Günther A. Wagner

The Penberthy Engineer & Fireman ,1913

The American Woman's Cook Book Delineator Home Institute Delineator, Ruth Berolzheimer, 2023-07-22 First published in 1938, this classic cookbook has been a staple of American kitchens for generations. With over 4000 recipes and tips on everything from preparing a Thanksgiving turkey to preserving fruits and vegetables, this book is an indispensable resource for home cooks of all levels. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Age Determination of Young Rocks and Artifacts Günther A. Wagner, 2013-06-29 Dating the Quaternary, which covers approximately the last 2 million years, has experienced considerable progress over the past few decades. On the one hand, this resulted from the necessity to obtain a valid age concept for this period which had seen tremendous environmental changes and the advent of the genus Homo. On the other hand, instrumental improvements, such as the

introduction of highly sensitive analytical techniques, gave rise to physical and chemical innovations in the field of dating. This rapid methodological development is still in full progress. The broad spectrum of chronometric methods applicable to young rocks and artifacts also becomes increasingly intricate to the specialist. Hence, it is my goal to present a comprehensive, state-of-the-art summary of these methods. This book is essentially designed as an aid for scientists who feel a demand for dating tasks falling into this period, i. e., Quaternary geologists and archaeologists in the broadest sense. Since it has been developed from a course of lectures for students of geological and archaeological sciences, held at the University of Heidelberg, it certainly shall serve as an introduction for students of these disciplines.

Red, White, and Drunk All Over Natalie MacLean,2010-12-15 Natalie MacLean spent three years sipping her way through sun-drenched vineyards and cobwebbed cellars to bring us this witty, knowledgeable book about the world of wine. In the ancient vineyards of Burgundy she uncovers the secrets of Pinot Noir, then moves on to the labyrinthine cellars of Champagne to examine the mystique of luxury bubbly. She compares notes with novelist Jay McInerney at a bacchanalian dinner, goes undercover as a sommelier in a five-star restaurant, and explores the influence of powerful critics Jancis Robinson and Robert Parker. You may have a head for wine, but Red, White and Drunk All Over will show you its heart.

The Buy Nothing, Get Everything Plan Liesl Clark,Rebecca Rockefeller,2021-01-12 In the spirit of The Gentle Art of Swedish Death Cleaning and The Joy of Less, experience the benefits of buying less and sharing more with this accessible 7-step guide to decluttering, saving money, and creating community from the creators of the Buy Nothing Project. In their

island community, friends Liesl Clark and Rebecca Rockefeller discovered that the beaches of Puget Sound were spoiled by a daily influx of plastic items and trash washing on shore. From pens and toothbrushes to toys and straws, they wondered, where did it all come from? Of course, it comes from us—our homes, our backyards, our cars, and our workplaces. And so, a rallying cry against excess stuff was born. In 2013, they launched the first Facebook Buy Nothing Project group in their small town off the coast of Seattle, and they never expected it to become a viral sensation. Today there are thousands of Buy Nothing groups all over the world, boasting more than a million members, and 5,000 highly active volunteers. Inspired by the ancient practice of gift economies, where neighbors share and pool resources, The Buy Nothing, Get Everything Plan introduces an environmentally conscious 7-step guide that teaches us how to buy less, give more, and live generously. At once an actionable plan and a thought-provoking exploration of our addiction to stuff, this powerful program will help you declutter your home without filling landfills, shop more thoughtfully and discerningly, and let go of the need to buy new things. Filled with helpful lists and practical suggestions including 50 items you never need to buy (Ziploc bags and paper towels) and 50 things to make instead (gift cards and salad dressing), The Buy Nothing, Get Everything Plan encourages you to rethink why you shop and embrace a space-saving, money-saving, and earth-saving mindset of buying less and sharing more.

Glasses for Infrared Optics Valentina F. Kokorina, 1996-05-15 This book explores oxygen-free chalcogenide glasses, the only commercial transparent vitreous materials used for long-wave infrared radiation. The chalcogenides have been the subject of study around the world for many years, and continue to be an important area of research and development in infrared optics. Written by a renowned glass specialist with extensive experience working with chalcogenide glasses, *Glasses for Infrared Optics* includes discussions of: Chalcogenide glasses - a unique class of vitreous substances Optical properties of chalcogenide glasses Elaboration of commercial glasses Technological basics for manufacturing optical chalcogenide glasses The material presented in *Glasses for Infrared Optics* is based on research performed at the Vavilov State Optical Institute in Russia. This is the first and only work that reviews every aspect of chalcogenide glasses. The scope of this comprehensive book is unique, and the major portion of this work has never been published before in English.

Commodities - Switzerland's Most Dangerous Business Berne

Declaration, 2012-05-14 Today marks the release of the controversial book *Commodities: Switzerland's Most Dangerous Business*. The fact-filled and groundbreaking analysis of the industry, as powerful as it is unknown, shows why resource-rich developing countries remain poor while Switzerland-based commodity companies rake in profits in the billions. And it illustrates the

gray areas of a business model whose risks are becoming increasingly apparent. Unnoticed by the public and politicians, Switzerland has become the world's most important commodities hub. Trade in oil, gas, coal, metals and agricultural products - particularly via deals made in Geneva and Zug - has grown by an incredible 1,500 percent since 1998, according to BD investigations. The result: Seven of the twelve corporations with the highest turnover in Switzerland trade in, and/or mine, commodities. Switzerland has become a global commodity hub thanks to its mix of tax privileges, a strong financial sector, weak regulation and lax embargo policy. The Swiss commodities business is dangerous for developing countries that are blessed with natural resources but that suffer from weak governance. The business is life-threatening for all those who must live amid the filth and toxins of the mines and facilities. The extensive misery of entire countries and the fairytale wealth of a few Swiss top traders are causally related. The book *Commodities: Switzerland's Most Dangerous Business* shows how. The richly-illustrated reference work offers a portrait of the key firms and people behind the discreet deals, provides insight into the social and ecological consequences for the producing countries, analyzes the practices and repercussions of tax avoidance and speculation, and offers proposals for achieving more justice in a multi-billion-dollar business that affects everyone.

Confessions of a Tarot Reader Jane Stern, 2012-09-04 Tarot cards have been

used to foretell the future for centuries. Once the domain of the esoteric and mystical, tarot today has many practical applications in the modern world. Jane Stern, a fourth generation tarot reader perhaps best known for Roadfood, has given the art of the tarot a very modern spin. Using the twenty-two major arcana cards (the “heart of the tarot”) as chapters, she has gleaned all she has learned over the years and presents Confessions of a Tarot Reader as a witty, readable, and useful self-help book. In her own words, the author likes to think of herself as a “psychic Dear Abby,” and by drawing on the wisdom of the tarot deck, to give practical advice in every life situation and lift the veil between this world and the unseen beyond.
