Gems in the Early Modern World Michael Bycroft, Sven Dupré, 2018-11-27 This edited collection is an interdisciplinary study of gems in the early modern world. It examines the relations between the art, science, and technology of gems, and it does so against the backdrop of an expanding global trade in gems. The eleven chapters are organised into three parts. The first part sets the scene by describing how gems moved around the early modern world, how they were set in motion, and how they were pulled together in the course of their travels. The second part is about value. It asks why people valued gems, how they determined the value of a given gem, and how the value of a gem was connected to its perceived place of origin. The third part deals with the skills involved in cutting, polishing, and mounting gems, and how these skills were transmitted and articulated by artisans. The common themes of all these chapters are materials, knowledge and global trade. The contributors to this volume focus on the material properties of gems such as their weight and hardness, on the knowledge involved in exchanging them and valuing them, and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas.

The Quest for World Environmental Cooperation Branislav Gosovic, 2019-03-21 First published in 1992. In 1972, the UN Conference on the Human Environment initiated the process of world environmental cooperation. This study is about GEMS (the Global Environment Monitoring System) which the Conference recommended be set up to generate data and information necessary for worldwide environmental assessment. This book examines the genesis and evolution of GEMS, and the complex task involved in establishing GEMS and making it perform its functions. It relates GEMS to the factors which have shaped the international environmental agenda and cooperation since 1972. In particular, it highlights North-South differences and the problems inherent in the international organizations belonging to the UN system, vis-à-vis the novel and multifaceted challenges involved in dealing with systemic, cross-sectoral nature of global environmental problems. The lessons of GEMS and other issues presented in this book are highly relevant to the continuing efforts to set up effective programmes for 'earthwatching' and to promote international environmental cooperation. They also relate more broadly to the challenges of managing global interdependence and to the need to devise supporting organizational structures through reform and strengthening of the UN system. The comprehensive nature of the political and institutional analyses presented in this book make it an academic reference work of lasting value. Its frank tone and willingness to derive prescriptive conclusions will appeal in particular to the many actors engaged in the processes and structures of global multilateral cooperation. The book will be of special use to those interested in environmental issues and international organization

Travellers, poets and philosophers have lavished praise on it, and perhaps no other place is imbued with the richness of ritual and ceremony across the country, as Jaipur is. Among its numerous architectural wonders, the city's Jantar Mantar (observatory) and Amber Fort have been included in United Nations Educational, Scientific and Cultural Organization's list of world heritage sites. The book has been abundantly illustrated with more than 500 rare, coloured photographs and paintings, and 154 unseen black and white photographs and illustrations, to capture the imagination of a discerning reader.

Friends from Mountain Forge Wm. Matthew Graphman, 2018-03-29 The key to finding the next piece of the talisman is lost. Rift and his family of battle wolves are formally banished. The church at Brittle is destroyed. Guntharr, Taya, and the others look for a sliver of hope as the thread holding their quest together begins to fray. Raskin, Taya's life-bound hawk lord, falls into guilt and depression over a past he has kept hidden for too long. Driven by concern for their friend, the companions turn their attention to Eddiforth and the Mountain of the Hawk Lords to seek resolution for their friend. What they discover is a plot by the hawk lord council to start a war with their neighbors, the battle wolves. Events spiral out of control as Raskin is captured along with Guntharr, Taya, Firebane, and Farrian. The alpha hawk lords launch an all-out attack on the unsuspecting battle wolves of Clan Firepack, but the alphas are not going to it alone. Alpha Plass has secretly enlisted the aid of the sorceress, Naranda. Her role is to guarantee the war and see to it that the rise of Silverwood never happens. Plass seals the deal by turning over the red gem of power. Its discovery coincides with the alphas' orchestrated extermination of a certain caste of hawk lords. Tensions rise as Raskin discovers the truth about the events leading up to his rescue by Silverwood's princess. As he prepares for the ultimate fate, the sudden appearance of an impossible hawk lord gives him the strength to forgive himself and a new courage to move forward. Ghosts from Rift's past surface as former students seek to settle a score with the old battle wolf. To save his friends

and lay the lingering guilt he has carried to rest, Rift agrees to a fight to the death with the four rogue battle wolves. With the clouds of war looming, Silverwood's friends from Mountain Forge prepare to sacrifice everything to save Taya and keep the hope of Silverwood's return alive.

The Rivers Run Dry Special Agent Raleigh Harmon is good at her job as a forensic geologist, but not as good at bureau politics. As one of the few females on the team, she finds herself in a strange land when she's transferred from Richmond to drought-stricken Seattle. When a hiker suddenly goes missing and a ransom note arrives, Raleigh vows to find the missing college girl and leave no stone unturned. The Clouds Roll Away Closing her assignment with the FBI's Seattle office, Raleigh Harmon returns to her hometown of Richmond, Virginia, expecting a warm welcome. Instead she finds herself investigating an ugly cross burning at a celebrity's mansion and standing in the crosshairs of her boss at the Bureau. And the deeper Raleigh digs into the case, the murkier the water becomes. The Mountains Bow Down Everything's going to work out. Time away always makes things better . . . That's what FBI Special Agent Raleigh Harmon believes as she boards a cruise to Alaska. A land of mountains and gems and minerals, the Last Frontier is a dream destination for this forensic geologist who's hoping to leave behind a hectic work schedule and an engagement drained of romance, but like the scenery that surrounds the cruise ship, Raleigh discovers a mystery so daunting that even the mountains might bow down before it. The Stars Shine Bright After the FBI suspends her for bending its rules, Special Agent Raleigh Harmon is looking for a chance to redeem her career. Sent undercover to a thoroughbred horse track, Raleigh takes on a double life to find out who's fixing the races. But when horses start dying and then her own life is threatened, Raleigh realizes something bigger—and more sinister—is

ruining Emerald Meadows.

Gems, Computers and Attractors For 3-Manifolds Sørensen Lins, 1995 This text provides a guide to dealing with 3-manifolds by computers. Its emphasis is on presenting algorithms which are used for solving (in practice) the homeomorphism problem for the smallest of these objects. The key concept is the 3-gem, a special kind of edge-colored graph, which encodes the manifold via a ball complex. Passages between 3-gems and more standard presentations like Heegaard diagrams and surgery descriptions are provided. A catalogue of all closed orientable 3-manifolds induced by 3-gems up to 30 vertices is included. In order to help the classification, various invariants are presented, including the new quantum invariants.
