Recent Advances in Intrusion Detection Somesh Jha, Robin Sommer, Christian Kreibich, 2010-09-02

On behalf of the Program Committee, it is our pleasure to present the proceedings of the 13th International Symposium on Recent Advances in Intrusion Detection Systems (RAID 2010), which took place in Ottawa, Ontario, Canada, during September 15-17, 2010. As in the past, the symposium brought together leading researchers and practitioners from academia, government, and industry to discuss intrusion detection research and practice. There were eight technical sessions presenting full research papers on network protection, high performance, malware detection and defense (2 sessions), evaluation, forensics, anomaly detection and access protection, and Web security. Furthermore, there was a poster session presenting emerging research areas and case studies. The RAID 2010 Program Committee received 102 full-paper submissions from all over the world. All submissions were carefully reviewed by independent reviewers on the basis of technical quality, topic, space, and overall balance. The final decision took place at a Program Committee meeting held during May 19-20 in Oakland, California, where 24 papers were eventually selected for presentation at the conference and publication in the proceedings. As a continued feature, the symposium later also accepted 15 poster presentations reporting early-stage research, demonstration of applications, or case studies. The authors of accepted posters were also offered the opportunity to have an extended abstract of their work included in the proceedings.

Gmail For Seniors Scott La Counte, 2019-08-30 If you are like millions of people, then your first email was probably AOL, Juno, or Hotmail. Email as a communication tool, however, has been around since the 60s. Gmail is the most widely used provider today, and if you are using it (or considering using it) there's probably a good reason: it does more than perhaps any other email provider out there. You can make phone calls with Gmail! You can make video calls with Gmail! You can send money to friends with Gmail! There's so much you can do! But how?! This book will show you how. It will also walk you through all the basics. So, if you've never used email in your life, then it will give you all the information you need to get started. If you are ready to get the most out of Gmail, then let's get started! This book is not endorsed by Alphabet, Inc.

The Ridiculously Simple Guide to Gmail Scott La Counte, 2019-08-21 Email as a communication tool has been used since the 1960s. Commercial use of email is still relatively young. Today, email is dominated by one company: Google. Estimates show that over 50% of all people with email use Gmail! If you picked up this book, you probably have one or are considering getting one. For its email service, Gmail is easy enough to use—compose email, send email, done! But there's more to Gmail than sending and receiving email. How do you get not-Spam emails to stop showing up as Spam, for example? What on Earth are labels? And how do you get email forwarded to another inbox? If you want to be a power user, then read on!

E-Marketing Stephen Dann, Susan Dann, 2017-09-16 Combining academic rigour and practical application, E-Marketing brings together a theoretical framework from academic peer reviewed literature with contemporary developments in internet technology. Considering marketing theory and practice, the text demonstrates how conceptual frameworks can be applied to the e-marketing environment.

Information Trapping Tara Calishain, 2006-12-07 How many times have you run a Google

search that resulted in thousands of results? With over 8 billion pages online and more posted every day, the Web more than likely contains the information you're looking for — if only you could find it. In *Information Trapping: Real-Time Research on the Web*, Internet-search-engine expert Tara Calishain makes researching more efficient and rewarding for anyone for whom the Web is an indispensable tool — academics, journalists, scientists, and professionals, as well as bloggers, genealogists, and hobbyists. She does so by teaching the latest techniques for building automated information-gathering systems. As an alternative to the typical one-time search for information, Tara demonstrates how readers can use RSS feeds, page monitoring tools, and other software to set up information streams of many different data types — from text to multimedia to conversations — for capture and review.
