Donald Dale Jackson, Smithsonian

The Modern Bestiary Joanna Bagniewska,2022-09-27
A quirky collection of Earth's most compelling animals who give mythical creatures a run for their money The Modern Bestiary: A Curated Collection of Wondrous Wildlife mirrors the medieval tradition of an encyclopedia of incredible beasts, only this charming book with ornamental illustrations features 100 real animals who are stranger than fiction. Organized by the elements Earth, Water, and Air, the book introduces both unfamiliar creatures, like deep-sea harp sponges who catch prey in their barbs and digest them whole, as well as ones that have made headlines, such as cicadas who emerge from the ground in noisy broods every thirteen or seventeen years. Step right up and meet these delightful, unbelievable, and deliciously horrific animals, including: The endearing: same-sex albatross mothers who raise chicks together tarantulas who keep frogs as pets zebra finches who sing to their eggs to warn them of hot weather The ruthless: flukes who manipulate their host into getting eaten by a final host horned lizards who squirt blood through their eyes to distract predators southern grasshopper mice who harness scorpion venom as a painkiller And the just plain weird: antechinus who mate themselves to death pearlfish who live, fight, and mate in sea cucumber butts immortal jellyfish who reverse

their aging process when stressed Funny, entertaining, and illuminating, The Modern Bestiary is a book for anyone who wants to become more familiar with the natural world and all its astounding creatures.
