Tony L. Jones

Flashlight Lizi Boyd,2014-08-12 Inside the tent it's cozy, but what is going on outside? Is it dark? Is it scary? Not if you have your trusty flashlight! A charming story told solely through images: Through neatly drawn illustrations and a spare yet dramatic color palette, artist Lizi Boyd offers an enchanting exploration of night, nature, and art with *Flashlight*. Both lyrical and humorous, this visual poem—like the flashlight beam itself—reveals there is magic in the darkness. We just have to look for it. • A wordless storybook with stunning visuals that aims to lighten the fear of the dark and the noises that come with it • Book inspires the imagination and creativity in young minds • Lizi Boyd is the author and illustrator of many children's books, including *Inside Outside* and *Flashlight*, and also creates papers, ribbons, cards, and other works of delight *Flashlight* allows readers to experience the wonder and excitement of nighttime exploration in the woods and wordlessly entices readers to explore the hidden nature outside their own homes. —The Busy Librarian • Appeals to readers of all ages with the calming, yet adventurous tone • Books for kids ages 5-6 • Children's picture books for preschool through first grade

Flashlight Dinosaurs Mark Shulman,2004 This pair of novelty books feature die-cut shapes that glow in the dark and die-cut paper monsters that, when kids shine a flashlight beam, are projected on the wall. Kids can make their own shadow monster movies after they've read each book's humorously rhymed story. Full color.

Flashlights Billy T. Utley,2001

Collecting Flashlights Stuart Schneider,1996 Let There Be Light. Borrowing from the bible, the Eveready Co. used this phrase on the cover of its 1899 catalog, along with a hand from the heavens pointing a flashlight at the earth. Those were the beginning years of the flashlight, originally promoted to help sell batteries and growing to become an essential safety product in every American household and automobile. Never before has there been an extensive treatment of the flashlight from an historical and collectible point of view. In this beautifully illustrated full color volume, Stuart Schneider brings a fascinating world to light. With flashlights ranging from the purely practical to the elegantly stylish, to the playthings of children, the reader will begin to appreciate the beauty of their design and their inventiveness. 458 color photographs illustrate the book, each accompanied by an informative caption and the value of the model in today's market. Histories of many companies and important information for collectors is also included.

Flashlight Night Matt Forrest Esenwine,2017-09-19 *Flashlight Night* is an ode to the power of

imagination and the wonder of books. Three children use a flashlight to light a path around their backyard at night; in the flashlight's beam another world looms. Our heroes encounter spooky woods, a fearsome tiger, a time-forgotten tomb, an Egyptian god, a sword-fighting pirate, and a giant squid. With ingenuity, they vanquish all, then return to their tree house—braver, closer, and wiser than before—to read the books that inspired their adventure.

Sweet Dreams, Little Bear Emily Skwish,2017-02-15 Little Bear is taking a drowsy, dreamy walk through the friendly nighttime forest on his way home to bed in this rhyming bedtime story. Use the real, working flashlight to shine a gentle glow on the pop-up pages to see what shadows are created. 5 buttons right on the flashlight play soothing sounds and songs, including Twinkle, Twinkle, Little Star. Sweet dreams, little one!

Make Your Own Led Flashlight Julia Garstecki,Stephanie Derkovitz,2020 Teaches readers how to make their very own LED flashlights through simple supply lists and clear, step-by-step instructions and images--

Experiments with a Flashlight Angela Royston,2016 This low-level title introduces young students to the physical properties of light through an interactive approach. The science of light is explained to the reader through a series of photo-illustrated, step-by-step experiments, shown as being performed by their elementary-aged peers. The accessible text and experiments combine to teach important scientific concepts as well as promote critical thinking in young students. The (fun!) experiments strongly support STEM and CCSS programs, while also sparking ideas for science fair and maker spaces projects.

Defensive Tactics with Flashlights John G. Peters,1982-01-01

The Police Officer's Guide to Operating and Surviving in Low-light and No-light Conditions Tony L. Jones,2002 This book reminds the reader that many police shootings occur during diminished light, and with few exceptions, officers do not receive enough training in these conditions; in addition,

recommendations are made for officers to use senses other than vision, teamwork, and technological innovations to increase an officer's chance of success when working in dim-light or no-light conditions. The majority of crimes and officer shootings occur at night in diminished light or no-light settings. The Federal Bureau of Investigation reports that during a 9-year period (1985-1994), almost 63 percent of police officer deaths occurred between 6:00 p.m. and 6:00 a.m. During these hours, it is difficult for officers to accurately identify an alleged suspect's face easily or identify any weapons he or she may be in possession of. Add stress and an increased heart rate to an already tense situation and it is easy to understand the need for additional training under these conditions. The dark is fraught with peril and danger, but increased training can alleviate stress and increase proficiency. Moreover, officers can rely upon other senses and additional training can help facilitate decision-making under these difficult circumstances. Technological advances and team techniques can also be incorporated into officer training. Directional microphones, night vision and thermal imaging devices and infrared lights are a few of the technological advances that may aid officer shootings during dim-light or no-light environments.
