**Freedom of the Screen** Laura Wittern-Keller,2008-01-11 At the turn of the twentieth century, the proliferation of movies attracted not only the attention of audiences across America but also the apprehensive eyes of government officials and special interest groups concerned about the messages disseminated by the silver screen. Between 1907 and 1926, seven states—New York, Pennsylvania, Ohio, Virginia, Kansas, Maryland, and Massachusetts—and more than one hundred cities authorized censors to suppress all images and messages considered inappropriate for American audiences. Movie studios, hoping to avoid problems with state censors, worrying that censorship might be extended to the federal level, and facing increased pressure from religious groups, also jumped into the censoring business, restraining content through the adoption of the self-censoring Production Code, also known as the Hays code. But some industry outsiders, independent distributors who believed that movies deserved the free speech protections of the First Amendment, brought legal challenges to censorship at the state and local levels. Freedom of the Screen chronicles both the evolution of judicial attitudes toward film restriction and the plight of the individuals who fought for the right to deliver provocative and relevant movies to American audiences. The path to cinematic freedom was marked with both achievements and roadblocks, from the establishment of the Production Code Administration, which effectively eradicated political films after 1934, to the landmark cases over films such as *The Miracle* (1948), *La ronde* (1950), and *Lady Chatterley’s Lover* (1955) that paved the way for increased freedom of expression. As the fight against censorship progressed case by case through state courts and the U.S. Supreme Court, legal authorities and the public responded, growing increasingly sympathetic toward artistic freedom. Because a small, unorganized group of independent film distributors and exhibitors in mid-twentieth-century America fought back against what they believed was the unconstitutional prior restraint of motion pictures, film after 1965 was able to follow a new path, maturing into an artistic medium for the communication of ideas, however controversial. Government censors would no longer control the content of America’s movie screens. Laura Wittern-Keller’s use of previously unexplored archival material and interviews with key figures earned her the researcher of the year award from the New York State Board of Regents and the New York State Archives Partnership Trust. Her exhaustive work is the first to discuss more than five decades of film censorship battles that rose from state and local courtrooms to become issues of national debate and significance. A compendium of judicial action in the film industry, Freedom of the Screen is a tribute to those who fought for the constitutional right of free expression and paved the way for the variety of films that appear in cinemas today.

**The Accountability of Armed Groups under Human Rights Law** Katharine Fortin, 2017-08-11 Today the majority of the armed conflicts around the world are fought between States and armed groups, rather than between States. This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law. While it is generally accepted that armed groups are bound by international humanitarian law, the question of whether they are also bound by human rights law is controversial. This book brings significant new understanding to the question of whether and when armed groups might be bound by human rights law. Its conclusions will benefit international law academics, legal practitioners, and political scientists and anthropologists working on issues related to rebel governance and civil wars. This book addresses the debate on this topic by employing a theoretical, historical, and comparative analysis that spans international humanitarian law, international criminal law, and international human rights law. Embedding these different perspectives in public international law, this book brings several key points of clarification to the legal framework. Firstly, the book draws upon social science literature on armed conflict to present a new viewpoint on the role that human rights law plays vis-à-vis international humanitarian law in non-international armed conflicts. Secondly, the book sheds light on the circumstances in which armed groups acquire obligations under human rights law. It brings illumination to these topics by combining historical and comparative research on belligerency, insurgency, and international humanitarian law with a theoretical analysis of legal personality under international law. In the final part of the book, the author tests the four most utilised theories of how armed groups are bound by human rights law, examining whether armed groups can be bound by virtue of (i) treaty law (ii) control of territory (iii) international criminal law and (iv) customary international law. In the book's conclusions, the author presents final remarks that are designed to provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice.

Bargaining for Life Barbara Bates, 2015-07-27 Tuberculosis was the most common cause of death in the United States during the nineteenth century. The lingering illness devastated the lives of patients and families, and by the turn of the century, fears of infectiousness compounded their anguish. Historians have usually focused on the changing medical knowledge of tuberculosis or on the social campaigns to combat it. Using a wide range of sources, especially the extensive correspondence of a Philadelphia physician, Lawrence F. Flick, in *Bargaining for Life* Barbara Bates documents the human story by chronicling how men and women attempted to cope with the illness, get treatment, earn their living, and maintain social relationships.
