A Pinstriped Finger's My Only Friend Robert Jeschonek,2013-07-16 Judd the popular 17-year-old jock has it all figured out. He's the star of his school, the top of the heap...but then the world starts changing around him and won't stop. Without explanation, everyone turns into purple furries...then gas-blasting puffballs...then neurotic lizards. Every time Judd falls asleep, he wakes up in a new and crazier world--a world of godlike super-teens, teenage serial killers, duck people, nudists, monsters, and more. It's like a twisted video game without rhyme or reason. The rules never stop changing, and the only thing he can depend on is his talking pinky finger with a major attitude. Together, he and Pinkerton (the finger prefers the name Killdigit!) fight through the parade of crazy realities, seeking a way to get back to normal. But what if normal just isn't an option anymore? Don't miss this wild fantasy by the award-winning author of *My Favorite Band Does Not Exist*, which won the Forward National Literature Award and was named a Top Ten First Novel for Youth by Booklist. Reviews Robert

Jeschonek is the literary love child of Tim Burton and Neil Gaiman. His fiction is cutting edge, original, and pulsing with dark and fantastical life. – Adrian Phoenix, critically acclaimed author of The Maker's Song series and Black Dust Mambo Robert Jeschonek is a towering talent. – Mike Resnick, Hugo and Nebula Award-winning author Jeschonek's stories are delightfully insane, a pleasure to read... – Fabio Fernandes, Fantasy Book Critic

The Finger Angus Trumble, 2010-05-11 FROM THE AUTHOR OF A BRIEF HISTORY OF THE SMILE, A COMPLETE INDEX OF THE DIGIT In this collision between art and science, history and pop culture, the acclaimed art historian Angus Trumble examines the finger from every possible angle. His inquiries into its representation in art take us from Buddhist statues in Kyoto to the ceiling of the Sistine Chapel, from cave art to Picasso's Guernica, from Van Dyck's and Rubens's winning ways with gloves to the longstanding French taste for tapering digits. But Trumble also asks intriguing questions about the finger in general: How do fingers work, and why do most of us have five on each hand?

Why do we bite our nails? This witty, odd, and fascinating book is filled with diverse anecdotes about the silent language of gesture, the game of love, the spinning of balls, superstitions relating to the severed fingers of thieves, and systems of computation that were used on wharves and in shops, markets, granaries, and warehouses throughout the ancient Roman world. Side by side with historical discussions of rings and gloves and nail polish are meditations on the finger's essential role in writing, speech, sports, crime, law, sex, worship, memory, scratching politely at eighteenth-century French doors (instead of crudely knocking), or merely satisfying an itch—and, of course, in the eponymous show of contempt.

ChiRunning Danny Dreyer,Katherine Dreyer,2009-05-05 The revised edition of the bestselling ChiRunning, a groundbreaking program from ultra-marathoner and nationally-known coach Danny Dreyer, that teaches you how to run faster and farther with less effort, and to prevent and heal injuries for runners of any age or fitness level. In ChiRunning, Danny and Katherine Dreyer, well-known walking and running coaches, provide powerful insight that transforms running from a high-injury sport to a body-friendly, injury-free fitness phenomenon. ChiRunning employs the deep power reserves in the core muscles, an approach found in disciplines such as yoga, Pilates, and T'ai Chi. ChiRunning enables you to develop a personalized exercise program by blending running with the powerful mind-

body principles of T'ai Chi: -Get aligned: Develop great posture and reduce your potential for injury while running, and make knee pain and shin splints a thing of the past. -Engage your core: Shift the workload from your leg muscles to your core muscles, for efficiency and speed. -Add relaxation to your running: Learn to focus your mind and relax your body to increase speed and distance. -Make it a Mindful Practice: Maintain high performance and make running a mindful, enjoyable life-long practice. It's easy to learn. Transform your running with the ten-step ChiRunning training program.

Zinc Finger Proteins Shiro Iuchi, Natalie Kuldell, 2007-03-06 In the early 1980s, a few scientists started working on a *Xenopus* transcription factor, TFIIIA. They soon discovered a novel domain associated with zinc, and named this domain zinc finger. The number of proteins with similar zinc fingers grew quickly and these proteins are now called C2H2, Cys2His2 or classical zinc finger proteins. To date, about 24,000 C2H2 zinc finger proteins have been recognized. Approximately 700 human genes, or more than 2% of the genome, have been estimated to encode C2H2 finger proteins. From the beginning these proteins were thought to be numerous, but no one could have predicted

such a huge number. Perhaps thousands of scientists are now working on C2H2 zinc finger proteins from various viewpoints. This field is a good example of how a new science begins with the insight of a few scientists and how it develops by efforts of numerous independent scientists, in contrast to a policy-driven scientific project, such as the Human Genome Project, with goals clearly set at its inception and with work performed by a huge collaboration throughout the world. As more zinc finger proteins were discovered, several subfamilies, such as C2C2, CCHC, CCCH, LIM, RING, TAZ, and FYVE emerged, increasing our understanding of zinc fingers. The knowledge was overwhelming. Moreover, scientists began defining the term zinc finger differently and using various names for identical zinc fingers. These complications may explain why no single comprehensive resource of zinc finger proteins was available before this publication.
