**Handbook of Research Methods and Applications in Urban Economies** Peter Karl Kresl, Jaime Sobrino, 2013-01-01 'I highly recommend students, teachers and researchers to enjoy reading this set of excellent papers.' - Boris Graizbord, El Colegio de México, Mexico 'It is obvious that cities have long been the focus of analysis by the scholars and practitioners whose writings published in the Kresl-Sobrino Handbook of Research Methods and Applications in Urban Economies. The depth and excellence of the numerous topics examined reflects effective networking between the scholars involved, their analyses of approaches, problems and potentials of cities on the numerous continents, and the continuing role of the Global Urban Competitiveness Project in encouraging the development of methodologies and data helpful in understanding the hard and soft determinants of the growth and decline of cities.' - Pierre-Paul Proulx, Université de Montréal, Canada 'This collection of essays provides a rich assortment of methods used to investigate the complex economic, social, environmental, demographic and political systems in cities throughout the world. It gives researchers, lecturers and students a useful taste of the different ways of studying these phenomena in diverse urban settings.' - Ivan Turok, University of Glasgow, UK In this timely Handbook, seventeen renowned contributors from Asia, the Americas and Europe provide chapters that deal with some of the most intriguing and important aspects of research methodologies on cities and urban economies. The Handbook comprises five parts: methodology, continental distinctions, positioning cities, planning for the future, and urban structures. The 'methodologies' section includes interviews, empirical and theoretical approaches whilst 'continental distinctions' offers contributions on China, North America, Europe, Latin America and South Africa. 'Positioning' treats cities

in the international context and relates them to economic and administrative spaces whilst 'planning' includes general strategic economic planning, as well as the experience of individual cities. Finally, the 'structures' section refers to contextual and situational aspects of urban development. Providing a comprehensive study of urban development and competitiveness, this Handbook will strongly appeal to students wishing to gain a deeper understanding of research methods in urban economics, urban studies and planning.

Medical Muses Asti Hustvedt, 2012-01-01 In 1862 the Salpêtrière Hospital in Paris became the epicenter of the study of hysteria, the mysterious illness then thought to affect half of all women. There, prominent neurologist Jean-Martin Charcot's contentious methods caused furore within the church and divided the medical community. Treatments included hypnosis, piercing and the evocation of demons and, despite the controversy they caused, the experiments became a fascinating and fashionable public spectacle. Medical Muses tells the stories of the women institutionalised in the Salpêtrière. Theirs is a tale of science and ideology, medicine and the occult, of hypnotism, sadism, love and theatre. Combining hospital records, municipal archives, memoirs and letters, Medical Muses sheds new light on a crucial moment in psychiatric history.

same opportunities exist for using metal and metalloid species.
