Extra Helping Janet Reich Elsbach, 2018-11-13 A portion of the sales proceeds will be donated to Feeding America. Every book sold provides five meals to families in need! Show up, be kind, and cook! Over 70 recipes for those who need a helping hand in your community. There is no more essential place to show up for people than on the plate. Extra Helping is for anyone who wants to respond to the challenge of baby announcements, PTO meal chains, and CaringBridge alerts with compassion and creativity; who wants to send something to a niece overcome by finals week or a neighbor who is grieving; and whose limits of time and other resources leave them feeling more confused than inspired. With recipes tailored to meet many of the dietary modifications that illness and recovery (not to mention modern life) often entail, Extra Helping walks you, the helpful friend, through cooking for people who are dealing with illness, recovery, and loss, or celebrating babies, birthdays, and new homes. Personal stories from the front lines of care, shortcuts for the time-strapped, and sidebars full of tips and embellishments round out a collection of over 70 recipes, aiding readers in developing a style of caregiving all their own. Extra Helping frames a philosophy of support, a personal identity of tending, a creative and unique-to-you style of saying “I am here for you”—one delivery at a time.

Feeding Family, Feeding America Allison Hill, Joan Satter, 2020-12 Our family took our quarantine time to create a cookbook of our favorite meals to benefit those most in need, donating proceeds to Feeding America, the nation's largest and most effective organization dedicated to fighting domestic hunger through a network of food banks. Each book purchased will provide up to 100 meals. This book is meant to give ideas for creating delicious, flavorful foods that take very little effort and the whole family loves. We also included the influence of one of our town's best, local ingredients we pick up straight from the boats on the dock - lobster! It wouldn't be a family cookbook without the whole family participating as key grips, food stylists and taste testers. My daughter Cristina (16) was food photographer; Chauncey (19) was creative director; and, my nieces Carlisle (22), Cate (19) and Caroline (16) took the lead with naming and food styling. Noni (76) cooked, tasted and edited, edited, and edited until she couldn't take it anymore. Pop (76) just tasted. We loved working on our project...together. We hope you enjoy this peek into our family recipes, all while helping others. Proceeds are donated to the non-profit hunger relief organization, Feeding America

Big Hunger Andrew Fisher, 2018-04-13 How to focus anti-hunger efforts not on charity but on the root causes of food insecurity, improving public health, and reducing income inequality. Food banks and food pantries have proliferated in response to an economic emergency. The loss of manufacturing jobs combined with the recession of the early 1980s and Reagan administration cutbacks in federal programs led to an explosion in the growth of food charity. This was meant to be a stopgap measure, but the jobs never came back, and the “emergency food system” became an industry. In *Big Hunger*, Andrew Fisher takes a critical look at the business of hunger and offers a new vision for the anti-hunger movement. From one perspective, anti-hunger leaders have been extraordinarily effective. Food charity is embedded in American civil society, and federal food programs have remained intact while other anti-poverty programs have been eliminated or slashed. But anti-hunger advocates are missing an essential element of the problem: economic inequality driven by low wages. Reliant on corporate donations of food and money, anti-hunger organizations have failed to hold business accountable for offshoring jobs, cutting benefits, exploiting workers and rural communities, and resisting wage increases. They have become part of a “hunger industrial complex” that seems as self-perpetuating as the more famous military-industrial complex. Fisher lays out a vision that encompasses a broader definition of hunger characterized by a focus on public health, economic justice, and economic democracy. He points to the work of numerous grassroots organizations that are leading the way in these fields as models for the rest of the anti-hunger sector. It is only through approaches like these that we can hope to end hunger, not just manage it.

Feeding America, 2015 The powerful collection of National Geographic photographs portrays the realities of food insecurity in America -- and the incredible efforts undertaken every day to end it. Hunger is everywhere. But when we recognize it, we can solve it.--Back cover.

Feeding Wild Birds in America Paul J. Baicich, Margaret A. Barker, Carrol L. Henderson, 2015-01-28 Today, according to the US Fish and Wildlife Service, more than fifty million Americans feed birds around their homes, and over the last sixty years, billions of pounds of birdseed have filled millions of feeders in backyards everywhere. *Feeding Wild Birds in America* tells why and how a modest act of provision has become such a pervasive, popular, and often passionate aspect of people's lives. Each chapter provides details on one or more bird-feeding development or trend including the “discovery” of seeds, the invention of different kinds of feeders, and the creation of new companies. Also woven into the book are the worlds of education, publishing, commerce, professional ornithology, and citizen science, all of which have embraced bird feeding at different times and from different perspectives. The authors take a decade-by-decade approach starting in the late nineteenth century, providing a historical overview in each chapter before covering topical developments (such as hummingbird feeding and birdbaths). On the one hand, they show that the story of bird feeding is one of entrepreneurial invention; on the other hand, they reveal how Americans, through a seemingly simple practice, have come to value the natural world.

