It is not professional psychotherapy, and those providing this kind of aid do not need a degree to help. Gerard Jacobs has developed this community-based method of delivering PFA over 20 years and has taught it in over 30 countries. Along with the easy-to-follow method, Jacobs includes examples of how this works in action in different situations, and presents scenarios to practice. Unique in its approach of community engagement to train community members to help each other, this guide is an excellent resource for local emergency managers to engage in whole community emergency management. Presents a proven method for helping to alleviate the mental health effects of disasters, terrorist attacks, civil unrest, and other community stressors Offers a community-based model developed and taught by an international expert for over 20 years, requiring no advanced training or education in psychology to use Provides techniques that are adaptable to individual communities or cultures Outlines practices for self-care while helping others to prevent burnout Includes case studies, scenarios, and key terms to help facilitate community training
