Advances in Selected Artificial Intelligence Areas Maria Virvou,George A. Tsihrintzis,Lakhmi C. Jain,2022-02-27 As new technological challenges are perpetually arising, Artificial Intelligence research interests are focusing on the incorporation of improvement abilities into machines in an effort to make them more efficient and more useful. Recent reports indicate that the demand for scientists with Artificial Intelligence skills significantly exceeds the market availability and that this shortage will intensify further in the years to come. A potential solution includes attracting more women into the field, as women currently make up only 26 percent of Artificial Intelligence positions in the workforce. The present book serves a dual purpose: On one hand, it sheds light on the very significant research led by women in areas of Artificial Intelligence, in hopes of inspiring other women to follow studies in the area and get involved in related research. On the other hand, it highlights the state-of-the-art and current research in selected Artificial Intelligence areas and applications. The book consists of an editorial note and an additional thirteen (13) chapters, all authored by invited women-researchers who work on various Artificial Intelligence areas and stand out for their significant research contributions. In more detail, the chapters in the book are organized into three parts, namely (i) Advances in Artificial Intelligence Paradigms, (ii) Advances in Artificial Intelligence Applications, and (iii) Recent Trends in Artificial Intelligence Areas and Applications. This research book is directed towards professors, researchers, scientists, engineers and students in Artificial Intelligence-related disciplines. It is also directed towards readers who come from other disciplines and are interested in becoming versed in some of the most recent Artificial Intelligence-based technologies. An extensive list of bibliographic references at the end of each chapter guides the readers to probe further into the Artificial Intelligence areas of interest to them.

Accompagner l'enfant dans ses apprentissages scolaires : TDAH, Dys, HPI, TSA et tous les autres ! Fabienne Henry,2023-10-18 L'heure des devoirs est souvent un moment délicat. Les familles s'épuisent parfois en utilisant des méthodes inadaptées et se retournent la plupart du temps vers l'école pour s'en sortir. Le stress et l'anxiété, la phobie scolaire parfois, concernent de plus en plus d'enfants, au point qu'une même pédagogie adaptée peut s'appliquer aussi bien aux enfants « différents » qu'aux autres. Ce livre propose un accompagnement de l'enfant dans sa globalité (fonctions cognitives, environnement, hygiène de vie, confiance en soi, etc.). Il fournit des techniques simples et applicables qui vont aider les parents et l'enfant tout au long de sa scolarité. Il se base sur le fonctionnement cognitif du cerveau. Le temps de travail va ainsi être plus efficace et moins anxiogène. Un focus est mis sur les enfants Dys, TDAH, HPI qui ont un fonctionnement autre. Des fiches méthodes sont proposées en fin d'ouvrage applicables directement.
