Into the Wild: Beyond the Design Research Lab

Alan Chamberlain, Andy Crabtree, 2019-07-03 This edited collection opens up new intellectual territories and articulates the ways in which academics are theorising and practicing new forms of research in 'wild' contexts. Many researchers are choosing to leave the familiarity of their laboratory-based settings in order to pursue in-situ studies 'in the wild' that can help them to better understand the implications of their work in real-world settings. This has naturally led to ethical, philosophical and practical reappraisals with regard to the taken for granted lab-based modus operandi of scientific, cultural and design-based ways of working. This evolving movement has led to a series of critical debates opening up around the nature of research in the wild, but up until now these debates have

not been drawn together in a coherent way that could be useful in an academic context. The book brings together applied, methodological and theoretical perspectives relating to this subject area, and provides a platform and a source of reference material for researchers, students and academics to base their work on. Cutting across multiple disciplines relating to philosophy, sociology, ethnography, design, human-computer interaction, science, history and critical theory, this timely collection appeals to a broad range of academics in varying fields of research.

The Social Media Revolution Jarice

Hanson, 2016-05-23 Social media shapes the ways in which we communicate, think about friends, and hear about news and current events. It also affects how users think of themselves, their communities, and their place in the world. This book examines the tremendous impact of social media on daily life. When the Internet became mainstream in the early 2000s, everything changed. Now that social media is fully entrenched in daily life, contemporary society has shifted again in how we communicate, behave as consumers, seek out and enjoy entertainment, and express ourselves. Every one of the new applications of social media presents us with a new way of thinking about the economy that supports technological development and communication content and offers new models that challenge us to think about the economic impact of communication in the 21st century. The Social Media Revolution examines the tremendous influence of social media on how we make meaning of our place in the world. The book emphasizes the economic impacts of how we use the Internet and World Wide Web to exchange information, enabling readers to see how social media has taken root and challenged previous media industries, laws, policies, and social practices. Each entry in this useful reference serves to document the history, impact, and criticism of every subject and shows how social media has become a primary tool of the 21st-century world—one that not only contributes to our everyday life and social practices but also affects the future of business. The coverage of topics is extremely broad, ranging from economic models and concepts relevant to social media, such as e-commerce, crowdfunding, the use of cyber currency, and the impact of

freeware; to key technologies and devices like Android and Apple iOS, apps, the cloud, streaming, and smartphones and tablets; to major entrepreneurs, inventors, and subjects of social media, such as Julian Assange, Bill Gates, Steve Jobs, Marissa Mayer, Edward Snowden, Steve Wozniak, and Mark Zuckerberg.

Building Corporate Identity, Image and Reputation in the Digital Era T C Melewar, Charles Dennis, Pantea Foroudi, 2021-07-29 Brands – corporate, products, service – today are collectively defined by their customers, deriving from personal experiences and word of mouth. This book acts as a forum for examining current and future trends in corporate branding, identity, image and reputation. Recognising the complexity and plurality at the heart of the corporate branding discipline, this book fills a gap in the literature by posing a number of original research questions on the intrinsic nature of corporate

branding ideas from corporate (external) and organisation (internal) identity perspectives as they relate to brand management, corporate reputation, marketing communications, social media, smart technology, experiential and sensory marketing. It incorporates current thinking and developments by both multidisciplinary academics and practitioners, combining a comprehensive theoretical foundation with practical insights. The text will serve as an important resource for the marketing, identity and brand practitioners requiring more than anecdotal evidence on the structure and operation of stakeholders communication in different geographical areas. It determines current practices and researches in diverse areas, regions and commercial and non-commercial sectors across the world. The book provides scholars, researchers and postgraduate students in business and marketing with a comprehensive treatment of the nature of relationships between companies, brands and stakeholders in different areas and regions of the world.
