Journal of Researches into the Natural History and Geology of the Countries Charles Darwin,2021-01-01 This work was described, on its first appearance, by a writer in the Quarterly Review as One of the most interesting narratives of voyaging that it has fallen to our lot to take up, and one which must always occupy a distinguished place in the history of scientific navigation. [...] Most of the views given in this work are from sketches made on the spot by Mr. Pritchett, with Mr. Darwin's book by his side. Some few of the others are taken from engravings which Mr. Darwin had himself selected for their interest as illustrating his voyage, and which have been kindly lent by his son. -Preface by John Murray

Geology at ANU (1959 - 2009) Mike Rickard,2010-12-01 This history was undertaken to celebrate the 50th anniversary of the Geology Department at ANU, and to honour its founding professor David A. Brown. It includes contributions from some 100 former students outlining their career successes. This history was compiled by Dr Mike Rickard, a staff member of the Department of Geology from 1963 to 1997, who also served as Head of Department for seven years. He graduated BSc and PhD from Imperial College London in 1957 and has specialised in mapping the structure of mountain chains in Ireland, Canada, Norway, and southern South America. He also mapped volcanic rocks for the Geological Survey of Fiji. He taught Structural Geology and Tectonics and has supervised field work in south eastern and central Australia. After retirement he has taught U3A courses in Earth Science.

Political Geology Adam Bobbette,Amy Donovan,2018-11-03 This book explores the emerging field of political geology, an area of study dedicated to understanding the cross-sections between geology and politics. It considers how geological forces such as earthquakes, volcanoes, and unstable ground are political forces and how political forces have an impact on the earth. Together the authors seek to understand how the geos has been known, spoken for, captured, controlled and represented while creating the active underlying strata for producing worlds. This comprehensive collection covers a variety of interdisciplinary topics including the history of the geological sciences, non-Western theories of geology, the origin of the earth, and the relationship between humans and nature. It includes chapters that re-think the earth's 'geostory' as well as case studies on the politics of earthquakes in Mexico city, shamans on an Indonesian volcano, geologists at Oxford, and eroding islands in Japan. In each case political geology is attentive to the encounters between political projects and the generative geological materials that are enlisted and often slip, liquefy or erode away. This book will be of great interest to scholars and practitioners across the political and geographical sciences, as well as to philosophers of science, anthropologists and sociologists more broadly.
