**Rising Above a Toxic Workplace** Gary Chapman,Paul White,2014-08-26 Learn how to thrive in—or escape from—a toxic work environment. Toxic organizations are rife with conflict, fear, and anger. The environment causes people to have physiological responses as if they're in a fight-or-flight situation. Healthy people become ill. Colds, flu and stress-related illnesses such as heart attacks are more common. By contrast, in resonant organizations, people take fewer sick days and turnover is low. People smile, make jokes, talk openly and help one another. - Annie McKee (author, consultant) Many employees experience the reality of bullying bosses, poisonous people, and soul-crushing cultures on a daily basis. Rising Above a Toxic Workplace tells authentic stories from today's workers who share how they cope, change, or quit. Candidly they open up about what they learned, what they wish they had done, and how to gain resilience. Insightfully illustrating from these accounts, authors Gary Chapman, Paul White, and Harold Myra blend their combined experiences in ministry and business to deliver hope and practical guidance to those who find themselves in an unhealthy work environment. Includes a Survival Guide and Toolkit full of strategies and realistic insights

**Make Their Day!** Cindy Ventrice, 2003 Written from the employees' viewpoint, this book explains why good working relationships form the core of effective workplace recognition.

**Leadership Is Language** L. David Marquet, 2020-02-04 Wall Street Journal Bestseller From the acclaimed author of *Turn the Ship Around!*, former US Navy Captain David Marquet, comes a radical new playbook for empowering your team to make better decisions and take greater ownership. You might imagine that an effective leader is someone who makes quick, intelligent decisions, gives inspiring speeches, and issues clear orders to their team so they can execute a plan to achieve your organization's goals. Unfortunately, David Marquet argues, that's an outdated model of leadership that just doesn't work anymore. As a leader in today's networked, information-dense business climate, you don't have full visibility into your organization or the ground reality of your operating environment. In order to harness the eyes, ears, and minds of your people, you need to foster a climate of collaborative experimentation that encourages people to speak up when they notice problems and work together to identify and test solutions. Too many leaders fall in love with the sound of their own voice, and wind up dictating plans and digging in their heels when problems begin to emerge. Even when you want to be a more collaborative leader, you can undermine your own efforts by defaulting to command-and-control language we've inherited from the industrial era. It's time to ditch the industrial age playbook of leadership. In *Leadership Is Language*, you'll learn how choosing your words can dramatically improve decision-making and execution on your team. Marquet outlines six plays for all leaders, anchored in how you use language: • Control the clock, don't obey the clock: Pre-plan decision points and give your people the tools they need to hit pause on a plan of action if they notice something wrong. • Collaborate, don't coerce: As the leader, you should be the last one to offer your opinion. Rather than locking your team into binary responses (Is this a good plan?), allow them to answer on a scale (How confident are you about this plan?) • Commit, don't comply: Rather than expect your team to comply with specific directions, explain your overall goals, and get their commitment to achieving it one piece at a time. • Complete, not continue: If every day feels like a repetition of the last, you're doing something wrong. Articulate concrete plans with a start and end date to align your team. • Improve, don't prove: Ask your people to improve on plans and processes, rather than prove that they can meet fixed goals or deadlines. You'll face fewer cut corners and better long-term results. • Connect, don't conform: Flatten hierarchies in your organization and connect with your people to encourage them to contribute to decision-making. In his last book, *Turn the Ship Around!*, Marquet told the incredible story of abandoning command-and-control leadership on his submarine and empowering his crew to turn the worst performing submarine to the best performer in the fleet. Now, with *Leadership Is Language* he gives businesspeople the tools they need to achieve such transformational leadership in their organizations.

*The Fourth Industrial Revolution* Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
