Free Convection Film Flows and Heat Transfer De-Yi Shang, 2013-04-09 This book presents recent developments in our systematic studies of hydrodynamics and heat and mass transfer in laminar free convection, accelerating film boiling and condensation of Newtonian fluids, as well as accelerating film flow of non-Newtonian power-law fluids (FFNF). These new developments provided in this book are (i) novel system of analysis models based on the developed New Similarity Analysis Method; (ii) a system of advanced methods for treatment of gas temperature- dependent physical properties, and liquid temperature- dependent physical properties; (iii) the organically combined models of the governing mathematical models with those on treatment model of variable physical properties; (iv) rigorous approach of overcoming a challenge on accurate solution of three-point boundary value problem related to two-phase film boiling and condensation; and (v) A pseudo-similarity method of dealing with thermal boundary layer of FFNF for greatly simplifies the heat-transfer analysis and numerical calculation. A system of practical application equations on heat and mass transfer are provided in each chapter, which are formulated based on the rigorous numerical solutions with consideration of variable physical properties. In addition, in the second edition, other new research developments are further included on resolving an even big challenge associated with investigations of laminar free film condensation of vapour-gas mixture. They involve the novel methods for

treatment of concentration- and temperature- dependent physical properties of vapour-gas mixture, and for rigorous solution of interfacial vapour saturation temperature, which have lead to rigorous analysis and calculation results on two-phase film flow velocity, temperature, and concentration fields, as well as condensate heat and mass transfer.

Thin Films From Free Atoms and Particles Kenneth Klabunde, 2012-12-02 Thin Films from Free Atoms and Particles is an eight-chapter text that describes the primary reaction modes of atoms or coordination-deficient particles. This book presents first an introduction to free atoms and particles, followed by a chapter describing the embryonic growth of films, such as dimers, trimers, and other small telomers formed and detected. The next chapters discuss the understanding of discharge processes for forming free atoms and particles. The remaining chapters deal with the technology, techniques, and materials in thin films. Physicists, engineers, materials scientists, and chemists will find this book of great value.

Scheduling and Budgeting Your Film Paula Landry, 2012 On time and on budget: the Holy Grail for filmmakers. Budgeting and scheduling are easy in principle but hard in practice. The successful producer has a solid plan for juggling

dozens of activities and costs while retaining the flexibility to cope with those inevitable last-minute changes and stay on course. Other resources look at budgeting and scheduling in isolation; this book is unique in covering the two closely intertwined activities in a single volume. Readers get both topics for the price of one book; competitors cover each topic separately. All the fundamentals of line producing are covered in a quick-reference format and the tips apply no matter what kind of scheduling or budgeting software you're using. Check out the book's website at <http://booksite.focalpress.com/filmscheduling> • Useful tricks of the trade show you how to squeeze the most of a limited budget and tight schedule • Includes specific tips for film, video, shorts, online projects, corporate and educational video, and docs • Companion web site features useful forms/templates, and 60 minutes of video demonstrating line producing techniques and case studies—see the principles put to work! • Includes sample budgets/schedules from different types of projects that you can adapt and use for your own project

This Life Martin Hägglund,2019 Hägglund argues that a faith not in God or eternal life, but in the finite, temporal life we lead here on earth is one that gives that life far greater depth of meaning. In contrast to the traditional religious faith in eternity, he proposes a secular faith in the value of living in time. His book provides not only a critique of religious ideals, but also a positive, alternative understanding of the beliefs and values that can motivate us to live lives of meaning in the here and now. -- adapted from jacket

Popular Science ,1960-08 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Scheduling and Budgeting Your Film Paula Landry,2017-06-26 Budgeting and

scheduling are easy in principle but hard in practice. The successful producer has a solid plan for juggling dozens of activities and costs while retaining the flexibility to cope with those inevitable last-minute changes and stay on course. Preplanning the budget and schedule of any media project is absolutely essential, and the 2nd edition of *Scheduling and Budgeting Your Film: A Panic-Free Guide* shows you the intricacies of handling both budgeting and scheduling successfully. This new and updated edition explains the fundamentals of line producing in an easy-to-understand style, and includes tips and techniques that apply no matter what kind of scheduling or budgeting software you're using. Author Paula Landry includes detailed examples of breakdown forms, organizing resources, distribution expenses, and hidden costs, and discusses how to set realistic priorities and find industry and state tax incentives. The new edition also includes discussions of transmedia and multi-purpose shooting, special considerations for VR, 4K and 3D shooting, new web platforms and mobile technology, crowd funding, film festivals, and much more. Each chapter is filled with handy checklists, tips, practical advice, and anecdotes, showing how scheduling and budgeting are done in the real world; Principles apply to any type of media project: film, video, music video, projects hosted online, and corporate and educational videos; An accompanying eResources page offers downloadable forms and templates, and other essential resources.
