Internet Multimedia Search and Mining Xian-Sheng Hua,Marcel Worring,Tat-Seng Chua,2013-09-17 With the explosion of video and image data available on the Internet, desktops and mobile devices, multimedia search has gained immense importance. Moreover, mining semantics and other useful information from large-scale multimedia data to facilitate online and local multimedia content analysis, search, and other related

applications has also gained an increasing attention from the academia and industry. The rapid increase of multimedia data has brought new challenges to multimedia content analysis and multimedia retrieval, especially in terms of scalability. While on the other hand, large-scale multimedia data has also provided new opportunities to address these challenges and other conventional problems in multimedia analysis. The massive associated metadata, context and social information available on the Internet, desktops and mobile devices, and the large number of grassroots users, are a valuable resource that could be leveraged to solve the these difficulties. This is the first reference book on the subject of internet multimedia search and mining and it will be extremely useful for graduates, researchers and working professionals in the field of information technology and multimedia content analysis.

Multilingualism Online Carmen Lee,2016-09-13 By the co-author of Language Online, this book builds on the earlier work while focusing on multilingualism in the digital world. Drawing on a range of digital media – from email to chatrooms and social media such as Facebook, Instagram, and YouTube – Lee demonstrates how online multilingualism is closely linked to people's offline literacy practices and identities, and examines the ways in which people draw on multilingual resources in their internet participation. Bringing together central concepts in sociolinguistics and internet linguistics, the eight chapters cover key issues such as: language choice code-switching identities language ideologies minority languages online translation. Examples in the book are drawn from both all the major languages and many lesser-written ones such as Chinese dialects, Egyptian Arabic, Irish, and Welsh. A chapter on methodology provides practical information for students and researchers interested in researching online multilingualism from a mixed methods and practice-based approach. Multilingualism Online is key reading for all students and researchers in the area of multilingualism and new media, as well as those who want to know more about languages in the

Digital Photography and Everyday Life Edgar Gómez Cruz,Asko Lehmuskallio,2016-05-20 Digital Photography and Everyday Life: Empirical studies on material visual practices explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making process in wider discussions on the materiality and visuality of photographic practices and explores these through empirical case

studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the development of visual digital cultures. Digital Photography and Everyday Life will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.

New Developments in Online Marketing Stephen Tagg,Alan Stevenson,Tiziano Vescovi,2013-09-13 There can be little doubt about the profound impact that the Internet has had on all aspects of business over the past decade. Indeed, it is now widely accepted that we have entered a new and even more revolutionary phase in the development of the Net as a global marketing and communications platform; a phase characterised by information 'pull' rather than 'push', user-generated content, openness, sharing, collaboration, interaction, communities, and social networking. New generation Web-based communities and hosted applications are beginning to have a major impact on customer behaviour across a diverse range of industries. These new applications represent a fundamental change in the way people use the Internet, their online expectations, and experiences. From a marketing perspective, the most distinctive feature is not the technology involved but rather the growth of a new global culture – a 'Net generation' culture based on decentralised authority rather than hierarchy and control, online socialising and collaboration, user-generated and distributed content, open communications, peer-to-peer sharing, and global participation. Success in this new online environment,

characterised by people and network empowerment, requires new 'mindsets' and innovative approaches to marketing, customer, and network relationships. This book makes a valuable contribution to the field by examining recent and future developments in online marketing, including the revolutionary impact of new media. Chapters cover a wide range of topics, including: information exchange on bulletin board systems and in online consumer portals; Web 2.0 and 'New-Wave Globals'; online tribal marketing; co-creation; industry impact; privacy issues; online advertising effectiveness; and practitioner prognostics for the future of online marketing. This book was originally published as a special issue of the Journal of Marketing Management.

Discourse 2.0 Deborah Tannen,Anna Marie Trester,2013-03-12 Our everyday lives are increasingly being lived through electronic media, which are changing our interactions and our communications in ways that we are only beginning to understand. In Discourse 2.0: Language and New Media, editors Deborah Tannen and Anna Marie Trester team up with top scholars in the field to shed light on the ways language is being used in, and shaped by, these new media contexts. Topics explored include: how Web 2.0 can be conceptualized and theorized; the role of English on the worldwide web; how use of social media such as Facebook and texting shape communication with family and friends; electronic discourse and assessment in educational and other settings; multimodality and the participatory spectacle in Web 2.0; asynchronicity and turn-taking; ways that we engage with technology including reading on-screen and on paper; and how all of these processes interplay with meaning-making. Students, professionals, and individuals will discover that Discourse 2.0 offers a rich source of insight into these new forms of discourse that are pervasive in our lives.

The Future of English in Asia Michael O'Sullivan,David Huddart,Carmen Lee,2015-10-05 This collection is unique in bringing together key thinkers on language and literature to discuss the future of English in Asia. Many of the contributors are themselves responsible for important sub-genres in English linguistics and literary studies and this collection gives them the opportunity to respond to each other directly. The different chapters also respond to different contemporary debates and emerging trends and discourses that are hugely important for the future of English language teaching in schools across Asia. This volume is also ground-breaking in bringing English literary studies and Applied English Linguistics together in the contemporary Asian context. The Future of English in Asia includes studies on the following subject areas: Cultural Translation in World Englishes, Multilingual Education, English Futures and the function of Literature, English Literary Studies in Japan, and English and Social Media in Asia. Well into this century, it appears that it is still very difficult to know what to expect when it comes to the future of English. The future of English will continue to be determined by complex local contexts. As it has in other parts of the world, the future of English in Asia will continue to rely on the proliferation of its transformations as much as its hegemonic status. This volume reflects the widespread acknowledgement that whatever future English has will inevitably be shaped by its fate in Asia. The collection will be a welcome resource for scholars and students of

English linguistics, English literary studies, and topics related to the teaching of English in Asia.

When people come together over the Web, the result can be much more than the sum of the parts. The customers themselves help build the site, as old-fashioned word of mouth becomes hypergrowth. Web 2.0: A Strategy Guide demonstrates the power of this new paradigm by examining how: Flickr, a classic user-driven business, created value for itself by helping users create their own value Google made money with a model based on free search, and changed the rules for doing business on the Web-opening opportunities you can take advantage of Social network effects can support a business-ever wonder how FaceBook grew so quickly? Massive Open Online Courses and Higher Education Rebecca Bennett,Mike Kent,2017-04-21 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and

revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.