A Place at the Table Participant Media, 2013-02-05 Forty-nine million people—including one in four children—go hungry in the U.S. every day, despite our having the means to provide nutritious, affordable food for all. Inspired by the acclaimed documentary *A Place at the Table*, this companion book offers powerful insights from those at the front lines of solving hunger in America, including: Jeff Bridges, Academy Award-winning actor, cofounder of the End Hunger Network, and spokesperson for the No Kid Hungry Campaign, on raising awareness about hunger Ken Cook, president of Environmental Working Group, unravels the inequities in the Farm Bill and shows how they affect America's hunger crisis Marion Nestle, nutritionist and acclaimed critic of the food industry, whose latest work tracks the explosion of calories in today's “Eat More” environment Bill Shore, Joel Berg, and Robert Egger, widely-published anti-hunger activists, suggest bold and diverse strategies for solving the crisis Janet Poppendieck, sociologist, bestselling author, and well-known historian of poverty and hunger in America, argues the case for school lunch reform Jennifer Harris, of Yale University's Rudd Center for Food Policy and Obesity, uncovers the new hidden persuaders of web food advertisers David Beckmann, head of Bread for the World, and Sarah Newman, researcher on *A Place at the Table*, explore the intersection of faith and feeding the hungry Mariana Chilton, director of Drexel University's Center for Hunger-Free Communities, discusses the health impacts of hunger and the groundbreaking Witnesses to Hunger project Tom Colicchio, chef and executive producer of television's *Top Chef*, presents his down-to-earth case to Washington for increases in child nutrition programs Andy Fisher, veteran activist in community food projects, argues persuasively why we have to move beyond the charity-based emergency feeding program Kelly Meyer, cofounder of Teaching Gardens, illuminates the path to educating, and providing healthy food for, all children Kristi Jacobson and Lori Silverbush, the film's directors/producers, tell their personal stories of how and why they came to make the documentary *Hunger* and food insecurity pose a deep threat to our nation. *A Place at the Table* shows they can be solved once and for all, if the American public decides—as they have in the past—that making healthy food available, and affordable, is in the best interest of us all.

Reinventing Food Banks and Pantries Katie S. Martin, 2021-03-09 In the US, there is a wide-ranging network of at least 370 food banks, and more than 60,000 hunger-relief organizations such as food pantries and meal programs. These groups provide billions of meals a year to people in need. And yet hunger still affects one in nine Americans. What are we doing wrong? In *Reinventing Food Banks and Pantries*, Katie Martin argues that if handing out more and more food was the answer, we would have solved the problem of hunger decades ago. Martin instead presents a new model for charitable food, one where success is measured not by pounds of food distributed but by lives changed. The key is to focus on the root causes of hunger. When we shift our attention to strategies that build empathy, equity, and political will, we can implement real solutions. Martin shares those solutions in a warm, engaging style, with simple steps that anyone working or volunteering at a food bank or pantry can take today. Some are short-term strategies to create a more dignified experience for food pantry clients: providing client choice, where individuals select their own food, or redesigning a waiting room with better seating and a designated greeter. Some are longer-term: increasing the supply of healthy food, offering job training programs, or connecting clients to other social services. And some are big picture: joining the fight for living wages and a stronger social safety net. These strategies are illustrated through inspiring success stories and backed up by scientific research. Throughout, readers will find a wealth of proven ideas to make their charitable food organizations more empathetic and more effective. As Martin writes, it takes more than food to

end hunger. Picking up this insightful, lively book is a great first step.

Feeding the Other Rebecca T. De Souza, 2019-04-09 How food pantries stigmatize their clients through a discourse that emphasizes hard work, self help, and economic productivity rather than food justice and equity. The United States has one of the highest rates of hunger and food insecurity in the industrialized world, with poor households, single parents, and communities of color disproportionately affected. Food pantries—run by charitable and faith-based organizations—rather than legal entitlements have become a cornerstone of the government's efforts to end hunger. In *Feeding the Other*, Rebecca de Souza argues that food pantries stigmatize their clients through a discourse that emphasizes hard work, self help, and economic productivity rather than food justice and equity. De Souza describes this “framing, blaming, and shaming” as “neoliberal stigma” that recasts the structural issue of hunger as a problem for the individual hungry person. De Souza shows how neoliberal stigma plays out in practice through a comparative case analysis of two food pantries in Duluth, Minnesota. Doing so, she documents the seldom-acknowledged voices, experiences, and realities of people living with hunger. She describes the failure of public institutions to protect citizens from poverty and hunger; the white privilege of pantry volunteers caught between neoliberal narratives and social justice concerns; the evangelical conviction that food assistance should be “a hand up, not a handout”; the culture of suspicion in food pantry spaces; and the constraints on food choice. It is only by rejecting the neoliberal narrative and giving voice to the hungry rather than the privileged, de Souza argues, that food pantries can become agents of food justice.

