Feeding Frenzy Richard Sapir, Warren

Murphy, 2015-05-07 The dish was cost free, fat free, and fabulously yummy. Of course, some said you had to be bugs to try it, but one taste made you a believer. The trouble was, believers began turning into corpses. That's when Remo and Chiun came in to hunt down the evil ingredients in the murderous munchies . . . only to run up against a U.S. Senator.

Feeding Frenzy Will Self, 2001 This collection of Will Self's journalism and selected writings takes the reader through the turbulent years 1995-2000, covering everything from his restaurant reviews to Tate Modern and the contemporary British art scene, and cultural phenomena as diverse as voyeuristic television and the Queen Mother.

Epistemologies of the South Boaventura de Sousa Santos, 2015-11-17 This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world.

Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

World Crisis and Underdevelopment David Ingram, 2018-01-18 The book examines the impact of poverty and other global crises in generating forms of structural coercion that cause agential and societal underdevelopment. It draws from discourse ethics and recognition theory in criticizing injustices and pathologies associated with underdevelopment.

Can NGOs Make a Difference? Anthony J. Bebbington, Samuel Hickey, Diana C. Mitlin, 2013-04-04 Can non-governmental organisations contribute to more socially just, alternative forms of development? Or are they destined to work at the margins of dominant development models determined by others? Addressing this question, this book brings together leading international voices from academia, NGOs and the social movements. It provides a comprehensive update to the NGO literature and a range of critical new directions to thinking and acting around the challenge of development alternatives. The book's originality comes from the wide-range of new case-study material it presents, the conceptual approaches it offers for thinking about development alternatives, and the practical suggestions for NGOs. At the heart of this book is the argument that NGOs can and must re-engage with the project of seeking alternative development futures for the world's poorest and more marginal. This will

require clearer analysis of the contemporary problems of uneven development, and a clear understanding of the types of alliances NGOs need to construct with other actors in civil society if they are to mount a credible challenge to disempowering processes of economic, social and political development.

The Secret History of the American Empire John Perkins, 2007 In this riveting memoir, bestselling author Perkins details his former role as an economic hit man. Free to Hate Paul Hockenos, 2013-09-13 Combining first-hand reporting, original documentation, and political analysis, Free to Hate is the first major work in English to investigate the rise of the ultra-nationalist and radical right-wing movements that have been sweeping Central and Eastern Europe since 1989. In this powerful volume, Paul Hockenos provides an account of the emergence and contemporary relevance of far right movements in countries including Germany, Hungary, Romania, and Poland. In addition, he discusses neo-Nazi youth subculture, anti-Semitism, racism, minority issues, and the revision of history in the post-communist states.

Antisemitism and the Constitution of Sociology
Marcel Stoetzler, 2014-06-17 Modern antisemitism and the modern discipline of sociology not only emerged in the same period, but antagonism and hostility between the two discourses notwithstanding also overlapped and complemented

each other. Sociology emerged in a society where modernization was often perceived as destroying unity and of social cohesion. Of course Antisemitism was likewise a response to the modern age, offering in its vilifications of the Jew an explanation of society's deficiencies and crises.

Antisemitism and the Constitution of Sociology is a collection of essays providing a comparative analysis of modern antisemitism and the rise of sociology. This volume addresses three key areas: the strong influence of writers of Jewish background and the rising tide of antisemitism on the formation of sociology; the role of antisemitism in the historical development of sociology through its treatment by leading figures in the field, such as Emile Durkheim, Talcott Parsons, and Theodor W. Adorno; and the discipline's development in the aftermath of the Nazi Holocaust. Together the essays provide a fresh perspective on the history of sociology and the role that antisemitism, Jews, fascism, and the Holocaust played in shaping modern social theory.

Creating the European Area of Higher Education

Voldemar Tomusk, 2007-11-07 Since 1999 European higher education has been engaged in the most radical reform of its 900 years of history. This volume brings together a group of higher education researchers across Europe and looks into the implementation of the Bologna Process in the countries often attributed a peripheral status. In addition to cultural and political issues, the volume pays particular attention to the role of students as well as the changing position of the

intellectuals under its impact.

From Biocultural Homogenization to Biocultural Conservation Ricardo Rozzi, Roy H. May Jr., F. Stuart Chapin III, Francisca Massardo, Michael C. Gavin, Irene J. Klaver, Aníbal Pauchard, Martin A. Nuñez, Daniel Simberloff, 2019-02-18 To assess the social processes of globalization that are changing the way in which we co-inhabit the world today, this book invites the reader to essay the diversity of worldviews, with the diversity of ways to sustainably co-inhabit the planet. With a biocultural perspective that highlights planetary ecological and cultural heterogeneity, this book examines three interrelated themes: (1) biocultural homogenization, a global, but little perceived, driver of biological and cultural diversity loss that frequently entail social and environmental injustices; (2) biocultural ethics that considers –ontologically and axiologically– the complex interrelationships between habits, habitats, and co-inhabitants that shape their identity and well-being; (3) biocultural conservation that seeks social and ecological well-being through the conservation of biological and cultural diversity and their interrelationships.

Rave Culture and Religion Graham St

John, 2004-06-01 The collection provides insights on developments in post-traditional religiosity (especially 'New Age' and 'Neo-Paganism') through studies of rave's Gnostic narratives of ascensionism and re-enchantment, explorations of the embodied spirituality and millennialist predispositions of dance culture, and investigations of transnational digital-art countercultures manifesting at geographic locations as diverse as Goa, India, and Nevada's Burning Man festival. Contributors examine raving as a new religious or revitalization movement; a powerful locus of sacrifice and transgression; a lived bodily experience; a practice comparable with world entheogenic rituals; and as evidencing a new Orientalism. Rave Culture and Religion will be essential reading for advanced students and academics in the fields of sociology, cultural studies and religious studies.

Routledge Handbook of Internet Politics Philip N. Howard, 2010 The politics of the internet has entered the social science mainstream. From debates about its impact on parties and election campaigns following momentous presidential contests in the United States, to concerns over international security, privacy and surveillance in the post-9/11, post-7/7 environment; from the rise of blogging as a threat to the traditional model of journalism, to controversies at the international level over how and if the internet should be governed by an entity such as the United Nations; from the new repertoires of collective action open to citizens, to the massive programs of public management reform taking place in the name of e-government, internet politics and policy are continually in the headlines. The Routledge Handbook of Internet Politics is a collection of over thirty chapters dealing with the most significant scholarly debates in this rapidly growing field of study. Organized in four broad sections: Institutions, Behavior, Identities, and Law and Policy, the Handbook summarizes and criticizes contemporary debates while pointing out new departures. A comprehensive set of resources, it provides linkages to established theories of media and politics, political communication, governance, deliberative democracy and social movements, all within an interdisciplinary context. The contributors form a strong international cast of established and junior scholars. This is the first publication of its kind in this field; a helpful companion to

students and scholars of politics, international relations, communication studies and sociology.
