Apples: Fruits Children's Book With Facts And Pictures Bold Kids,2022-03-07 The fact that children can eat apples without a doctor's visit is an encouraging one. These fun apple facts are the perfect way to get kids interested in eating fruit. In addition to being fun and educational, they can also help your child develop a new appreciation for the fruit. In fact, the government recommends that children eat five to nine cups of fruit every day. You can start by teaching your child the different parts of an apple. An apple is a delicious and nutritious treat. The fruit contains potassium, vitamin C, fiber, and antioxidants. It also helps you go poop! Besides being nutritious, you can also enjoy apples by eating the peel. Some varieties are better for cooking, while others are perfect for snacking. You should know that apples can grow as many as 2,500 varieties, although only a few are as famous as Red Delicious, Granny Smith, and Honeycrisp. If you want to learn about the health benefits of apples, you should eat them raw. This way, you can get all the nutrients they need without having to peel them. Just keep in mind that the fleshy part of the apple is more nutritious than the skin. The peel contains a wide variety of nutrients that make it an excellent snack for children. So, when you choose an apple to eat, make sure to eat it whole. The peel has many important nutrients, but if you're going to eat it raw, leave it off.
