Finger Positions for the Violin TOM GILLAND, 2010-10-07 The intention of this book is to illustrate where the fingers of the left hand are placed on the fingerboard of the violin. the diagrams showing the relative positions of the fingers in each key are complemented by music notation. No attempt is made to show the exact positions of the fingers on the fingerboard, since this depends on several factors. What is shown is where two fingers are either close together, as for a semi-tone, or further apart, as for a tone. the first four positions are illustrated for all keys. Those patterns can then be repeated for the higher positions.

Woodwind Basics Bret Pimentel, 2021-11-09 Woodwind Basics: Core concepts for playing and teaching flute, oboe, clarinet, bassoon, and saxophone is a fresh, no-nonsense approach to woodwind technique. It outlines the principles common to playing all of the woodwind instruments, and explains

their application to each one. The ideas in this book are critical for woodwind players at all levels, and have been battle-tested in university woodwind methods courses, private studios, and school band halls. Fundamental questions answered with newfound clarity include:- What should I listen for in good woodwind playing?- Why is breath support so important, and how do I do and teach it?- What is voicing? How does it relate to ideas like air speed, air temperature, and vowel shapes?- What things does an embouchure need to accomplish?- How can I (or my students) play better in tune?- What role does the tongue really play in articulation?- Which alternate fingering should I choose in a given situation?- How do I select the best reeds, mouthpieces, and instruments?- How should a beginner choose which instrument is the best fit? *Woodwind Basics* by Bret Pimentel is the new go-to reference for woodwind players and teachers.

Basic Piccolo Fingering Chart Helen Winter, This book aims to help beginners play the piccolo simply and easily. The book includes 36 piccolo diagrams with fingering positions, along with pitch names and staff notations and 36 illustrations of the fingering location on the piccolo itself. The piccolo

is about half the size of a flute, and it sounds one octave higher. It plays the highest notes of the woodwind family. The piccolo also is a transposing instrument, and the piccolo's sheet music is never written at the pitch it actually sounds. Instead, the piccolo sounds one octave higher than its written pitch. The musical notes in this book cover almost 3 octaves from D4 to C7 (written). The resulting sound on the piccolo is from D5 to C8. Here are the primary fingerings (basic charts). Note that the book does not include Trill or Tremolo fingerings. You can cut out the charts or use them in the booklet. Each note here has its own piece of paper. One side of the page shows the connection between the dots and their fingering on a diagram, and the reverse side depicts the same fingering illustration on the piccolo itself. Under the piccolo pictures, you will also find the fingering combinations depicted with the names of the keys. You may choose a style that is more understandable and comfortable for you. We hope these fingering charts will be a valuable visual aid for you and your kids or students. The size of the cut-out is 6.5x10 inches (16x25 cm).