Sweet Charity? Janet Poppendieck, 1999-08-01 In this era of eroding commitment to government sponsored welfare programs, voluntarism and private charity have become the popular, optimistic solutions to poverty and hunger. The resurgence of charity has to be a good thing, doesn't it? No, says sociologist Janet Poppendieck, not when stopgap charitable efforts replace consistent public policy, and poverty continues to grow. In *Sweet Charity?*, Poppendieck travels the country to work in soup kitchens and gleaning centers, reporting from the frontlines of America's hunger relief programs to assess the effectiveness of these homegrown efforts. We hear from the clients who receive meals too small to feed their families; from the enthusiastic volunteers; and from the directors, who wonder if their successful programs are in some way perpetuating the problem they are struggling to solve. Hailed as the most significant book on hunger to appear in decades, *Sweet Charity?* shows how the drive to end poverty has taken a wrong turn with thousands of well-meaning volunteers on board.

Food and Poverty Leslie Hossfeld, E. Brooke Kelly, Julia Waity, 2021-04-30 Food insecurity rates, which skyrocketed with the Great Recession, have yet to fall to pre-recession levels. Food pantries are stretched thin, and states are imposing new restrictions on programs like SNAP that are preventing people from getting crucial government assistance. At the same time, we see an increase in obesity that results from lack of access to healthy foods. The poor face a daily choice between paying bills and paying for food.

Meeting the Challenges of Feeding America's School Children United States. Congress, Committee on Agriculture Nutrition and Forestry, 2017-09-21 Meeting the challenges of feeding America's school children : hearing before the Committee on Agriculture, Nutrition and Forestry, United States Senate, One Hundred Thirteenth Congress, second session, July 23, 2014.

Feeding the Crisis Maggie Dickinson, 2019-11-19 The Supplemental Nutrition Assistance Program (SNAP), formerly known as food stamps, is one of the most controversial forms of social welfare in the United States. Although it's commonly believed that such federal programs have been cut back since the 1980s, Maggie Dickinson charts the dramatic expansion and reformulation of the food safety net in the twenty-first century. Today, receiving SNAP benefits is often tied to work requirements, which essentially subsidizes low-wage jobs. Excluded populations—such as the unemployed, informally employed workers, and undocumented immigrants—must rely on charity to survive. *Feeding the Crisis* tells the story of eight families as they navigate the terrain of an expanding network of assistance programs in which care and abandonment work hand in hand to make access to food uncertain for people on the social and economic margins. Amid calls at the federal level to expand work requirements for food assistance, Dickinson shows us how such ideas are bad policy that fail to adequately address hunger in America. *Feeding the Crisis* brings the voices of food-insecure families into national debates about welfare policy, offering fresh insights into how we can establish a right to food in the United States.

Sowing the Seeds of Change Seth Schindler, 2022-02-15 This is the story of a remarkable organization's sustained, compassionate response to a problem of staggering proportions: there are about 35 million food-insecure people in America today. The numbers are no less shocking in southern Arizona: one in six residents, and one in four children, are food insecure. How can this be in the richest country in the world? This book explores that paradox and the innovative solutions that one organization has developed to create a healthier, more secure tomorrow for the less fortunate among us. The Community Food Bank of Southern Arizona (CFB) is one of the oldest and most respected food banks in America. It is a widely recognized leader not simply in providing hunger relief but in attacking the root causes of hunger and poverty through community development, education, and advocacy. In 2018, Feeding America—the national organization of food banks—named it “Food Bank of the Year.” The CFB serves as a model for all nonprofits to follow, no matter their mission. This profusely illustrated book chronicles the CFB's amazing success and evolution from a tiny grassroots hunger-relief organization to one with more than six thousand workers and an annual budget exceeding \$100 million. The book gives voice to the thousands of CFB participants past and present, weaving their profiles and quotes throughout the book. These profiles personalize the history of the CFB and give readers an insider's perspective on the people and events that shaped the food bank's success. It shows how individuals working together can help prevent hunger and break the cycle of poverty that is its cause. The aim of *Sowing the Seeds of Change* is not to laud the CFB's achievements. It is to demonstrate to readers that the war against hunger, despite the obstacles, can be won. And not tomorrow. Now!

The Problem with Feeding Cities Andrew Deener, 2020-10-10 For most people, grocery shopping is a mundane activity. Few stop to think about the massive, global infrastructure that makes it possible to buy Chilean grapes in a Philadelphia supermarket in the middle of winter. Yet every piece of food represents an interlocking system of agriculture, manufacturing, shipping, logistics, retailing, and nonprofits that controls what we eat—or don't. *The Problem with Feeding Cities* is a sociological and historical examination of how this remarkable network of abundance and convenience came into being over the last century. It looks at how the US food system transformed from feeding communities to feeding the entire nation, and it reveals how a process that was once about fulfilling basic needs became focused on satisfying profit margins. It is also a story of how this system fails to feed people, especially in the creation of food deserts. Andrew Deener shows that problems with food access are the result of infrastructural failings stemming from how markets and cities were developed, how distribution systems were built, and how organizations coordinate the quality and movement of food. He profiles hundreds of people connected through the food chain, from farmers, wholesalers, and supermarket executives, to global shippers, logistics experts, and cold-storage operators, to food bank employees and public health advocates. It is a book that will change the way we see our grocery store trips and will encourage us all to rethink the way we eat in this country.
