Visual Fractions Pi Squared,2011-05-28 This math workbook from the Dr. Pi Squared Math Workbooks series aims to teach what a fraction is and help kids visualize fractions. It is designed for kids who are just learning about fractions. The problems consist of colorful pictures from which kids are to determine fractions. The book begins with circles cut into pie slices, from halves to twelfths. The students need to determine what fraction of each pie is blue, yellow, and red. For example, if a pie is divided into fourths, two of which are blue, one yellow, and the other red, the student would answer one-half, one-fourth, and one-fourth. After ample practice with pie slices, the workbook moves onto triangles, squares, and hexagons. A couple of pages include groups of circles where kids need to determine fractions greater than one - for example, two and a half circles might be colored green. Other visual fraction problems include rectangles, smiley faces, arrows, letters, and numbers. Toward the end of the workbook, some questions ask about more than just colors - like what fraction of the arrows point up, or what fraction of the letters are vowels. Answers are nicely organized by page number in the back of the book to allow students, parents, or teachers to quickly check the answers. There is ample workspace for students to write large answers and still fit their solutions comfortably into the space provided. The problems appear in a large font size, since students usually write larger than standard textbook fonts. High-quality, durable, bright paper is used (instead of standard workbook paper, which often tears easily and appears dull in color).

Making Sense of Fractions Randy Palisoc,2014-08-06 Frustrated with fractions? They're easier than you think. Fractions have been given a bad rap. Understanding fractions is essential in math, yet too many students struggle to make sense of them. Even if students have performed well in math early in elementary school, they seem to hit a brick wall when it comes the abstract concepts involved with fractions. This is how Making Sense of Fractions helps. This unit challenges the long-held assumption that fractions are difficult because they're abstract. Fractions are actually more concrete and more logical than most people realize. Making Sense of Fractions helps students make these realizations, and it has a different philosophy from past approaches. This unit explains fractions in a more concrete way that makes logical sense to students (and to adults), making fractions easier to learn than before. Essential concepts include: * Simplifying Fractions * Adding Fractions * Subtracting Fractions * Multiplying Fractions * Dividing Fractions * Improper Fractions and Mixed Numbers * GCF (Greatest Common Factor) and LCM (Lowest Common Multiple)

Fancy Fractions Christina L. Gawlik,Taylor Olivarez,2012-03-16 Students of all ages often struggle with mathematics concepts, and might even cringe when they hear the word fraction. The purpose of this workbook is to increase conceptual development of fraction concepts and computations through hands-on investigations that contextualize the mathematics. Pattern Blocks(r) are familiar manipulatives in the elementary classroom, frequently used for teaching geometry and measurement content. In this book, students investigate fraction tasks through area or region models with Pattern Blocks(r). The use of area models will help students visualize parts of the whole or region, and can help develop equal share concepts.This workbook includes six sections of investigations that allow students to master concepts of fractions and computations of addition, subtraction, multiplication, and division. Online lessons or materials found in textbooks normally provide only one or two worksheets of problems, which is not enough practice for most students to master the mathematics. This workbook provides a multitude of worksheets for each topic, with a focus on the concrete, pictorial, and abstract levels of learning. A detailed answer key is also provided to help teachers and students assess progress.
