a comprehensive analysis of the technological changes of the past few decades in independent film and media-making, and explores new strategies and practices in media production, exhibition and distribution for independent producers and content creators. The book examines how independent filmmaking concepts have merged with digital and online technologies to create new hybrid multi-platform content creations. The book investigates what kind of stories we tell and why; how the audience has changed, and what their expectations are; what the various niche markets are for independent producers and creators in new media; and new models for media financing and distribution. The content found in this book: Bridges the gap between professional media-makers and amateurs by focusing on new and emerging media models and practices. Provides a holistic view of the new media landscape, and practical advice on producing content in the new multi-platform media environment. Demonstrates how to create financially sustainable models for independent producers and creators in a shifting and unstable environment, providing many challenges, but also opportunities for independents. Like, Comment, Subscribe Mark Bergen,2022-09-06 The gripping inside story

of YouTube, the company that upended media, culture, industry, and democracy—by a leading tech journalist Across the world, people watch more than a billion hours of video on YouTube every day. Every minute, more than five hundred additional hours of footage are uploaded to the site, a technical feat unmatched in the history of computing. YouTube invented the attention economy we all live in today, forever changing how people are entertained, informed, and paid online. Everyone knows YouTube. And yet virtually no one knows how it works. Like, Comment, Subscribe is the first book to reveal the riveting, behind-the-scenes account of YouTube's technology and business, detailing how it helped Google, its parent company, achieve unimaginable power, a narrative told through the people who run YouTube and the famous stars born on its stage. It's the story of a revolution in media and an industry run amok, how a devotion to a simple idea—let everyone broadcast online and make money doing so—unleashed an outrage and addiction machine that spun out of the company's control and forever changed the world. Mark Bergen, a top technology reporter at Bloomberg, might know Google better than any other reporter in Silicon Valley, having broken numerous stories about its successes and scandals. As compelling as the very platform it investigates, Like, Comment, Subscribe is a thrilling, character-driven story of technological and creative ingenuity and the hubris that undermined it.

Asian American Media Activism Lori Kido Lopez, 2016-05-17 Among the most well-known YouTubers are a cadre of talented Asian American performers, including comedian Ryan Higa and makeup artist Michelle Phan. Yet beneath the sheen of these online success stories lies a problem—Asian Americans remain sorely underrepresented in mainstream film and television. When they do

appear on screen, they are often relegated to demeaning stereotypes such as the comical foreigner, the sexy girlfriend, or the martial arts villain. The story that remains untold is that as long as these inequities have existed, Asian Americans have been fighting back—joining together to protest offensive imagery, support Asian American actors and industry workers, and make their voices heard. Providing a cultural history and ethnography, Asian American Media Activism assesses everything from grassroots collectives in the 1970s up to contemporary engagements by fan groups, advertising agencies, and users on YouTube and Twitter. In linking these different forms of activism, Lori Kido Lopez investigates how Asian American media activism takes place and evaluates what kinds of interventions are most effective. Ultimately, Lopez finds that activists must be understood as fighting for cultural citizenship, a deeper sense of belonging and acceptance within a nation that has long rejected them. The Television Will Be Revolutionized, Second Edition Amanda D Lotz, 2014-09-19 Go behind the TV screen to explore what is changing, why it is changing, and why the changes matters Many proclaimed the "end of television" in the early years of the twenty-first century, as capabilities and features of the boxes that occupied a central space in American living rooms for the preceding fifty years were radically remade. In this revised, second edition of her definitive book, Amanda D. Lotz proves that rumors of the death of television were greatly exaggerated and explores how new distribution and viewing technologies have resurrected the medium. Shifts in the basic practices of making and distributing television have not been hastening its demise, but are redefining what we can do with television, what we expect from it, how we use it—in short, revolutionizing it. Television, as both a technology and a tool for cultural storytelling, remains as important today as ever, but it has changed in fundamental ways. *The Television Will Be Revolutionized* provides a sophisticated history of the present, examining

television in what Lotz terms the “post-network” era while providing frameworks for understanding the continued change in the medium. The second edition addresses adjustments throughout the industry wrought by broadband delivered television such as Netflix, YouTube, and cross-platform initiatives like TV Everywhere, as well as how technologies such as tablets and smartphones have changed how and where we view. Lotz begins to deconstruct the future of different kinds of television—exploring how “prized content,” live television sports and contests, and linear viewing may all be “television,” but very different types of television for both viewers and producers. Through interviews with those working in the industry, surveys of trade publications, and consideration of an extensive array of popular shows, Lotz takes us behind the screen to explore what is changing, why it is changing, and why the changes matter.

Soundtracks of Asian America Grace Wang, 2014-12-10 In Soundtracks of Asian America, Grace Wang explores how Asian Americans use music to construct narratives of self, race, class, and belonging in national and transnational spaces. She highlights how they navigate racialization in different genres by considering the experiences of Asians and Asian Americans in Western classical music, U.S. popular music, and Mandopop (Mandarin-language popular music). Her study encompasses the perceptions and motivations of middle-class Chinese and Korean immigrant parents intensely involved in their children's classical music training, and of Asian and Asian American classical musicians whose prominence in their chosen profession is celebrated by some and undermined by others. Wang interviews young Asian American singer-songwriters

who use YouTube to contest the limitations of a racialized U.S. media landscape, and she investigates the transnational modes of belonging forged by Asian American pop stars pursuing recording contracts and fame in East Asia. Foregrounding musical spaces where Asian Americans are particularly visible, Wang examines how race matters and operates in the practices and institutions of music making.
